STAR WARS

THE ULTIMATE VISUAL GUIDE

FOR A GENERATION, *Star Wars* has transported moviegoers of all ages to the very limits of their imaginations. The six-movie saga has become a cultural phenomenon, spawning a host of spin-off novelizations, comic books, and video games, while enthraling fans around the world.

Star Wars: The Ultimate Visual Guide uncovers the full story of the amazing *Star Wars* saga. This extensively researched book reveals the complete, millennia-spanning history of George Lucas's long ago, far-away galaxy, from the origins of the noble Jedi and the evil Sith to the rise of Luke Skywalker's New Jedi Order. It also explores the making of the *Star Wars* movies, and the ever-expanding range of *Star Wars* merchandise. Packed full of fascinating features, astonishing artworks, and full-color photographs, *Star Wars: The Ultimate Visual Guide* is an ideal introduction to the world of *Star Wars* and an invaluable addition to every fan's collection.

FOREWORD

IT'S 10 A.M. Lights dim. Time for the morning show. Another episode of everybody's favorite all-action adventure serial. It could be the King's Theatre, Dundee, Scotland, any Saturday over 50 years ago. I would have endured a Pathé newsreel, managed a cheer as Jerry outwitted Tom, and would now be eagerly anticipating the next hair and hackle-raising instalment of improbable Good versus impossible Evil.

However, it's not post-war Dundee. It's 2005, and I am north of San Francisco at Skywalker Ranch. But today I am just a kid again, waiting for the scroll to roll at a private screening of Episode III: *Revenge of the Sith*, the final filmed episode of the six-part *Star Wars* saga, where for once, Evil will vanquish Good, and it will be all my fault.

I first encountered Emperor Palpatine at Elstree Studios in the early 1980s. He was staring back at me from a make-up mirror, larger than life and 50 times as ugly. Yellow contact lenses stung my eyes and afforded little peripheral vision. As I walked onto a vast sound stage that had been transformed into a starship hangar, populated by seemingly endless platoons of gleaming white stormtroopers, the scale of George Lucas's vision hit me. This was space spectacle, a back-drop for a galactic opera of Wagnerian dimension.

Time passed. The prequels unfolded and, as Palpatine shed years and disappeared behind a politician's mask—which happily turned out to be my face—the digital moviemaking revolution gathered pace, as backdrops ceded control to blue cloths.

And now, as I watch the denouement of the saga that has been a part of my life for over two decades, I am caught up once more in this epic story. As harsh beams glint off the freshly minted armour of Palpatine's tragic apprentice, a smug smile of contentment flickers over the reptilian features of his evil master, the self-proclaimed Emperor of the galaxy. But there is hope. Twin babes blink as the sun sets on the Old Republic, with the promise that for a future generation, the dark will yield once more to light.

As the auditorium lights return me to a sort of reality, I sit, not wanting to move, savoring the heady mixture of sadness and elation and thinking, "Well, they just don't make them like that anymore..."

INTRODUCTION

IN DECEMBER 1976, my brother Corey brought home a book that would have a huge impact on my life. It was a copy of the *Star Wars* novelization, which had been published in advance of the movie's release. Corey had bought it because he liked the amazing cover illustration by artist Ralph McQuarrie. He really enjoyed the contents too, which got me interested because I hadn't heard him rave about any book since he'd read Jules Verne's classic fantasy *20,000 Leagues Under the Sea* some years earlier. I was also blown away by the powerful imagery of McQuarrie's cover painting, with the ominous figure of Darth Vader looming out at the reader like an approaching storm. A few months later, Marvel Comics' adaptation added to our awareness of *Star Wars*, and made us anticipate the release of the movie even more.

Even though Corey and I thought we already knew the story inside-out, when we finally saw *Star Wars* in the summer of 1977, the film itself just blew our minds, along with everybody else's. Time and again we went back to watch the movie, transported from our everyday lives to George Lucas's long-ago, far-away galaxy. And that is the lasting power of *Star Wars*. It fuels the imagination, exceeds your wildest expectations, and appeals to audiences of all ages.

Almost three decades after the theatrical release of the first *Star Wars* movie—now officially titled *Episode IV: A New Hope*—an ever-growing number of spin-off novels, comics, and video games have developed the *Star Wars* universe far beyond the events of the two movie trilogies. The key scenarios, characters, and locations from both the six-movie saga and the "Expanded Universe" are brought together in *Star Wars: The Ultimate Visual Guide* to provide a detailed, fully illustrated guide to the history of the *Star Wars* galaxy. As well as looking at the fictional aspects of *Star Wars*, this book includes detailed information about the evolution and production of the movies, from the first *Star Wars* movie to the theatrical release of the final film, *Revenge of the Sith*. There's also a look at *Star Wars* merchandise, video games, novelizations, a movie timeline, and much more.

I hope this book will serve not only as a reference for readers, but will also inspire, excite, and entertain them, just as George Lucas's space fantasy has done—and continues to do—for generations of moviegoers.

A GALAXY FAR, FAR AWAY....

THERE WAS A time when the galaxy's sentient species could only dream of traveling to other worlds. When technology enabled the dream to become a reality, journeys rarely strayed beyond a single solar system, as the time required for interstellar journeys exceeded most lifespans. But with the discovery of hyperspace—the dimensional corridor that enables faster-than-light travel—time was no longer an issue. Hyperspace trade routes were established, new technologies emerged, and a Galactic Republic came into being, policed by the noble Jedi Knights. The Republic's center of power was the city planet Coruscant, its soaring spires dwarfed by the huge, five-pillared structure of the Jedi Temple. Eventually the Republic was transformed into an Empire, which was in turn superceded by a New Republic, where the Jedi continue to be the guardians of freedom and justice in the galaxy.

GALACTIC HISTORY

THE HISTORY OF the galaxy is intertwined with the story of the Jedi and their struggle against the forces of evil. The most crucial period in the history of the Jedi Order was between 32 B.B.Y. (Before the Battle of Yavin) and 4 A.B.Y. (After the Battle of Yavin), when the rise of the Sith and the creation of the Galactic Empire threatened to extinguish the Jedi for all time. In 30 A.B.Y., with the decline of the Empire and the rise of the New Republic, the Jedi continue to face many dangerous adversaries.

19 B.B.Y. CREATION OF THE EMPIRE

Anakin Skywalker discovers that Supreme Chancellor Palpatine is the Sith Lord Darth Sidious (pp. 60–61), who manipulates events to gain power. Anakin's own craving for control prompts him to become Sidious's apprentice. Taking the name Darth Vader, he helps his new Master kill nearly all the Jedi as well as the Separatist leaders. Palpatine declares himself Emperor of the galaxy, and assigns Vader to oversee the construction of a secret superweapon—the Death Star.

0 A.B.Y. BATTLE OF YAVIN

Using stolen technical readouts for the Death Star, the Rebel Alliance discovers a design flaw that might enable them to destroy the Empire's moon-sized battle station. As the Death Star nears the Rebel's secret base in the Yavin system, it is intercepted by Luke Skywalker and his fellow Rebel pilots (pp. 84–85). Strong with the Force, Luke fires the shot that destroys the Death Star, and leaves but a single Imperial survivor—Darth Vader. Although the Battle of Yavin does not bring an immediate end to the Empire's oppressive reign, it is widely regarded as one of the most pivotal moments in galactic history.

3 A.B.Y. YODA TRAINS LUKE

Hoping to become a great warrior like his Jedi father, Luke Skywalker—unaware of the true details of his heritage—travels to the planet Dagobah to train with Jedi Master Yoda (pp. 90–91). From the elder Jedi, Luke learns that "wars not make one great," and that a Jedi's purpose is to help others, not to seek adventure. When Luke has visions that reveal his friends are in danger, he chooses to end his training early. Traveling to Cloud City in the Bespin system on a desperate rescue mission, Skywalker has a fateful duel with the Emperor's fearsome Sith apprentice, Darth Vader.

4 A.B.Y. BATTLE OF ENDOR

In a daring scheme to destroy the Rebellion once and for all, Palpatine deliberately leaks information to allow the Rebels to "discover" that a new Death Star is under construction in orbit around Endor's forest moon. As the Emperor anticipated, the Rebels devise a plan to destroy the battle station before it can be activated, but their attack is nearly foiled when the Death Star's superlaser is revealed to be fully operational (pp. 102–103). Despite his manipulations, the Emperor is unprepared for both the Rebels' resolve and Luke Skywalker's unwavering belief that Anakin Skywalker was not entirely consumed by evil.

THE GALAXY

BILLIONS OF STARS form a brilliant, pinwheel galaxy that is more than 100,000 light-years in diameter. Early hyperspace cartographers divided the galaxy into three classifications: regions, sectors, and systems. Regions range in size from small pockets of space to vast expanses, and are subdivided into sectors, which were originally defined as any area of space with 50 inhabited planets. Systems consist of individual stars and their orbiting planets, only a fraction of which can sustain life. There are well over a million inhabited worlds, ranging from desert planets to jungle moons, ice worlds, volcanic environments, and city planets. The invention of the hyperdrive approximately 25,000 years ago established contact between the thousands of previously isolated intelligent alien species, which in turn led to the creation of the Galactic Republic.

UNKNOWN REGIONS

EXPANSION REGION
Mining and industrialization in the Expansion Region has left many planets depleted of natural resources. The exploited planet of Circarpous V, also known as Mimban, is home to the Crows. This humanoid race live a subterranean existence deep inside the planet.

CORE WORLDS

The most prestigious and densely populated planets in the galaxy are in the Core Worlds, the ancient region bordering the Deep Core long governed by the Republic. The oldest records refer to the city planet of Coruscant as the heart of the civilized galaxy, and historians have long referred to it as "the jewel of the Core Worlds." Many humans believe that their species originated on Coruscant, but there is no existing archeological evidence to support this, and if there ever were, it was likely destroyed to accommodate the construction of a skyscraper megablock.

Famous as a world of unspoiled beauty, Alderaan (above) was a center of art, democracy, culture, and education.

Covered with huge skyscrapers and depleted of natural resources, Coruscant (left) is the most heavily populated planet in the galaxy.

DEEP CORE

A huge region of old stars, the Deep Core lies between the perimeter of the Galactic Core and the center of the galaxy. At the center of the Deep Core is a black hole surrounded by masses of antimatter and dense stars. Because the immense gravitational pull of so many stars snarls the fabric of hyperspace, the region was long believed to be impenetrable.

With much of its polluted surface covered in an urban sprawl, the heavily industrialized planet Vulper is ringed with belts of space junk.

THE MID RIM

The enormous area of space between the Inner Rim and Outer Rim Territories has few natural resources, leaving it less populated and far less wealthy than the surrounding regions. The Mid Rim is also largely unexplored, as exploration is discouraged by the fact that numerous smugglers and pirates have set up bases on uncharted worlds in this region. However, several trading worlds have bustling economies, and there are many potential opportunities for those who are willing to work hard.

The planet Kashyyyk is the homeworld of the fierce but loyal Wookiees. Murky lagoons border vast forests of towering, kilometers-high wroshyr trees, in which the Wookiees have built huge treetop cities that are naturally supported by the strong, thick tree branches.

WILD SPACE

The ragged fringe that separates galactic civilization from the Unknown Regions, Wild Space is the true frontier of the galaxy. After the Battle of Endor, Grand Admiral Thrawn declared this largely unexplored region as part of the Empire, but much of Wild Space still remains untamed. In the Unknown Regions that lie beyond Wild Space, exploration efforts have never met with more than marginal success.

The stormy waterworld of Kamino is located in Wild Space. Kaminoans ride flying cetaceans called aishas. Indigenous to the planet Naboo, these aishas may have been created using cloning technology.

THE COLONIES

Heavily populated and industrialized, this part of the galaxy was one of the first areas outside of the Galactic Core to be settled. The region is still known as the Colonies, even though its worlds have been colonized for many millennia. During the reign of Emperor Palpatine, much of the Colonies was controlled by the Empire.

OUTER RIM

A group of star systems that lie on the remote edges of the galaxy, the Outer Rim Territories is a vast region, strewn with alien homeworlds and rugged frontier planets. Because of their distance from the Core Worlds, few planets in the Outer Rim had any association with the Republic or respect for its laws. During the reign of Emperor Palpatine, the Empire plundered many Outer Rim worlds. As a result of the Empire's oppressive actions, most of these worlds supported the Rebel Alliance in its valiant attempts to bring an end to the Emperor's rule.

A blood-red world, Mustafar is covered by active volcanoes, with lava rivers coursing over the scarred planetary surface.

THE RIM WORLDS
With the expansion of colonization throughout the Rim Worlds, the area was divided into the Inner, Mid, and Outer Rim regions. The planet Ruusan (above) is located in the Mid Rim.

TRADE ROUTES

Although the discovery of hyperspace enabled spacecraft to travel at faster-than-light speeds, initial journeys were fraught with danger, as the smallest miscalculation would lead to a deadly collision with an object in realspace. Galactic scouts risked their lives to plot courses through hyperspace, and were well rewarded for the discovery of stable paths that established trade between distant systems. Two of the earliest navigated paths became the Perlemian Trade Route and the Corellian Trade Spine.

SPECIAL TECHNOLOGY

LIGHTSABERS

Universally recognized as the weapon of Jedi Knights, an activated lightsaber is a beam of pure energy that can deflect energy bolts and cut through almost any object. Jedi Master Mace Windu (above) is regarded as one of the greatest lightsaber-wielders of the Old Republic.

ENERGY SHIELDS

An energy shield—also called a deflector shield—is a protective force field. There are two basic types of energy shields: ray shields, which absorb radiation and blaster bolts, and particle shields, which repulse solid objects. Although energy shields can be used to defend planetary bases, they are more commonly associated with protecting starships against stellar radiation, micrometeorites, and enemy fire.

Unlike other starfighters, Republic-era Jedi Interceptors were not fitted with shield generators. Instead, their pilots used the Force to avoid laserfire.

GUNGAN DEFENSES

On Naboo, the Gungan army used powerful planetary ray shields to repel laserfire from the Trade Federation's battle droids. Fambaa swamp creatures (below) carried the shield generators into battle. Strapped to the

Fambaas' backs, they projected beams that formed a protective energy field. Unfortunately, the shields were not impervious to slow-moving objects, and the droids were able to step through the shields and engage the Gungans.

WHILE A SURPRISING number of civilizations continue to exist without any awareness of robots, starships, or anti-gravity devices, millions of sentient species across the galaxy have used such technology for thousands of years. And ever since interstellar travel led to galactic trade, seemingly disparate alien sciences have been routinely co-opted and adapted for new and diverse purposes. Although the origins of many specific devices have been lost in time, historical records indicate that energy weapons developed independently on multiple worlds during the same era, and some scholars believe that the first such weapons were developed on Coruscant. Nearly all historians agree that the two greatest technological breakthroughs were the blaster and the discovery of hyperspace travel, while the Holonet—a network capable of broadcasting holographic messages across the galaxy—has revolutionized high-speed communications. The development of artificial intelligence has also played a major role in shaping the galaxy, with a vast range of tasks being carried out by droids, from domestic duties to astronavigation, surgery, translation, hardware maintenance, and warfare.

HYPERSPACE TRAVEL

If a pilot attempted to travel at the speed of light from one end of the galaxy to the other, the journey would take about 100,000 years. Travel time is reduced considerably by a jump into hyperspace, the dimension of space-time that takes advantage of the wrinkles in the fabric of realspace. The *Millennium Falcon* (above) has a powerful Class 0.5 hyperdrive, which enables it to travel through hyperspace much faster than an Imperial starship. Many starships have built-in hyperdrive engines and astronavigation computers, but ships equipped only with sublight engines require additional booster systems and astromech droids programmed with hyperspace jump coordinates.

TRACTOR BEAMS

A modified force field, tractor beams are projected from spaceports, planetary bases, and large starships to help guide vessels to safe landings. They can also be used to capture enemy ships. The first Death Star (right) was equipped with over 700 tractor beam generators, enabling it to pull in a ship the size of the *Millennium Falcon* with ease.

HOLOPROJECTORS

Using lasers to scan a subject, holoprojectors create an organized arrangement of light that can be projected to appear as a 3-D replica of the subject. These holograms are used for communication, information displays, and entertainment. Most holoprojectors are equipped with audio recorders. The HoloNet communications network allows for near-instantaneous holographic transmissions.

BLASTERS

The most commonly used weapon throughout the galaxy, blasters fire intense beams of light energy that can stun or kill. Ranging from compact pistols to heavy assault rifles, they assume their largest form as starship-mounted blaster cannons.

REPULSORLIFT VEHICLES

Antigravitational propulsion units, or repulsors, are used in land and atmospheric vehicles such as landspeeders, airspeeders, speeder bikes, and swoops. Repulsors—sometimes called repulsorlift engines—produce a field that pushes against a planet's gravity and provides thrust, allowing the vessel to hover as it travels above surface level.

Used on starships throughout the galaxy, domed-head astromech droids help with routine maintenance, emergency repairs, and navigation.

DROIDS

Robotic systems with varying degrees of artificial intelligence, droids are used by almost every technologically advanced civilization. Some droids have speech synthesizers and are humanoid in appearance, but most communicate via programming languages and are designed purely for their function. Despite their hard work and loyalty to their masters, droids are essentially regarded as appliances without any personal rights, and are not allowed in many public areas.

Protocol droids, such as K-3PO (left) and C-3PO (right), are usually in service to high-level diplomats who require an aide and interpreter.

At droid lots, individuals can purchase anything from ex-military droids to medical specialists.

THE JEDI ORDER

FOUNDED AS A philosophical study group, the Jedi Order has its origins in the earliest days of the Republic, many millennia in the distant past. The ancient Jedi spent centuries contemplating the mysterious energy field known as the Force. They became masters at manipulating this energy, and chose to use their skills for good and to help those in need. For 25,000 years, the Jedi served as peacemakers of the Galactic Republic, and their interplanetary exploits were legendary. Because emotional attachments could distract Jedi from their missions, and selfishness and desire could lead to the dark side of the Force, many traditions evolved to help maintain the stability of the Order. Marriage was actively discouraged with very few exceptions, and Jedi initiates were rarely older than six months when they began their training. In the New Republic era, the New Jedi Order have abandoned some of these traditions, but the Jedi's commitment to promoting peace and justice in the galaxy remains unchanged.

FINDING POTENTIAL JEDI

In the Republic era, it was considered to be dangerous for potential Jedi to begin training during adolescence as their established character traits could lead them to the dark side of the Force. Recruiters narrowed their search to newborns and infants with high midi-chlorian counts. Many families considered it an honor to have a child adopted, but some refused to give up their children, and regarded the Jedi as baby snatchers.

At the Jedi Temple, Jedi training began during infancy, before the initiate had experienced fear and anger.

LIGHTSABER TRAINING

Jedi learned how to wield lightsabers in childhood in the Old Republic, and continued to practice with the weapons throughout their lives. To prevent accidents, they began with small training lightsabers, which were equipped with low-power "safety blade" generators. After mastering the fundamental skills of handling their weapons, Jedi novices trained wearing vision-obscuring helmets (below). Reaching out with their feelings, the younglings used the Force to see the training remotes, which fired harmless energy bolts that the Jedi deflected with their lightsabers.

THE WILL OF THE FORCE

Microscopic life forms called midi-chlorians reside within all living cells. They communicate with the Force, revealing its will, and a high midi-chlorian count indicates great Jedi potential. Analyzing Anakin Skywalker's blood, Obi-Wan Kenobi discovered a count even higher than Master Yoda's.

IMMENSE LEARNING
Housed within the Jedi Temple on Coruscant, the Jedi Archives (right) contained the greatest library in the Galactic Republic. The library was a repository of knowledge gathered over many millennia, and provided the Jedi with extensive information about every explored world and star system in the galaxy.

THE GREAT HOLOCRON

Jedi Holocrons contain the teachings of great Jedi Knights and Masters. They hold secrets not found in data files, and can be accessed only by Jedi. The largest and most powerful Holocron is the dodecahedral Great Holocron (above).

OBJECT MOVEMENT

In his duel with Count Dooku on Geonosis, Yoda (left) used the Force to halt the fall of heavy stones. Although such ability is commonly known as a Jedi's "object movement" power, it is more accurately described as a manipulation of the Force—the energy field that surrounds and binds everything—to control the direction of objects through space. Jedi utilize this talent not only to push, pull, and lift objects, but also to redirect projectiles and guide their starships through combat.

JEDI MIND TRICKS

The Force can be used to manipulate weak-minded beings into believing whatever a Jedi wants them to believe. Luke Skywalker (far right) employed this talent to infiltrate Jabba's Palace, and convinced Bib Fortuna (near right) to lead him to the Hutt crimelord. Aliens with highly organized mental facilities, such as Hutts and Toydarians, are naturally immune to Jedi mind tricks.

JEDI SPIRITS

The Sith Lord Darth Plagueis discovered it was possible to merge with the Force and still retain individual consciousness, but was not interested in the nonmaterial world. Jedi Master Qui-Gon Jinn succeeded, and later returned from the netherworld to pass his knowledge on to Yoda and Obi-Wan Kenobi (left).

THE DARK WOMAN

To emphasize that a Jedi should have no possessions, the Jedi known as the Dark Woman surrendered her original name—An'ya Kuro—in service to the Force. Over many decades, she specialized in training students who were deemed "difficult" by other Jedi. Although her achievements included the discovery and recruitment of the four-year-old Ki-Adi-Mundi to the Jedi Order, her non-traditional instruction techniques made her unpopular with the Jedi Council.

A firm believer in the traditions of the Sith Empire, Ludo Kressh (above) tried to stop Naga Sadow from seizing power.

THE SITH

IN THE EARLY years of the Old Republic, certain Jedi turned to the dark side of the Force. These "Dark Jedi" were defeated by their former allies, and fled to the far reaches of the galaxy, where they conquered a powerful but malleable species named the Sith. Treated as gods by their new subjects, the Jedi exiles proclaimed themselves the Lords of the Sith. The Sith Lords built a vast empire, conquering many worlds and races. Five thousand years before the Battle of Yavin, a power struggle between rival Sith Lords Naga Sadow and Ludo Kressh for control of the Sith Empire brought the Sith—and their dark-side knowledge—back into Republic space.

NAGA SADOW

Unlike Ludo Kressh, Naga Sadow (right) was not satisfied with dominating the Massassi, an evolved form of the original Sith species. He believed the Sith Lords were destined to rule the galaxy. When he saw an opportunity to return to Republic space, Sadow attempted to conquer several Republic worlds.

Ultimately, he failed, and was forced to land on the jungle moon called Yavin 4, where his Massassi crew and their descendants built towering temples.

ZIOST

Once the central world of the Sith Empire, Zioist is a terminally cold, dark planet. An immense fortress, it served as a meeting place for the Sith Lords, who became divided after Ludo Kressh refused to accept Naga Sadow as the Sith Empire's ruler. Sadow's attempts to invade the Republic led to the first conflicts between Sith Lords and Jedi. Over the next few millennia, many fallen Jedi studied the Sith Lords' dark-side teachings.

VALLEY OF THE DARK LORDS

On the planet Korriban in the Horuset system, the Valley of the Dark Lords is lined by huge, towering effigies and great temples that contain the mummified remains of many Sith Lords. These sinister tombs seethe with dark-side energy, and the spirits of long-dead Sith Lords can be channeled and focused by Force-sensitive beings to reveal the secrets of the Sith. To further his knowledge of the ancient Sith, the necropolis became a frequent destination for the Galactic Empire's Sith Lord ruler, Emperor Palpatine.

THOUGHT BOMB

By employing a Sith skill, adepts can extract the Force and bind it into a shape primed for an explosion that will destroy everything in its path. Because of the suicidal aspect of this "thought bomb," most Sith are reluctant to use it. At the Battle of Ruusan, Lord Kaan and his Brotherhood of Darkness tried to create a bomb that would kill only Jedi, but the life-energy of Jedi and Sith alike were drained into the form of a dark ovoid.

On Ruusan, Sith Lord Githany was destroyed by Kaan's bomb.

SITH POWERS

Although the Jedi and Sith have similar Force powers, only Sith Lords have ever demonstrated the ability to cast lethal energy charges. Called "Sith lightning," these charges cause excruciating pain and weaken life, and it is a challenge for even the most powerful Jedi Masters to deflect such bursts. Sith Lords also employ the Force to strangle and choke their opponents from a distance.

In a remarkable demonstration of his formidable dark-side abilities, the Jedi-turned-Sith Lord Count Dooku (below) directs his powers toward the Jedi Quinlan Vos (far left). Levitating his adversary and choking him in a telekinetic stranglehold, Dooku simultaneously relieves Vos of his lightsaber.

Dooku unleashes his lethal Sith lightning (right).

SITH HOLOCRON

Just as the Jedi use Holocrons as repositories of knowledge, the Sith keep their dark secrets locked within the recesses of their own Holocrons. Accessible only to a Dark Lord, Sith Holocrons house forgotten histories and lore that dates back over a hundred thousand years. The oldest existing Sith-Holocrons are adorned with incantation hieroglyphics and Sith inscriptions, and hold teachings of powerful evil.

The Jedi Odan-Urr discovered this pyramidal Sith Holocron on an abandoned Sith ship in orbit of Koros Major. It was later stolen from Odan-Urr by the Dark Jedi Exar Kun.

THE OLD REPUBLIC

A DEMOCRATIC GOVERNMENT, the Old Republic lasted for nearly 25,000 standard years, and united thousands of member worlds. Elected representatives from these worlds served as Senators in the Galactic Senate, creating and endorsing laws, pacts, and treaties that promoted peace and prosperity. When diplomacy failed, the Republic relied upon the Jedi Knights as negotiators and defenders, who drew their lightsabers only when absolutely necessary. The Jedi's most dangerous enemies were the evil Sith Lords, who embraced the dark side of the Force. Jedi Master Yoda witnessed most of the Republic's final millennia, observing at firsthand the decline of democracy as corruption and complacency began to erode the Republic's foundations. As the Republic unravelled, the Sith reemerged to exploit the chaos for their own ends.

An interplanetary warlord, Empress Teta ruled a system of worlds in 5000 B.B.Y. She helped the Jedi defeat the Sith Lord Naga Sadow, but her descendants—the cousins Satal Keto and Aleema—found a secret Sith society called the Krath.

GREAT SITH WAR

FIVE THOUSAND YEARS before the Battle of Yavin, an invasion of the Republic by the Sith Lord Naga Sadow was thwarted by the Jedi, who formed an allegiance with the armies of the warlord Empress Teta. A thousand years later, Jedi Knight Exar Kun, who has studied the ways of the Sith, surrenders his spirit to the dark side of the Force. Kun forms an allegiance with the Krath, a Sith-worshipping society headed by the descendants of Empress Teta. He also takes on the Jedi Ulic Qel-Droma as his apprentice, and in 3996 B.B.Y. they try to conquer Coruscant in a conflict that becomes known as the Great Sith War. Qel-Droma ultimately betrays Kun, whose spirit is entombed on the jungle moon of Yavin 4. Shortly after Kun's demise, his Sith successors nearly succeed in wiping out the entire Jedi Order (pp. 26–27). Three thousand years later, in 1000 B.B.Y., the Sith are all but destroyed in a series of battles on Ruusan.

ULIC QEL-DROMA

The fallen Jedi Ulic Qel-Droma plays a key role in the Great Sith War. When the Krath pose a threat to the Empress Teta system, Qel-Droma is assigned by the Jedi to infiltrate and destroy them. But Ulic is seduced by the Krath, and joins forces with the Sith Lord Exar Kun. Qel-Droma takes command of the Krath armies, leading them to many victories. But when he leads his troops to the planet Ossus, Ulic fights and kills his own brother, Cay. Defeated by the Jedi and overcome with remorse, Qel-Droma becomes a ruined exile.

ODAN-URR

The long-lived Jedi scholar Odan-Urr (above) is killed by Exar Kun when the Sith Lord steals an ancient Sith Holocron from the Jedi library on Ossus. Odan-Urr established the library in 5000 B.B.Y., shortly after he helped Empress Teta's army repel the Sith invasion of the planet Kirrek.

NOMI SUNRIDER

Using her Force-blocking technique to permanently rob Ulic Qel-Droma of his powers, the Jedi Nomi Sunrider is instrumental in Ulic's defeat on Ossus. Sunrider learned the ways of the Force after her Jedi husband, Andur, was slain by thugs, leaving her to defend their infant daughter with his lightsaber.

Honoring Andur's dying wish, Noma trained as a Jedi and became a renowned warrior and leader.

DARTH BANE

A thousand years after the Great Sith War, Darth Bane (below) studies the dark side under Lord Qordis. Bane believes he has the right to rule the Sith Lords. Over two millennia, he sets about fulfilling his destiny. After a Sith army perishes at the Battle of Ruusan, Bane realizes the dark side has been spread too thin among so many, and decrees the Sith will never number more than two at one time: a Master and an apprentice. He commits the Order to secrecy, and reinstates the tradition of bestowing the name Darth to each of his successors.

After surviving an assassination attempt by an arch-rival, Darth Bane pilots his starship, the Valcyn, to rejoin the Sith Lord army on the planet Ruusan.

DUEL IN THE SENATE

After Ulic Qel-Droma is captured by the Jedi in the early days of the Great Sith War, Exar Kun travels to Coruscant to stop his execution. In the Senate Hall, Kun fights his former Master, Vodo-Siosk Baas. Wielding his double-bladed saber, Kun is the victor, but Baas's spirit survives for millennia as a Holocron gatekeeper.

THE BATTLE OF RUUSAN

Three thousand years after Exar Kun's defeat, Lord Hoth leads the Jedi Knights against the Sith Lord Kaan's army, the Brotherhood of Darkness, on Ruusan. To defeat the Jedi, Kaan and his followers commit suicide, using a Force-weapon known as a "thought bomb," which consumes all Force-sensitive beings within its blast radius.

ASCENSION OF THE DARK LORDS

FOUR THOUSAND STANDARD years before the rise of the Galactic Empire, Darth Malak, the last surviving Sith apprentice of the Dark Lord Revan, unleashes an invincible Sith armada upon the galaxy. Countless Jedi Knights fall in battle, and many more of them swear allegiance to their new Sith Master. The brutal war all but destroys the Jedi Order, leaving the Republic on the verge of collapse. Five years into the conflict, the Sith believe they have eliminated or converted nearly all of the Jedi. The Sith Lord Darth Nihilus, determined to exterminate all threats to Sith supremacy, assigns his minions to wipe out the last of the Jedi.

SHADES OF HISTORY

Records are inconsistent concerning the tumultuous events of this devastating conflict. According to one record, the Sith Lord Darth Nihilus is aboard his flagship, the *Ravager*, when he is defeated by the handmaiden known as Brianna. Another record indicates that the Jedi Visas Marr is involved in killing Nihilus, while still other records show that Marr is in fact slain by the Sith Lord.

ARMORED COMBAT

A Jedi Knight wearing Baragwin Shadow Armor joins Bastila Shan in combating a fully armored Sith trooper. Shan is believed to have been instrumental in splitting up Darth Malak and Darth Revan, enabling the Jedi to take Revan captive.

Darth Nihilus, the Lord of Hunger, is a survivor of the Mandalorian Wars. His appetite for power consumes entire worlds.

Handmaiden, whose given name is Brianna, is an attendant to Jedi Master Atris. She has exceptional combat skills and abilities.

Darth Sion, the Lord of Pain, is the Sith apprentice to Darth Nihilus. His body parts are held together by sheer will and hatred.

Visas Marr is a Jedi. A Miraluka, she is effectively blind, but her Force powers enable her to see nearby entities, even through walls.

Bao-Dur is a Zabrak tech specialist whose homeworld was bombed out by Darth Malak. He aids the Jedi and has potential Force powers.

Atton "Jaq" Rand was once an elite pilot who hunted Jedi on behalf of the Sith. A veteran of the Mandalorian Wars, he is Force-sensitive.

THE MOON OF DXUN

The planet Onderon's largest moon, Dxun is where the Mandalorian Wars began in 3995 B.B.Y., in which the Mandalorians were defeated with heavy losses. A new Mandalorian leader gathers his remaining warriors on Dxun to help a Jedi attack Darth Nihilus's ship (left).

BOUNTY HUNTER VS SITH

A bounty hunter and scout based on the world of Nar Shaddaa, Mira (above left) learns to harness the Force. Equipped with a wrist launcher that can fire rockets, darts, and grenades, she fights a Sith Assassin (above right) at the Sith Academy on the planet Korriban.

TELOS

Heavily bombed during the war by a merciless Sith fleet, the planet Telos undergoes a massive restoration effort in an attempt to return the world to its prior state. The enormous undertaking is coordinated by Ithorians, who have long been recognized as experts in the highly skilled work of planetary restoration. Jedi Master Atris runs a secret academy for the training of Jedi under Telos's northern polar ice cap.

**COUNT DOOKU**

A legendary lightsaber instructor, Count Dooku believes that the Republic has grown corrupt, and suspects the Jedi Council is more concerned with politics than justice.

KEEPERS OF THE PEACE

Nearly a millennia after the Battle of Ruusan, the Republic has developed into a vast, sprawling union of far-flung worlds. Many Jedi Knights rove through assigned regions of the galaxy as diplomat-warriors, empowered to support justice in the Republic as they see fit. Although Jedi do not use their powers to intimidate, their abilities can inspire fear as well as respect, and the mere presence of a Jedi negotiator is often enough to make opposing factions work hard to resolve their differences. Despite the historic reputation of the Jedi as peacekeepers, some beings—including the Jedi Master Count Dooku—wonder if the Order has

evolved into nothing more than a glorified security service to protect the interests of the Galactic Senate.

**THE STARK HYPERSPACE WAR**

Twelve years before the Battle of Naboo, the Stark Commercial Combine—an Outer Rim coalition of pirates and smugglers—openly defies the Neimoidian-run Trade Federation, and threatens to corner the market on bacta production. The Jedi are called upon to mediate negotiations between the Combine and the Federation, and Qui-Gon Jinn (center left) ends up saving the life of the Neimoidian leader, Nute Gunray (far left).

CLASH WITH MANDALORIANS

In 44 B.B.Y., Jedi Master Dooku is assigned to lead a team of Jedi Knights (below left) against the Mandalorians (top left) on the planet Galidraan. The devastating confrontation leaves many dead on both sides, including all but one Mandalorian warrior and more than half of the Jedi. Dooku never forgets the sole survivor, a man named Jango Fett, whose fighting skills are so impressive that he is capable of subduing several Jedi armed only with his bare hands.

**FALLEN JEDI**

After receiving a distress signal from the Jedi Mana Veridi, the Jedi Master Qui-Gon Jinn and his Padawan apprentice, Obi-Wan Kenobi, travel to the planet Kwannot. There, they are attacked by the Dark Woman's renegade pupil, Aurra Sing (below right), an assassin who delights in killing Jedi. Qui-Gon and Obi-Wan are too late to rescue Mana Veridi, and Aurra Sing vanishes, having added the fallen Jedi's weapon to her collection.

**MASTER SWORDSMAN**

Although Jedi are trained to resolve conflicts through peaceful negotiation and diplomacy, they are prepared to take physical action if necessary. Mace Windu is not only a senior member of the Jedi Council but one of the best lightsaber fighters in the Jedi Order. Of the seven forms of lightsaber combat, Mace is a Master of Form VII, an intense regimen that cuts dangerously close to the abilities of Sith-trained duelists.

During the Stark Hyperspace War, Quinlan Vos fought alongside his teacher, Jedi Master Tholme.

QUINLAN VOS & AAYLA SECURA

The search for a beast-trafficking felon brings Jedi Master Tholme and his apprentice, Quinlan Vos, to the Twi'lek homeworld Ryloth. At the home of clan leader Lon Secura, Quinlan receives a psychic plea for help from a Force-sensitive Twi'lek infant. Investigating the distress call, Vos (far right) finds Lon Secura's niece, Aayla (near right) about to be attacked by a murderous wampa (below right). Quinlan saves Aayla, and Tholme succeeds in identifying the felon. Aayla returns with Vos and his Master to the Jedi Temple on Coruscant, where she trains to become a Jedi Knight.

**LAST STAND ON ORD MANTELL**

Encountering two brutal Mantellian savrips on a derelict freighter with a slaughtered crew, Qui-Gon (above left) and Obi-Wan (above right) travel to Ord Mantell to find out why the freighter was carrying the creatures. A murder investigation ensues, and Obi-Wan discovers that there are far more deadly killers at large than the reptilian savrips.

A DEMOCRATIC REPUBLIC

OF THE MILLIONS of inhabited worlds in the galaxy, thousands are members of the Galactic Republic. The Republic's worlds are represented by Senators who serve their terms in the Galactic Senate on the capital world, Coruscant. The elected leader of the Republic is the Supreme Chancellor, who by law can serve no more than two four-year terms. Operating out of the Judicial Department under the office of the Supreme Chancellor, the Jedi High Council has overall decision-making powers regarding the Jedi and their role in Republic affairs. Although the Galactic Senate strives to maintain order through diplomacy and negotiation, and relies on the Jedi Order to enforce justice when all else fails, some Senators believe that the Republic needs a well-armed, official militia to defend Republic worlds against the growing threat of interplanetary piracy.

JEDI MASTER YODA

A senior member of the Jedi Council, Yoda's long career as a Jedi began approximately a century after Darth Bane sent the Sith Order into hiding. He has always advocated that Jedi training should begin at infancy, and scorns criticism that the Jedi are "baby snatchers." After training Ki-Adi-Mundi to Knighthood, Yoda retired from direct Master-Padawan coaching and became a staff instructor at the Jedi Temple, teaching the ways of the Force to young Jedi initiates.

JEDI TEMPLE

All Jedi activity in the galaxy is centered at the Jedi Temple on Coruscant. Its five towers are topped by powerful antennas to maintain contact with Jedi Knights on far-flung missions across the galaxy.

JEDI COUNCIL CHAMBER

Located atop the central spire of the Jedi Temple, the Council Chamber is the Jedi's most sacred place of contemplation. A ring of 12 equally-spaced chairs is reserved for each Jedi on the High Council. The chairs have built-in holoprojectors to broadcast images transmitted by absent Council members.

JEDI HIGH COUNCIL
Having proved themselves and their abilities in the service of peace and justice, the 12 members of the Jedi High Council contemplate the Force to serve the Republic. Most of its members are Jedi Masters, and some of them possess Force powers enhanced by unique genetic traits.

Along with Yoda, Mace Windu is a senior member of the Council.

The Quermian Yarael Poof is a master of Jedi mind tricks.

A Kel Dor, Plo Koon can control the environment to create fog or ice.

The naturally telepathic Ikotchi Saesee Tiin is a great starpilot.

Battle-scarred Even Piell embraces his heritage as a Lannik warrior.

The human Adi Gallia is well-regarded for her strong intuitive powers.

A Chalcetan, Depa Billaba is an authority on spiritual matters.

The Thissipiasian Oppo Rancisis is a cunning military strategist.

Not yet a Jedi Master, Ki-Adi-Mundi is the only Knight on the Council.

A formidable scholar, Yaddle trained Oppo Rancisis.

The Iridonian Zabrak Eeth Koth trained Tusken Jedi Sharad Hett.

MILITARIST SENATOR

One of the most vocal proponents for a Republic militia is Senator Ranulph Tarkin of the polluted factory planet Eriadu. Power-mad, Tarkin aspires to become the Republic's leader. Without the Senate's approval, he assembles a prototype Republic navy and army, then guides his flagship to attack Iaco Stark's pirate forces in the Troiken system. Tarkin's actions cost many lives, including his own, but his influential family manage to convince many that he lived and died a hero.

Ranulph Tarkin (right) perishes during the Stark Hyperspace War. His surviving relatives include the equally ambitious Willhuff Tarkin.

VALORUM AND PALPATINE

Supreme Chancellor Finis Valorum (near right) is the elected leader of the Senate. One of his oldest political allies is Senator Palpatine (far right) of Naboo. To relieve the Republic's fiscal debt and monitor the corrupt Trade Federation, Palpatine suggests that Valorum institute a tax on the free trade zones in the Mid and Outer Rims.

THE GALACTIC SENATE

The Supreme Chancellor's tall podium is at the center of the Great Rotunda in the Galactic Senate building. Lined with 1,024 Senate repulsorlift platforms, the Rotunda is where delegates from the Republic's member worlds meet to make decisions.

The Galactic Senate's entrance concourse is adorned by monumental statues that depict the Republic's Core World founders.

MASTER AND APPRENTICE

Previous Sith Lords bore Sith tattoos on their foreheads, but Darth Maul covered his entire body with the markings.

FOLLOWING THE EXAMPLE set by Darth Bane after the Battle of Ruusan, the Sith Lord Darth Sidious is served by a single apprentice, an almost unstoppable weapon named Darth Maul. A Force-sensitive Zabrak from the planet Iridonia, Maul might have been discovered by the Jedi if Sidious had not claimed him first. Maul's upbringing consisted of constant training to become stronger, faster, and smarter than any adversary could anticipate. Zabraks are renowned for their mental discipline, and have a natural ability to withstand physical suffering, and Sidious tested Maul's endurance to the very limits during his training. Unlike previous Sith apprentices, Maul has no ambition to overthrow his Master. The Zabrak warrior's existence is known only to Sidious, who waits for the moment when the Sith can rise against the Jedi and finally have their revenge.

SITH TRAINING

Following his Master's instructions, Darth Maul trains for the day he will be unleashed upon the Jedi. On Coruscant, Maul masters the lightsaber and practises martial arts and marksmanship, but his training also takes him to other worlds. On an Outer Rim world, he survives for a month against a legion of assassin droids. On the lommite-mining planet Dorvalia, he relishes the opportunity to use his double-bladed lightsaber against living opponents. But it is in a different duel, a test against his own Master, that Darth Maul opens himself up to the dark side and becomes a true Sith Lord.

CRAFTING WEAPONS

Darth Maul uses his Master's Sith Holocron to find schematics for devices and weapons—including his double-bladed lightsaber—that he builds for his own personal arsenal. Based on the weapon used by the Sith Lord Exar Kun, Maul's lightsaber is actually two single-bladed weapons that he has joined at the hilts. He is eager to test the Sith saber against his Jedi enemies.

CRUEL TEACHER

Darth Sidious treats Darth Maul as neither a friend nor an accomplice, but as a tool that will obey his every order. Although Maul grows ever more impatient for his first taste of Jedi blood, he knows better than to make any move without his Master's command.

Darth Sidious presents his apprentice with the Sith Infiltrator, an extensively modified star courier equipped with a powerful repulsor drive, exotic weapons, and a cloaking device.

ERADICATING THE OPPOSITION

Six months prior to the Battle of Naboo, Darth Sidious orders Darth Maul to strike at the heart of the galaxy-spanning criminal syndicate Black Sun, a potential hindrance to Sidious's plans. Traveling in his new Sith Infiltrator, Maul locates the base of Black Sun's leader, Alexi Garyn. But when he arrives, he is greeted by Black Sun's lieutenants, the Vigos, who believe they are more than a match for the Sith Lord. Maul slays them all.

DARK BODYGUARD

Garyn's personal protection is provided by Mighella, a highly trained bodyguard who is also a witch of Dathomir, or Nightsister. Like all Nightsisters, she is skilled in the use of the dark side of the Force. Mighella attempts to use an energized sword to stop Darth Maul, then surprises him with a burst of Force lightning.

A moment after Mighella realizes her opponent is a Sith Lord with far superior dark-side knowledge, she is felled by a lethal slash of Maul's lightsaber.

The Sith Lord slays Mighella, the Nightsister.

DO YOU KNOW WHAT I AM?

MISSION ACCOMPLISHED

A Force-sensitive child who dreamed of being a Jedi Knight, Alexi Garyn was too old for Jedi training, and chose the path that led to his becoming the head of Black Sun. Killed by Darth Maul, Garyn's death clears the way for Black Sun's future leader, Prince Xizor.

After crippling Black Sun, Darth Maul returns to Coruscant and prepares for his next mission.

BLOCKADE OF NABOO

As the Ambassador's ship approaches Naboo, Nute Gunray contacts the vessel to protest that the blockade is legal.

these "free" zones, the Neimoidians—fearing lost profits—became engaged in a scheme to control not only the trade routes but the planets themselves. Surrounding the planet Naboo with their battleships, the Neimoidians threaten to cut off all trade unless Queen Amidala, leader of the Naboo, endorses a treaty to allow the Neimoidians to occupy her world.

ATTACK OF THE DROIDS

Shortly after boarding Gunray's battleship, the Jedi are assaulted by blaster-wielding Trade Federation battle droids. Qui-Gon and Obi-Wan quickly dispatch their attackers, but are driven into hiding by deflector shield-equipped destroyer droids. Stealthily exploring the ship, the Jedi discover the Federation's intent to use a droid army to invade Naboo.

Hoping to alert the Naboo, Obi-Wan and Qui-Gon stow away in a Trade Federation landing craft. Arriving on Naboo, they meet exiled Gungan Jar Jar Binks.

OTOH GUNGA

Jar Jar guides the Jedi to the underwater city of Otoh Gunga. Made up of organically engineered hydrostatic bubbles, the city is home to the amphibious Gungan people. The city's ruler, Boss Nass, is persuaded to lend Qui-Gon and Obi-Wan a Gungan submarine to transport them to Theed City.

THE NEIMOIDIAN PLOT

Believing they can conquer Naboo faster than the Senate can intervene, the Neimoidians have not anticipated Supreme Chancellor Valorum's response—the despatch of two Ambassadors: Qui-Gon Jinn and Obi-Wan Kenobi. Cowardly beings, the Neimoidians contact Darth Sidious, their co-conspirator in the planning of the blockade. The Dark Lord tells the Neimodian Viceroy Nute Gunray (near left) to kill the Jedi and to invade Naboo, assuring Gunray that he has the power to make the invasion legal.

THEED RESCUE

Built on a high plateau where the River Solleu forks off into waterfalls, Theed City is the Naboo's cultural center. The largest building is the Royal Palace, home to Queen Amidala. Guided by Jar Jar, the Jedi's submarine emerges in the Solleu near the Palace. Rescuing the Queen and her protectors from Trade Federation custody, they escape in Amidala's starship.

AMIDALA'S ENTOURAGE

At 14 years old, Queen Amidala is not the youngest sovereign to rule Naboo's democratic monarchy, but she is among the most beloved in her planet's history. Her most trusted confidantes are her handmaidens, who accompany her everywhere. Trained for combat, these secret bodyguards are also prepared to impersonate Amidala if her life is threatened.

ESCAPE FROM NABOO

Fleeing the orbiting Trade Federation battleships, the sleek Royal Starship heads for Coruscant, where Amidala intends to plead for assistance for Naboo in the Senate. Equipped with deflector shields but no weapons, the handcrafted vessel is vulnerable to attack.

Escorted out of Otoh Gunga by Captain Tarpals, accident-prone Jar Jar Binks was banished after he destroyed Boss Nass's prized heyblubber submarine.

THE GUNGANS

Indigenous natives of Naboo, the Gungans are an intelligent species with a strong respect for nature, which is reflected in their use of natural energy and organic technology. The Gungans have a longstanding warrior tradition and are always prepared to defend themselves. Most Gungans believe the Naboo regard them as primitive beings, and are generally suspicious of humans.

HEROIC ASTROMECH

When enemy fire damages the Royal Starship's shield generator, astromech R2-D2 bypasses the power drive to restore the deflectors. Amidala expresses thanks to the droid for saving the lives of all on board.

Queen Amidala, using her birth name Padmé Naberrie, is in the adopted guise of one of her own handmaidens when she meets Anakin on Tatooine.

THE CHOSEN ONE?

ACCORDING TO ANCIENT Jedi prophecy, a life-form will be conceived by the midi-chlorians, charged with the destiny of bringing balance to the Force. Searching for a new hyperdrive in a parts-dealership on Tatooine, Qui-Gon Jinn meets a nine-year-old slave named Anakin Skywalker, who possesses powers not unlike those of a Jedi. After Anakin's mother, Shmi, confides that Anakin's conception occurred without a father, Qui-Gon conducts a blood test that confirms that Anakin's cells have the highest concentration of midi-chlorians ever recorded. Believing Anakin is the Chosen One, Qui-Gon decides to help liberate the boy.

BUILDING C-3PO

Anakin and his mother, Shmi, are owned by Watto, an unscrupulous Toydarian parts-dealer. While sorting through metal debris in a scrap heap, Anakin discovered the skeletal remains of an old Cybot Galactica protocol droid. He then secretly carried the parts back to the hovel he shares with his mother, to prevent Watto taking the valuable droid components for himself. Anakin successfully rebuilt the droid, which he named C-3PO, but did not have proper metal droid coverings to finish the job.

RIVAL RACER

In the Boonta Eve Podrace, Anakin faces Sebulba, a Dug from Malastare who employs dirty tricks to eliminate his competition. Although favored to win, the Dug loses control on the final lap and crashes. After the race, he readily agrees to buy Anakin's Podracer from Qui-Gon.

SAD FAREWELL

Qui-Gon's wager with Watto wins Anakin's freedom, but the prize money for the Boonta Eve Classic is not enough to liberate Shmi. Hoping Qui-Gon will help him become a Jedi, Anakin must leave his mother, but he vows to return to Tatooine and free her.

A RISKY GAMBLE

Streetwise, greedy, and immoral, Watto learned his haggling skills from Tatooine's scavenging Jawas. Addicted to gambling, he is confident that Sebulba will be the victor of the Boonta Eve Classic, but his greed costs him dearly. Six years after losing Anakin, he sells Shmi to a moisture farmer. After this, the Toydarian continues to trade, but no longer keeps slaves.

No stranger to gambling, Watto has won and lost a few small fortunes. He once bet against Sebulba in a Podrace, and actually came out ahead.

THE SITH REVEALED

After tracing Amidala's starship to Tatooine, Darth Sidious instructs Darth Maul to apprehend Queen Amidala and bring her back to Naboo to sign the Trade Federation's treaty. Darth Maul travels across space and finds his quarry, but Qui-Gon and Anakin arrive at the repaired starship in time for the Jedi Master to thwart Maul's ferocious assault. Leaving Maul fuming in the desert, the Jedi race away with their allies to Coruscant, where Qui-Gon informs a stunned Jedi Council of his conclusion: the lightsaber-wielding attacker is a Sith Lord.

After Anakin scrambles aboard the Royal Starship, Obi-Wan instructs the pilot Ric Olié to fly to Qui-Gon's rescue as the lone Jedi battles against the mysterious black-cloaked figure.

PODRACING

Anakin's Force-assisted intuition enables him to compete at Podracing, a high-speed sport usually limited to nimble aliens with quick reflexes. Using his extraordinary mechanical abilities, he secretly restored a crashed Podracer to fly in the Boonta Eve Classic race.

WAGER WITH WATTO

To obtain not only the hyperdrive he needs, but also Anakin's freedom, Qui-Gon makes a wager with Watto that Anakin will win the Podrace. To the Toydarian's disbelief, Anakin's amazing victory costs him his best slave, the hyperdrive, and a fortune in hard cash.

JABBA THE HUTT

Born Jabba Desilijic Tiure, but better known as Jabba the Hutt, this corpulent gangster controls a criminal empire that traverses the Outer Rim Territories. With enterprises that include smuggling, spice dealing, slave trading, gambling, assassination, and piracy, Jabba firmly believes that too much of a good thing is never, ever enough. On Tatooine, he presides over the Podraces with an almost regal demeanor, but in fact cares nothing for the sport except for the revenues generated by his gambling dens.

Aided by his Twi'lek major-domo Bib Fortuna, Jabba the Hutt will remain Tatooine's reigning crimelord for many years to come.

THE COUNCIL'S DECISION

Presenting Anakin to the Jedi Council, Qui-Gon asserts his belief that the boy is the Chosen One. As most Jedi begin their training in infancy, the Council are uncertain about the wisdom of training the boy. Tested by the Jedi Masters, Anakin demonstrates great ability with the Force, but he is deemed too old and filled with anger. Qui-Gon protests the decision, but the Council refuses to allow him to train Anakin. However, they do permit the boy to remain in Qui-Gon's charge for the time being.

BATTLE OF NABOO

WHEN AMIDALA'S STARSHIP returns to Naboo, the only remnant of the Trade Federation's orbital blockade is a single Droid Control Ship, which coordinates the actions of every Federation droid on the planet. The droid army has seized Theed and driven the Gungans out of Otoh Gunga. Joining forces with the Naboo, the Gungans amass an army in the swamps outside the city. While most of the battle droids are deployed to confront the Gungans, the Naboo infiltrate Amidala's heavily guarded palace and hangar, taking weapons and starfighters into battle. The arrival of Darth Maul, instructed by Darth Sidious to kill Amidala and her Jedi protectors, poses an even greater threat. Confronting Qui-Gon and Obi-Wan, a duel ensues that leads the Sith Lord and the Jedi deep into the Theed power generator complex.

DEVASTATING VOTE

In the Senate, Chancellor Finis Valorum (center left) asks Amidala if she will allow a commission to investigate her accusations against the Neimoidians. Unfortunately, Senator Palpatine has convinced Amidala that Valorum is an ineffective leader, and she moves for a "vote of no confidence" that leads to the election of a new Chancellor.

A NEW ALLIANCE

On her return to Naboo, Amidala is accompanied by Qui-Gon Jinn, Obi-Wan Kenobi, Jar Jar Binks, and Anakin. After finding Otoh Gunga abandoned, Jar Jar guides the Jedi, Anakin, and Amidala's retinue to the Gungan

sacred place where Boss Nass and the Gungans are in hiding. Boss Nass does not welcome the group because he suspects they are somehow responsible for the droid invasion. But when Padmé steps forward to reveal herself as the true Queen and appeals for help, Boss Nass realizes that the Naboo are his strongest allies.

GUNGANS VS DROIDS

Consisting mainly of part-time soldiers, the Gungan Grand Army convenes in the swamps before heading to the Great Grass Plains, where they plan to draw the battle droids away from Theed. Kaadu-mounted cavalries lead the troops, and giant fambaas carry powerful energy shield generators to protect the Gungans from aerial bombardment. The shields hold up against the enemy lasers, but the droids are able to step through the energized barrier and confront the Gungans.

Lacking independent thought processors, battle droids carry out their orders without question.

Despite their combined training and experience, the Jedi are not prepared for the ruthless fighting techniques employed by Darth Maul.

ANAKIN JOINS THE FIGHT

Instructed by Qui-Gon to hide, Anakin takes cover in a Naboo starfighter. Its autopilot engages, and he is whisked straight to the space battle. With the flight controls on manual, Anakin accidentally penetrates the Droid Control Ship and fires torpedoes into its reactor room, escaping as the vessel explodes. With the Control Ship gone, all the battle droids stop fighting.

Anakin's dreams come true when he pilots a starship for the first time.

CHANCELLOR PALPATINE

Newly elected as Chancellor, Palpatine arrives at Naboo in time for the victory celebration. Meeting Anakin, he promises to watch the boy's career with great interest. Although Amidala has survived, Darth Sidious's greater plans are still in motion, but the Sith Lord will require a new apprentice to replace Darth Maul.

Obi-Wan can only watch as Darth Maul delivers a killing blow to Qui-Gon.

DUEL OF THE FATES

When Qui-Gon is briefly separated from Obi-Wan by an energized laser barrier, Darth Maul uses his superior Sith fighting skills to kill the Jedi Master. Atop the core tunnel of the power generator, Obi-Wan lashes out at the Sith Lord but loses his grip on his lightsaber. As Maul prepares to strike, Obi-Wan uses the Force to summon his fallen Master's lightsaber, and sweeps the ignited blade through the Sith Lord's torso.

A LAST REQUEST

Mortally wounded, Qui-Gon uses his last breath to ensure Anakin will become a Jedi. Inheriting something of his Master's defiant nature, Obi-Wan later informs Yoda he will honor Qui-Gon's request, with or without the Jedi Council's approval. Despite Yoda's reservations, the Council agrees to let Anakin become Obi-Wan's apprentice.

THE DECAYING REPUBLIC

PORTRAIT OF A JEDI
Memorialized by sculpture in the Jedi Archives, Dooku is one of only 20 Jedi who have renounced the Order.

CLONE TEMPLATE

Around the same time as the Battle of Naboo, Count Dooku begins his search for the perfect soldier to serve as a template for a genetically modified clone army. Dooku pits the galaxy's most dangerous mercenaries against each other, and the eventual victor is Jango Fett, the last of the Mandalorians.

On one of the moons of Bogden, Dooku—presenting himself as Lord Tyrannus—meets Fett, who agrees to become the prime clone.

STALKING AURRA SING

When bounty hunter Aurra Sing (far left) attempts to assassinate her former teacher, the Dark Woman, she is intercepted by a team of Jedi that includes the Tusken A'Sharad Hett (near left), who aims to bring her in for the murder of his father, Sharad. But when the Jedi duels with Sing, he realizes he wants to make her suffer. Sing escapes, leaving A'Sharad to question his role in the Order.

Sing slayed Sharad Hett (above) on Tatooine.

SCATTERED FORCES

Traditionally, the Jedi Council seldom leaves the Jedi Temple, but increased unrest throughout the galaxy prompts several Council members to travel far from Coruscant. In one incident, six members—including (below, left to right) Adi Gallia, Mace Windu, and Ki-Adi-Mundi—travel to Malastare to mediate peace negotiations between warring factions on Lannik, but the negotiations end after the first disastrous meeting. Adi Gallia and Ki-Adi-Mundi also participate in the hunt for Aurra Sing. During this period, Ki is often accompanied by his Tusken Padawan, A'Sharad Hett (far right).

BATTLE ON KINTAN

Dooku is fermenting unrest throughout the galaxy. On Ryloth, he orchestrates a kidnapping in an attempt to make Ryloth break from the Republic. A Twi'lek clan leader's young son is under the protection of Jedi Master Tholme when both are abducted by a group of fanatical Nikto assassins called the Morgukai. Quinlan Vos (above, top right) and Aayla Secura track the Morgukai to their homeworld, Kintan, and rescue Tholme and the boy.

LOST LIGHTSABER

In the years following the Battle of Naboo, Anakin Skywalker becomes a promising Padawan under Obi-Wan Kenobi's tutelage. Skywalker is powerful with the Force, but he is not always mindful. After he and Obi-Wan are assigned to meet with representatives of a world where thievery is regarded as a social skill, Anakin realizes that his lightsaber is missing. Without informing his Master of his loss, he attempts to find the weapon on his own.

Failing, he confronts Obi-Wan, who was not only aware of his Padawan's predicament but has already managed to recover Anakin's lightsaber.

Obi-Wan returns Anakin's Jedi weapon.

RISE OF THE SEPARATISTS

A NEW APPRENTICE

Following the death of Darth Maul, Darth Sidious seeks out the veteran Jedi Master and political idealist Count Dooku, who believes that the Jedi should no longer serve the corrupt Republic. With Darth Sidious, Dooku sees an opportunity to achieve galactic order. After the Battle of Naboo, Dooku resigns from the Jedi Order and joins forces with Darth Sidious, who renames him Darth Tyrannus.

NUTE GUNRAY

After the Trade Federation lost the Battle of Naboo, Nute Gunray was left facing charges of war crimes. But following four trials in the Supreme Court, the Trade Federation is ordered only to limit its droid armies, and Gunray retains his position as Commanding Viceroy. While influential Senators dismiss allegations of a corrupt Supreme Court, Gunray hopes for revenge against the bane of his existence: Senator Padmé Amidala. Gunray agrees to join the Separatist movement on the condition that Count Dooku will arrange to have Padmé assassinated.

SAN HILL

Based on the planet Muunilinst, the InterGalactic Banking Clan helps control the interplanetary flow of vast amounts of credits, dataries, and other forms of currency. The Clan is headed by San Hill, a Muun who views everything in monetary terms, and who knows that war can be good for business. He agrees to join Dooku's cause in a non-exclusive arrangement, allowing the Clan to profit from arms sales to both the Separatists and the Republic.

EIGHT YEARS AFTER Supreme Chancellor Palpatine's election, the elusive Count Dooku surfaces on Raxus Prime, a world strong with anti-Republic sentiment. Dooku gains support for his demands of political reform, but, knowing that the Senate's bureaucracy will deter any reform efforts, he soon shifts his goals toward political independence. As more and more worlds enlist in Dooku's so-called Separatist movement, the former Jedi begins to court the galaxy's most powerful and influential commercial factions, including the heads of the Trade Federation, the InterGalactic Banking Clan, the Commerce Guild, and the Techno Union. He promises these greedy organizations unyielding devotion to the principles of free trade and capitalism, on the condition that they join forces with him to help equip and empower the Separatist cause. Within two years, several thousand solar systems have joined Dooku, and the emerging Confederacy of Independent Systems threatens to end the fragile, millennia-old unity of the Galactic Republic.

SHU MAI

A Gossam of the planet Castell, Shu Mai is Presidente of the Commerce Guild, which represents many businesses involved in the acquisition, refinement, and production of raw materials. Unable to resist the lure of a profitable venture, she secretly commits the Commerce Guild to the Confederacy.

PASSEL ARGENTE

Commanding the office of Alliance Magistrate for the Corporate Alliance, Passel Argente heads the galaxy's largest corporation, the negotiating body for all major commercial operations. Argente also serves as the Republic Senator of his homeworld, Koorivar, but uses strong ties to corporate interests to increase his own personal wealth. To maintain his status in the Senate, he initially denies any association with Dooku, but ultimately defies the Republic by joining the Separatist movement.

POGGLE THE LESSER

Archduke of Geonosis, Poggle the Lesser rules the Stalgasin hive colony, and controls all the other major Geonosian hives on his world. Geonosis is ringed by asteroids, which are mined for metals used to manufacture droids, vehicles, and weapons in the planet's enormous underground factories. It is rumored that Poggle's walking staff is made from the limb bones of an unfortunate political opponent.

YARAE POOF'S SACRIFICE

During this period, the Jedi faced the threat of General Khorda, who procures a Force-energized artifact with planet-killing power. Jedi Master Yarael Poof tracks him down on Coruscant. Meanwhile, the bounty hunters Jango Fett and Zam Wesell realize that they unwittingly helped Khorda obtain the artifact, and attempt to stop him from using it. However, the device can be defused only by a Jedi Master. Poof, mortally wounded by Khorda, deactivates it before he dies.

THE CLONE ARMY

AFTER FINISHING HER elected term as Queen of Naboo, Padmé Amidala continues to represent her world as a Senator. She opposes the Separatists' efforts to leave the Republic, but is also against the Loyalists who propose the creation of a Republic army. Having experienced the misery of war firsthand on Naboo, Amidala travels to Coruscant to discourage the Galactic Senate from voting on the Military Creation Act. Moments after her arrival, Padmé's starship explodes on the landing platform, killing several people, including her decoy, Cordé. Following this attempt on Senator Amidala's life, Chancellor Palpatine arranges for the Jedi Master Obi-Wan Kenobi and his apprentice, Anakin Skywalker, to protect Padmé.

Riding in an open-top airspeeder, Anakin and Obi-Wan pursue Zam Wesell's vehicle through the skies above Coruscant.

CHASING ZAM WESELL

Taking immediate action to catch the person who released the kouhuns into Padmé's quarters, Anakin liberates an airspeeder from a parking bay and joins Obi-Wan in pursuit of a green Koro-2 exodrive vehicle. The chase takes them through the Senatorial, financial, and industrial zones of a densely populated quadrant, and ends when they capture Zam Wesell, the Koro-2's Clawdite pilot, in an entertainment district. The Jedi attempt to interrogate Wesell, but before she can reveal the identity of the bounty hunter who hired her, she is killed by a toxic dart. The Jedi spot the armored figure who fired the deadly missile, but are unable to stop him.

MISSING PLANET

Having learned Kamino's approximate location from Dexter Jettster, Obi-Wan seeks more information from the Archives at the Jedi Temple. Much to his surprise, there are no records of Kamino or its star system, yet a scan of a holographic star map reveals that gravitational forces exist in the area of space that Dexter specified. Obi-Wan shows the star map to Yoda and a group of young Jedi pupils, who quickly conclude that the gravity indicates the planet is there, but that someone erased it from the archive memory.

DEXTER JETTSTER

When the Jedi Analysis Droids fail to recognize the dart that killed Zam Wesell, Obi-Wan turns to his old friend Dexter Jettster, the chief cook and proprietor of Dexter's Diner. A well-traveled Besalisk with an extremely retentive memory, Dexter instantly identifies the projectile as a saberdart from Kamino, a planet with cloning facilities.

FORBIDDEN LOVE

While Obi-Wan tracks down the bounty hunter, Anakin escorts Padmé back to Naboo and continues to serve as her protector. Although Jedi teachings forbid Anakin from having emotions that could cloud his judgment, and Padmé maintains her Senatorial responsibilities preclude love, they find themselves unable to suppress their true feelings.

ASSASSIN'S TARGET

In a second attempt on Padmé's life, Anakin stops two kouhuns—deadly arthropods—before they can reach Padmé as she sleeps in her quarters on Coruscant. Although the Jedi were assigned only to protect Padmé, Anakin is determined to apprehend the would-be assassin.

CLONE SOLDIERS

Arriving on the stormy world of Kamino, Obi-Wan is taken on a tour of Tipoca City's cloning facilities. Using growth-acceleration technology, the Kaminoans are able to produce fully developed human clones within 10 years. By the time of Kenobi's visit, 200,000 clones have matured, and another million are in production. The clones are physically identical to their genetic host, a bounty hunter named Jango Fett, but engineered to be more durable and completely obedient. As part of his payment, Fett requested a single, unaltered clone to raise as his son, naming him Boba. Kenobi visits Jango and his son in their quarters, and realizes that Fett is the man behind the assassination attempts on Coruscant.

Inside Tipoca City, the Kaminoan Tawni We directs Obi-Wan's gaze to embryonic clones contained within growth jars. The jars are in constant motion to simulate brain activity in the developing clones.

ORIGIN OF A BOUNTY HUNTER

On the colony world Concord Dawn, the young Jango Fett was orphaned when his family was killed by the ruthless Death Watch, a bloodthirsty splinter group of ex-Mandalorian warriors. Jango was rescued and adopted by the true Mandalorians, who maintained their millennia-old tradition as highly-paid soldiers. Fett eventually became the Mandalorians' leader and destroyed the Death Watch, but two years before the Battle of Naboo, a conflict with the Jedi left him as the sole-surviving Mandalorian warrior.

THE MYSTERY OF SIFO-DYAS

When he is introduced to Kaminoan Prime Minister Lama Su, Obi-Wan is surprised to learn that the Kaminoans anticipated a visit from a Jedi. According to Lama Su, the Jedi Master Sifo-Dyas commissioned a clone army for the Republic 10 years prior to Obi-Wan's arrival. This intrigues Obi-Wan, who recalls that Sifo-Dyas was killed almost a decade ago.

CLASH ON KAMINO

Having learned Fett was hired to be a genetic host by a man named Tyranus, Obi-Wan is determined to find out more about the army's origins and to discover who hired Jango to try to kill Padmé. Kenobi fails to stop Jango and Boba leaving Kamino, but secures a homing device on their ship, *Slave I*, that enables him to track them.

TRAGEDY ON TATOOINE

REUNION WITH WATTO

When Anakin meets Watto, the Toydarian is amazed to see the Jedi. He tells Anakin that he sold Shmi to a moisture farmer named Cliegg Lars, who freed her and married her, and directs him to the Lars homestead.

At the Lars family's moisture farm, Padmé and Anakin meet Owen Lars and his girlfriend, Beru. The son of Shmi's husband, Owen is technically Anakin's stepbrother.

TRACKING TUSKENS

From Cliegg Lars, Anakin learns that his mother was abducted by Tusken Raiders a month ago. A rescue effort resulted in the massacre of 26 farmers and the loss of Cliegg's right leg to a lethal trick wire. Anakin senses Shmi is still alive, and borrows Owen's speeder bike to search for her. Arriving upon a Jawa camp, Anakin exchanges a multitool and portable scanner for information from the Chief Jawa, who directs him eastward to a high plateau. From this vantage point, Anakin sights a Tusken camp in the valley below.

WHILE SERVING AS Padmé's protector on Naboo, Anakin has a series of nightmares about his mother, Shmi. In these horrific dreams, he sees and feels Shmi's agony as she is tortured by unknown assailants. Refusing to dismiss the visions as products of his imagination, he tells Padmé that he must travel to Tatooine and find his mother, who he has not seen since leaving the planet to join the Jedi Order 10 years previously. Anakin is determined to undertake this personal mission, even though it means disobeying his orders from the Jedi Council to protect Padmé from the threat of assassination. Rather than allowing Anakin to get into trouble with the Jedi Council, Padmé decides to accompany him to Tatooine, effectively remaining under his guard. Traveling from Naboo in Padmé's Nubian Yacht, they land in the spaceport of Tatooine's disreputable capital, Mos Espa. Heading into the city, they take a robotic rickshaw toward Anakin's old neighborhood to try to find Watto, his ex-master.

FINDING SHMI

Anakin infiltrates the Tusken Raiders' camp and locates his captive mother in a guarded hut. Suffering from terrible wounds, Shmi is astonished to see her son again. In terrible pain, she tells him that seeing him once more has made her complete. Anakin prepares to carry her out of the hut, but she dies in his arms.

VENGEFUL SON

After Shmi breathes her last, Anakin's anguish is replaced by an overwhelming, raging anger. Exiting the hut, he unleashes the full power of his fury upon Shmi's tormentors. Igniting his lightsaber, Anakin does not stop until the lethal blue blade of his Jedi weapon has cut through every Tusken in the camp, including the women and children.

"WHY COULDN'T I SAVE HER?"

After the massacre at the Tusken camp, Anakin returns to the Lars homestead with his mother's body. Confused and distraught, the young Padawan admits to Padmé how he was unable to stop himself from slaying the Tusken Raiders. Although Padmé forgives Anakin for acting upon his emotions, Anakin considers himself a failure; not for slaughtering the Tuskens, but because of his inability to stop his mother from dying.

THE MAKER RETURNS

Now covered with droid plating installed by Shmi, C-3PO is distressed by her death but relieved to be reunited with Anakin. When R2-D2 receives an emergency message from Obi-Wan, C-3PO joins Anakin, Padmé, and R2-D2 on a rescue mission.

A JEDI AMONG TUSKENS

Commonly known as Sand People, Tusken Raiders were named after their assaults on Fort Tusken, the first human settlement in Tatooine's northern sector. Former Jedi Knight Sharad Hett (below center) was one of the few humans ever to join this mysterious, nomadic race. Rising to clan leader, both Hett and his clan were killed when they became involved in Gardulla the Hutt's ill-fated attempt to overthrow Jabba's reign.

Ambushed by Gardulla, many of Hett's clan were killed in a bombardment.

Suspended in a force field, Obi-Wan rejects Dooku's offer to join the Separatists.

BATTLE OF GEONOSIS

AFTER TRACKING Jango Fett to Geonosis, Obi-Wan discovers that Nute Gunray is behind the assassination attempts on Padmé and that the Trade Federation is taking delivery of a Geonosian-manufactured droid army. He transmits this information to Anakin, who relays it to the Jedi Council, but Obi-Wan is captured. Interrogated by the manipulative Count Dooku, Obi-Wan

is told that a Sith Lord named Darth Sidious controls the Republic. Escorted to an arena, Obi-Wan learns that Anakin and Padmé—who traveled to Geonosis to rescue him—have also been captured and sentenced to death. On Coruscant, Jar Jar Binks—acting as the representative for Naboo in Padmé's absence—proposes the Senate gives emergency powers to the Supreme Chancellor, enabling Palpatine to summon the clone army from Kamino.

BLOOD SPORT
Dooku, Jango and Boba Fett, and thousands of Geonosian warriors watch as three gigantic creatures are released into the execution arena. Obi-Wan, Anakin, and Padmé are still fighting their monstrous opponents when Jedi reinforcements arrive.

NOWHERE TO RUN

Responding to Obi-Wan's relayed message, Mace Windu and 200 Jedi travel to Geonosis to rescue him and stop the Trade Federation from obtaining more droids. Jango Fett opens fire upon the Jedi, but Mace Windu retaliates and slays the bounty hunter. Boba Fett, Jango's cloned son, is orphaned as a result of Mace's action and must now rely on his own instincts to survive. Despite their powers and abilities, the Jedi are vastly outnumbered by the battle droids and Geonosian warriors, and many fall to the arena floor. As more droids pour into the arena, the surviving Jedi find themselves surrounded.

YODA LEADS THE CHARGE
While Mace Windu directs the Jedi to Geonosis, Yoda goes to Kamino to inspect the clone army. He finds the clones combat-ready and equipped with a fleet of starships and attack vehicles. Yoda and the clones travel to Geonosis, descending into battle in low-altitude gunships.

SECRET WEAPON

As the clone army moves closer to victory, the Separatists retreat. The Geonosian leader Poggle the Lesser gives Dooku the holographic designs for an ultimate weapon that the Count will deliver to his sinister Master on Coruscant.

Unable to defeat Yoda in combat, Count Dooku uses the Force to topple a crane that threatens to crush Obi-Wan and Anakin. As Yoda rescues his allies, Dooku flees in his Solar Sailer.

DUEL WITH DOOKU

Obi-Wan and Anakin trail Count Dooku to a secret hangar, where the former Jedi keeps his escape craft. Displaying an alarming degree of skill with the Force, Dooku casts dark-side lightning that sends Anakin crashing against a wall. He then injures Obi-Wan in a lightsaber duel, but Anakin recovers in time to prevent Dooku from killing his Master. However, Dooku proves to be the master swordsman when he cuts Anakin's right arm off at the elbow. Lying defenceless, the wounded Jedi are only saved by the fortuitous arrival of Yoda.

THE CLONE WARS BEGIN

Following the Battle of Geonosis, the newly formed Army of the Republic assembles on Coruscant. Huge *Acclamator*-class warships, with enough firepower to decimate entire cities, are loaded with thousands of clone troopers ready to wage war. Supreme Chancellor Palpatine vows the conflict will not end until the Separatists are defeated and democracy is restored to all Republic worlds.

SECRET WEDDING

Outfitted with a prosthetic mechno-hand to replace his lost arm, Anakin escorts Padmé back to her homeworld. Although Padmé still believes her commitment to her people is more important than her personal life, she surrenders to her feelings for Anakin. Hoping to prevent Anakin's expulsion from the Jedi Order, they marry in secret on the balcony of a villa in the Naboo Lake Country.

R2-D2 and C-3PO serve as witnesses at the marriage of Padmé and Anakin.

THE CLONE WARS

THE BATTLE OF GEONOSIS marked the first time in history that the Republic deployed an army, and it signalled the beginning of the Clone Wars. Although the Jedi and some Senators were concerned about the effectiveness of the untested soldiers and suspicious of their sudden availability, most Republic Loyalists were relieved to have a strong defense against the Separatists, and applauded Supreme Chancellor Palpatine's decision to utilize the clone troopers. The Clone Wars raged throughout the galaxy for over three standard years, with many interstellar battles between the Army of the Republic and the droid armies of the Confederacy of Independent Systems. Few representatives of the opposing factions lived to learn that the entire war was meticulously engineered by a Sith Lord.

BATTLES AND CAMPAIGNS

DURGE

A 2,000-year-old Gen'Dai bounty hunter, Durge has learned many fighting techniques over the ages, and also developed a bloodlust for killing Jedi. He first sparred with Obi-Wan Kenobi on Ohma-D'un, and was eventually bested by Kenobi on the planet Muunilinst.

FOLLOWING THE OUTBREAK of the Clone Wars, Supreme Chancellor Palpatine calls upon the Jedi to not only defend Republic worlds but also to attack the Separatist armies. The Senate approves a decision to allow the Jedi to become generals in command of the clone troops, but many Knights refuse to wage war in the name of the Republic and instead choose to abandon the Order. Despite their extensive combat training, some of the Jedi generals have difficulty adjusting to their roles as military leaders with scores of clone troopers under their command. Fortunately, the clones live up to the Kaminoans' promise to be immensely superior to droid soldiers, and help the Jedi win many decisive battles against the Separatist armies. While droids remain the primary militia for the Separatists, Count Dooku also recruits two living beings to serve as his lieutenants: the ancient bounty hunter Durge and Force-sensitive Asajj Ventress, both of whom are adept at killing Jedi.

CIVIL WAR ON JABIIM

When mineral resources are discovered beneath the mud-soaked surface of the remote Republic world of Jabiiim, the Confederacy of Independent Systems offers to establish trade with the Jabiiim colonists. As some colonists choose to remain loyal to the Republic, a civil war erupts, and Jedi generals and their clone troops attempt to end the conflict without losing the world to the Separatists. Many Jedi and Padawans perish during this disastrous mission, and Obi-Wan is believed to be killed in action. Moments before Anakin Skywalker leaves Jabiiim, he realizes he can use the Force to crush a man's windpipe.

BATTLE OF KAMINO

The Corporate Alliance convinces the Mon Calamari to strike the cloning facility on Kamino to end the Clone Wars. Mon Cal Commander Meraï is ambushed by the Jedi. His death is part of Darth Sidious's scheme to prolong the war, as it removes the advantage Meraï's abilities give to the Separatists.

GENOCIDE ON OHMA-D'UN

Shortly after the Battle of Naboo, Gungan colonists settled on Naboo's moon Ohma-D'un. Ten weeks after the Battle of Geonosis, Boss Nass loses contact with the colonists, and the Jedi are summoned to investigate. The Jedi find the Gungans dead, victims of a chemical weapon developed by the Confederacy. While Anakin races to stop a convoy of starships from releasing the same toxic gas in Naboo's atmosphere, Obi-Wan has his first encounter with Asajj Ventress and Durge. Months later, the threat of this particular weapon is nullified when Obi-Wan obtains the antidote from a secret chemical factory on the planet Queyta.

CONFLICT ON AARGONAR

Under the impression that Obi-Wan was killed on Jabiiim, the Jedi Council assign Anakin to travel to the desert world Aargonar with the Tusken Jedi Knight A'Sharad Hett, son of the famed Jedi Sharad Hett. After their mission is disrupted by an ion-charged sandstorm, a fatigued Anakin becomes delusional and cannot resist his desire to attack Hett. A'Sharad subdues Anakin and learns why he hates Tuskens, but is unable to convince him that a true Jedi has no use for prejudice.

JEDI GENERALS

Like the other Jedi who agree to fight on behalf of the Republic during the Clone Wars, Anakin, Mace Windu, and Obi-Wan serve as generals. On a mission to Dantooine, Mace Windu single-handedly destroys a huge seismic tank to defeat an army of Federation droids. Obi-Wan survives Jabiiim but becomes obsessed with hunting Asajj Ventress. Anakin gains a reputation as a great starfighter and proves himself to be a courageous warrior, but a lightsaber duel with Ventress leaves him facially scarred.

On the moon Ruul in the Sriluur system, Ventress tests three renegade Jedi as potential recruits for the Separatists.

ASAJJ VENTRESS

Initially trained by the Jedi Ky Narec, Asajj Ventress turned to the dark side after Narec's murder. Years later, Ventress defeats many gladiators in a contest to impress Dooku, who gives her a pair of lightsabers and makes her a commander of the Separatist army.

THE DROID GENERAL

Born a Kaleesh, General Grievous led his people in a war against their savage planetary neighbors, the Huk, whose ore-rich worlds received support from the Republic. In a mysterious aircraft accident Grievous was mortally wounded. On the verge of death, and swearing vengeance on the Jedi for allying with the Huk, Grievous accepted the Banking Clan's offer of a new droid body and relief for his people. In return he became the leader of the Confederacy's droid armies, and received lightsaber instruction from Count Dooku.

KIDNAPPED!

HOPING TO DEFEAT the Trade Federation, Obi-Wan and Anakin attempt to capture Nute Gunray on Cato Neimoidia. Gunray eludes the Jedi, but they manage to recover his hologram-transceiving mechano-chair. This device yields information that could lead to the apprehension of high-ranking Separatists and the location of Darth Sidious. Their find prompts Obi-Wan and Anakin to begin a hunt for Count Dooku, while Mace Windu leads a Coruscant-based team in search of Sidious. Unfortunately, the Jedi do not realize they have been manipulated by the Dark Lord, who has diverted their attention in order to carry out his most complicated scheme—the kidnapping of Supreme Chancellor Palpatine. The Sith assigns the abduction task to General Grievous, who remains unaware of the true motives behind Sidious's devious machinations.

REPUBLIC STARFIGHTERS

In the war against the Separatists, Obi-Wan and Anakin pilot Eta-2 *Actis* Interceptors (left and right) with retrofitted controls to accommodate their Force-assisted piloting abilities. Republic Army clone trooper pilots fly shield-equipped ARC-170 fighters (above) and V-wing fighters, and serve as trusted wingmen to their Jedi commanders.

JEDI FIGHTER ACE

During the Clone Wars, Anakin Skywalker gains a reputation as the best starpilot in the galaxy, and is recognized by Grievous as the "hero without fear." Despite his abilities, Anakin is haunted by the death of his mother, whom he was unable to protect. When he learns Padmé is pregnant, he has nightmares that she will die in childbirth.

THE SEARCH FOR PALPATINE

After failing to capture Count Dooku on the planet Tythe, Anakin and Obi-Wan learn of Supreme Chancellor Palpatine's kidnapping. They race back to Coruscant as the Separatist Droid Army attempts to flee with their captive, and engage an overwhelming number of droid starfighters in space combat. Aided by R2-D2, the two Jedi manage to land their fighters in General Grievous's starship. Leaving a trail of ruined battle droids behind them, they finally infiltrate the chamber that holds the captive Palpatine.

GRIEVOUS RETREATS

Prior to Palpatine's abduction, Kenobi and Skywalker defeated General Grievous when he attempted to invade the world of Belderone. Watching as the Jedi attacked his invasion fleet, Grievous vowed revenge. Obi-Wan and Anakin's arrival on his flagship, and the subsequent demise of Dooku, leads to a ferocious battle between the cyborg and his enemies. Hit by laserfire from a Republic warship, the flagship begins to fall out of orbit. Forced to relinquish Palpatine, Grievous flees in an escape pod and jettisons the remaining pods, leaving the Jedi to try to save the ship.

Grievous is unaware that the ship crash that led to his cybernetic reconstruction was caused by Dooku. The Count (above) used his powers to keep the unconscious General alive (right) as part of his plan to recruit Grievous to the Separatist cause.

THE GENERAL'S TROPHIES

Accompanied by his droid MagnaGuards, General Grievous has added many lightsabers to his collection since his first Jedi kills on Geonosis. Because so many Jedi perished in that battle, these particular murders were not initially attributed to Grievous.

CRASH-LANDING ON CORUSCANT

Emergency fireships race alongside the remains of Grievous's Trade Federation cruiser as it plummets toward the surface of Coruscant. Despite extensive damage to most of the ship's systems, Anakin wrestles with the controls to bring the vessel down safely on a landing platform located in the heart of Coruscant's busy industrial district.

POWER OF THE DARK SIDE

While some Jedi Generals defend worlds far from Coruscant, they attend Council meetings via holographic communication. The Masters are disturbed by Anakin's appointment as Palpatine's representative, but reluctantly allow it.

EVER SINCE THEIR first meeting, Chancellor Palpatine has made Anakin feel special and unique among the Jedi. But during the Clone Wars, Palpatine plants seeds of anxiety, encouraging Anakin to believe that the other Jedi are envious and fearful of his powers, and not altogether supportive of democracy. When a constitutional amendment allows the Chancellor's Office to take command of the Jedi Council, Palpatine draws Anakin closer into his confidence, asking him to accept a post as his personal representative on the Council. Meanwhile, Mace Windu and Yoda suspect that Palpatine might be under the control of the mysterious Sith Lord Darth Sidious. When the Council learns of Anakin's appointment, they privately agree that Palpatine's influence on Anakin is dangerous, but decide—against Obi-Wan's protests—to enlist Anakin to spy on the Chancellor.

A NIGHT AT THE OPERA

Invited to meet with Palpatine at the Galaxies Opera House, Anakin listens as the Chancellor states his belief that the Jedi Council is planning to overthrow the Republic. Although Obi-Wan has cautioned Anakin to be careful, Anakin finds himself torn between his loyalties to the Jedi and to Palpatine, and he wonders if the Council is indeed manipulating events. As Anakin has had recent nightmarish visions of Padmé dying, he is captivated when Palpatine tells him of The Tragedy of Darth Plagueis the Wise, the story of a Sith Lord who had the power to keep people safe from death.

LOYALIST COMMITTEE

In the wake of the many worlds that are abandoning the Republic to join the Separatists, the Galactic Senate is left with a majority of Senators who continue to support Chancellor Palpatine. However, a growing number of Senators are alarmed by Palpatine's numerous revisions to the Republic Constitution. Senator Mon Mothma of Chandrila, Padmé Amidala of Naboo, and Bail Organa of Alderaan found a secret alliance to seek a diplomatic solution to the war and an end to Palpatine's democracy-crushing amendments.

Palpatine uses Sith lightning to attack Mace Windu, but the Jedi Master uses his lightsaber to force the lethal energy bolts back upon the Sith Lord, deforming his features. Palpatine summons aid from Anakin, who betrays Mace Windu, disarming the Jedi and, unintentionally, allowing Palpatine to kill Windu.

SHOWDOWN ON CORUSCANT

Following General Grievous's death, a contingent of Jedi confront Palpatine to ensure his surrender of emergency powers. Palpatine surprises them by igniting his own lightsaber, quickly slaying all but Mace Windu, who learns too late that his opponent's greatest weapon is Anakin Skywalker.

A NEW NAME

After disposing of Mace Windu, Palpatine bequeaths a name to his new apprentice: Darth Vader. Vader's first assignment is to eliminate all the Jedi at the Temple. Vader believes his actions will restore order to the galaxy, and that he will gain the knowledge to keep Padmé safe forever.

SITH RITUALS

Chancellor Palpatine spent many years studying ancient Holocrons to learn the secrets of the Sith. The Holocrons enabled him to channel Sith spirits (right), who taught him how to harness dark-side energy and release lethal bolts of lightning. During the Clone Wars, Palpatine conducted Sith rituals on Coruscant that radiated unnerving ripples in the Force, which caused anxiety among most Jedi throughout the galaxy, but also served to increase Anakin Skywalker's hunger for power.

Riding on the dragonmount Boga, Obi-Wan pursues General Grievous's wheel bike through a sinkhole city on Utapau.

BATTLE ON UTAPAU

As Anakin comes to the realization that Palpatine is in fact the Sith Lord the Jedi are hunting, Obi-Wan leads his clone troops in an attack on Grievous's droid army on the planet Utapau. After a ferocious lightsaber duel and high-speed chase through the multilevel tunnels and plaza of Pau City, the battle ends on a secret landing platform, where the Jedi finally destroys Grievous using the cyborg's own blaster.

DEFENDING KASHYYYK

After the Separatists attack the Wookiee planet Kashyyyk, Yoda travels there to lead the defense. The Jedi Master's departure from Coruscant is also part of a plan to lure Darth Sidious into the open. Unfortunately, none of the Jedi have anticipated the Sith Lord's next move.

THE JEDI PURGE

ALTHOUGH SUPREME CHANCELLOR Palpatine vanquishes the four Jedi Masters who attempt to arrest him, and has assigned Anakin Skywalker the task of massacring those in the Jedi Temple, thousands of Jedi Generals remain scattered on distant worlds across the galaxy. Before any surviving Jedi can learn about Palpatine's actions on Coruscant, he activates a secret plan that he designed many years before to eliminate the entire Jedi Order. He also twists information to his own advantage by informing the Galactic Senate that the Jedi had intended to assassinate him in order to seize control of the Republic. By the time the Supreme Chancellor convinces most world leaders in the Senate that the Jedi are traitors, he has already succeeded in destroying nearly all of his most powerful adversaries, leaving no one to stop Palpatine from proclaiming himself Emperor of the galaxy.

Like many other doomed Jedi, a youngling realizes too late that Anakin's mission is not to help the besieged Jedi—but to exterminate them.

JEDI SLAYER

As Anakin is well-known among the Jedi, and no one but the Emperor is aware of his conversion to the Sith, he has no difficulty gaining entry to the Jedi Temple. Transformed into Sidious's agent of evil, Darth Vader, he cuts down every Jedi in his path, including many younglings. Leaving clone trooper squads to exterminate any Jedi who remain in the Temple, he visits Padmé to tell her that the Jedi have attempted to overthrow the Senate. Padmé listens with stunned disbelief as her beloved tells her that he has renounced the Jedi Order to help Palpatine save the Republic, and that he intends to end the war by completing an important mission on Mustafar.

UNEXPECTED BETRAYAL

As Order 66 is implemented across the galaxy, Jedi Generals such as Aayla Secura (left) are taken completely unaware when they suddenly become a target for their own troops' weapons.

ORDER 66

On Utapau, Clone Commander Cody receives a holographic transmission from Palpatine, who states, "It is time. Execute Order 66." An emergency protocol, Order 66 identifies all Jedi as traitors to the Republic that must be eliminated with extreme prejudice. The transmission is simultaneously beamed to clone commanders across the galaxy and, moments later, hundreds of Jedi are murdered by their own troops.

A NEW REGIME
On Coruscant, Palpatine addresses the Senate. He claims an assassination attempt by treacherous Jedi has left him disfigured; he then rallies the Senators to support a new regime, an Empire that he will rule for life. The majority of Senators respond with cheers and applause.

THE SURVIVORS
Both Yoda and Obi-Wan manage to escape the Jedi Purge, and ignore the subsequent transmission that summons all Jedi back to the Jedi Temple. Reunited on Bail Organa's starship, *Tantive IV*, Yoda and Obi-Wan agree that they must return to the Temple and disable the recall signal.

THE SEPARATISTS' FATE

While hiding on the volcanic planet Mustafar, the Separatist leaders receive a message from Darth Sidious, and are led to believe that the Clone Wars are over and peace has been achieved. They are about to shut down their droid armies, but are executed by Darth Vader when he arrives on the fiery world.

Following his Master's orders, Vader kills Shu Mai and Wat Tambor (above). The Sith Lord executes all of the Separatist leaders, leaving Nute Gunray for last.

BURNING TEMPLE

Tantive IV delivers Obi-Wan and Yoda to Coruscant, where they find many dead bodies in the ruins of the Jedi Temple. Stealthily evading clone troopers, Obi-Wan retrieves the Temple's security scans to see for himself which Jedi has turned. When the scans confirm the identity of the Sith Lord who slew the younglings, Yoda decides to visit the Emperor while Obi-Wan hunts down Darth Vader.

DUEL IN THE SENATE

Yoda finds the Emperor in the holding office at the Grand Convocation Chamber of the Galactic Senate. Palpatine uses both his lightsaber and Sith lightning to attack Yoda, who is ultimately forced to retreat. Although Yoda fails to destroy the Emperor, his survival ensures that he will live to train at least one more student in the ways of the Force.

DARK LORD REBORN

SEeking Darth Vader, Obi-Wan goes to Padmé's apartment on Coruscant. Although Padmé has been told that Kenobi may have been implicated in a Jedi rebellion, she is greatly relieved to see her old friend alive. But her joy turns to confusion when she realizes that Obi-Wan is searching for her husband, Anakin. She refuses to believe Kenobi's claim that the young Jedi murdered children at the Temple, and is unable to accept that the father of her unborn offspring could be capable of such an unforgivable, evil act. Shocked and upset, Padmé tells Kenobi to leave; shortly afterward, she travels with C-3PO to the planet Mustafar. She is unaware, however, that Obi-Wan has anticipated this move and is a stowaway on her starship. And so it is on Mustafar that Padmé discovers the grim truth about the man she loves, while Obi-Wan finds the hate-filled monster he must try to destroy.

CHOKEHOLD

When Padmé arrives on Mustafar, Darth Vader answers to the name Anakin, but his evasive, defiant behavior convinces Padmé that he is Anakin no more. Upon seeing Obi-Wan emerge from Padmé's starship, Vader suspects betrayal and uses the Force to choke his wife.

DUEL ON MUSTAFAR

Vader releases Padmé from his telekinetic deathgrip to engage Obi-Wan in a fierce duel. The combatants are so focused on each other's movements that neither notices the intrepid R2-D2 hauling Padmé's unconscious form back to her starship. The battle takes Vader and Obi-Wan through the main collection plant of the old lava mine, across platforms that stretch over riverbeds of molten rock. As every step becomes more perilous and Vader's attacks more ferocious, Obi-Wan realizes that he still cares for Anakin, and that the only way he can defeat his opponent is to let go of his feelings for his former friend. When Obi-Wan releases this emotional attachment, the battle turns for the Jedi.

A PROPHECY FULFILLED?

By slaying the Separatist leaders and crushing the Jedi Order, Vader believes he has restored peace and justice to the galaxy and so brought balance to the Force. In his eyes, he has fulfilled his destiny as the Chosen One. He will not stray from this viewpoint until the last day of his life, when he finally realizes that there is a power stronger than the dark side.

BURNING RAGE

Despite his fighting skills, Vader is defeated by Obi-Wan. With both legs and an arm severed, Vader lies helpless as red-hot lava burns his flesh and sears his lungs. But even as Vader writhes in agony, he believes his actions were justified and considers himself superior to the Jedi. Fueled by anger and hatred, Vader never relinquishes his embrace of the dark side.

Sensing a disturbance in the Force, the Emperor flies to Mustafar with clone troops. Obi-Wan leaves with Padmé and the droids as the Emperor arrives and locates Vader's smoldering, dismembered remains.

Conventional surgery is insufficient to save Vader, so an Ubrikkian DD-13 surgical droid is enlisted to connect robotic prosthetics and install life-support systems for the Sith Lord's ravaged body.

POLIS MASSA

Obi-Wan takes the injured Padmé to a medical facility on the isolated asteroid Polis Massa, where he meets with Yoda and Senator Bail Organa. A medical droid assists with the emergency delivery of Padmé's twins, a boy and a girl whom she names Luke and Leia. Tragically, Padmé does not survive.

EVIL RECONSTRUCTED

The Emperor's apprentice is taken to a Surgical Reconstruction Center on Coruscant. It takes days for the Emperor's medical droids to connect Vader's severed nerve endings to new robotic parts. The Sith Lord eventually awakens to find himself contained within an armored life-support suit. Until his dying day, Vader will be a living, walking vessel of darkness.

MORE MACHINE THAN MAN

After Darth Vader is resurrected as a cyborg, he asks for Padmé, and is told by the Emperor that he killed her in anger. Unaware of his Master's deceit, Vader is filled with fury, not because of his imagined role in Padmé's death, but because he feels cheated by her loss. In his incredible selfishness, Vader is completely consumed by the dark side of the Force, and his humanity becomes almost entirely irretrievable.

On the bridge of an Imperial Star Destroyer, Darth Vader and Emperor Palpatine meet with Governor Wilhuff Tarkin, who is directing the secret construction of what will eventually become the Empire's deadliest superweapon, the Death Star.

After Padmé's death, Yoda suggests her twins should be split up to prevent the Sith from finding them both. Bail Organa adopts Leia and takes her to Alderaan (far left), while Obi-Wan delivers Luke to Owen and Beru Lars, who agree to raise him on Tatooine (near left).

THE DARK TIMES

WITH UNPRECEDENTED SUPPORT from the Senate and the Jedi Order all but exterminated, the Sith at long last accomplished their revenge. But with worlds still waiting to be conquered, and his power yet to be consolidated, Emperor Palpatine relied heavily on his apprentice Darth Vader, and opened the previously restricted Deep Core region of the galaxy for exploration. To illustrate the enormous difference between his new Galactic Empire and the long-stagnant Republic, Palpatine programmed construction droids to tear down large portions of Coruscant's ancient Presidential Palace and had it reconstructed into his Imperial Palace. By the time most beings realized that the Republic's fire had been extinguished, the Empire's shadow had fallen over thousands of inhabited worlds.

EMPIRE OF EVIL

AS THE REPUBLIC is reorganized into the Galactic Empire, there are many who are grateful to Emperor Palpatine for ending decades of corruption in the Senate, and who believe that he will fulfill his vow to restore stability to the galaxy. Even as his opponents continue to vanish, few comprehend that the Emperor's New Order is based on tyranny, brutality, and hatred of nonhumans. Aliens are not only persecuted but enslaved to serve the Empire. Funds are diverted from social programs into a massive military buildup. By the time the Imperial subjects realize that they are kept in a state of constant fear in order to maintain "stability," Palpatine has the full support of his awesome Imperial Navy as well as the crime syndicate Black Sun, and has eliminated most of his adversaries.

At Palpatine's instruction, portions of the ancient Presidential Palace on Coruscant are torn down. The new Imperial Palace has open areas large enough to house a Victory-class Star Destroyer, and it is higher than any other structure on Coruscant.

THE EMPEROR

Acting without any legal, political, or financial restraints, Emperor Palpatine develops the largest military force in galactic history. Supervision of the Imperial Navy is later assigned to the Moffs—Imperial military commanders—and Palpatine thoroughly dedicates himself to the study of the dark side of the Force. As he strives to discover the secrets of eternal life, he also begins experimenting with cloning technology. Protected at all times by his red-cloaked Royal Guards, the Emperor seldom leaves his palace on Coruscant.

IMPERIAL SHUTTLES

Senar Fleet Systems' Lambda-class shuttle is almost exclusively used by the Empire. Hyperdrive, powerful laser cannons, and deflector shields allow it to traverse the galaxy without an escort. The Emperor's personal shuttle is also equipped with a cloaking device.

Wilhuff Tarkin becomes the first military leader to be promoted to Grand Moff, the highest rank in the Imperial Navy. The Emperor eventually grants him limited authority over Darth Vader.

Following the death of Alexi Garryn, Prince Xizor rises through Black Sun's power structure to become the criminal syndicate's new leader. He later gains favor with the Emperor.

Discovered and raised by Palpatine, Force-sensitive Mara Jade is one of her Master's elite agents and assassins. Her skills earn her the title of "The Emperor's Hand."

Valuing loyalty to the Emperor above all else, Red Guards such as Kir Kanos undergo intensive training in order to protect the Emperor wherever he travels in the galaxy.

IMPERIAL DIGNITARIES

The Emperor personally selects dignitaries from hundreds of different worlds to serve as his advisors. Each dignitary is assigned to gather information about a rival dignitary's home system, which discourages them from forming secret alliances. To keep all of them paranoid and politically insecure, the Emperor never meets with more than 12 at a time, and dotes on a select few. When the Emperor desires new advisors for his circle, he kills the old ones at whim.

DARTH VADER

The Emperor's chief enforcer and most diabolical creation, Darth Vader is the embodiment of fear itself. While his Master is increasingly secluded within the Imperial Palace, Vader travels extensively, and beings across the galaxy come to regard his dark mask as the "face" of the Empire. Using the powers at his disposal to crush enemies, Vader also uses Imperial propaganda to recruit allies such as the Noghri of Honoghr, who become his private assassins.

JEDI KILLER

Yoda and Obi-Wan Kenobi are not the only survivors of the Jedi Purge. Numerous Jedi abandoned the Order rather than fight for the Republic in the Clone Wars, and many others went into hiding after Palpatine's implementation of Order 66. The Emperor assigns Darth Vader with the task of eliminating the remaining Jedi, and Vader kills many over the years. Acting on information from Mara Jade, Vader tracks down the Dark Woman in the Outer Rim. After a pitched battle, Vader claims another grim victory for his Master.

IMPERIAL MIGHT

HAVING ELIMINATED his most powerful opponents, Emperor Palpatine is free to throw all of his resources into a military buildup unlike any in recorded galactic history. Republic Assault Ships used during the Clone Wars are decommissioned and replaced by larger warships with more destructive firepower.

Human males—especially those prejudiced to aliens—are recruited from Military Academies to command the clone troops; those who refuse to voluntarily enlist are either drafted to serve alongside the clones as footsoldiers or eliminated. Specialized training leads to the creation of new military elites to enforce the Emperor's will, from the deadly efficiency of Imperial TIE fighter pilots to the resourcefulness of reconnaissance scout troopers. With this awesome fleet and a limitless number of stormtroopers at his disposal, Palpatine maintains control over former-Republic worlds and intimidates others into joining his ever-expanding

IMPERIAL ACADEMY

Requiring human officers to command and serve with the clone troops, Imperial leaders sought the best candidates at the Academy, a multi-world educational and training institution that had prepared students for the Exploration, Military, and Merchant services of the Old Republic. Under Palpatine's rule, the Academy becomes the Imperial Naval Academy, where students are fed propaganda to believe that all alien species are inferior beings. This elitist philosophy, and its practical application through the brutal assertion of Imperial rule, will sow the seeds of rebellion on thousands of worlds across the galaxy.

TROOP TRAINING

The most important military training center is on the planet Carida, a high-gravity world with varied terrain. The facility's main citadel is surrounded by a towering wall, and is accessible only to Imperial vehicles.

TIE-FIGHTER ACE

The son of Corellian farmers, Soontir Fel learned piloting in a skyhopper that was used to deliver parts and supplies. At the age of 18, he was appointed to the Caridan Military Academy, where he rivaled a fellow Corellian, Cadet Han Solo, in the flight simulators. He became a flight instructor at the Prefsbelt IV Naval Academy, and aspired to join Grand Moff Tarkin's elite bodyguard unit until he was disgraced by the mutiny of two of his graduates, Derek "Hobbie" Klivian and Biggs Darklighter. Redeemed after transforming the misfits of 181st Imperial Fighter Wing into an elite three-squadron group, Fel's skills will eventually earn him the title of Baron of the Empire.

After leaving his homeworld Corellia, Soontir Fel is indoctrinated at the Imperial Naval Academy on Carida.

Trained to target and destroy, **TIE fighter pilots** are committed to accomplishing their missions, even if it requires self-sacrifice.

Also called cold assault troopers, **snowtroopers** operate alongside AT-ATs to crush any opposition in frozen environments.

Trained to reconnoiter enemy territory, **scout troopers** are trained to survive long periods without supervision or support.

Selected from the best combat troopers, a single **AT-AT pilot** drives the walker while a second pilot acts as navigator and gunner.

IMPERIAL FORCES

Just as the clone troops served the Republic without question during the many conflicts of the Clone Wars, Imperial stormtroopers (left) are totally loyal to the Empire and cannot be bribed, seduced, or blackmailed into betraying the Emperor. Clad in white armor that is impervious to projectile weapons and blast shrapnel, they are the spearhead of Palpatine's ground forces.

STAR DESTROYERS

Carrying enough firepower to reduce an entire civilization to molten slag, an Imperial-class Star Destroyer is so formidable that the mere sight of it prompts submission. However, Star Destroyers have been evaded by faster, smaller vessels, including a certain battered Corellian freighter.

TIE FIGHTER

Built around twin ion engine (TIE) technology, the TIE fighter is fast, maneuverable, and deadly. With no shields or life-support systems, each ship—like its pilot—is expendable.

AT-AT WALKER

A mobile garrison bunker, the All Terrain Armored Transport (AT-AT) walker stands over 15-meters (49 feet) high and is fitted with heavy cannons and short-range blasters.

SPEEDER BIKE

Designed for high-speed infiltration, the repulsorlift speeder bike is used for scouting enemy territory and reconnaissance. It can reach speeds of up to 500 kph (311 mph).

THE DEATH STAR

CONCEIVED AS A moon-sized "expeditionary battle planetoid," the Empire's terrifying Death Star is one of the largest starships ever built. Measuring 120 kilometers (75 miles) in diameter, the spherical battle station's crew, officers, and support and maintenance personnel exceed a million beings, not including a security force of more than 25,000 stormtroopers and a support "crew" of more than 400,000 droids. Weaponry includes 10,000 turbolasers and heavy turbolasers, 2,500 laser cannons, 2,500 ion cannons, and 768 long-range tractor beams. Powered by an immense fusion reactor, the Death Star is capable of traveling through hyperspace, and its primary offensive weapon provides enough firepower to decimate an entire planet.

GRAND MOFF TARKIN

The mastermind behind the Death Star's construction is Grand Moff Wilhuff Tarkin, the former Lieutenant Governor of Eriadu, and the first Imperial leader to achieve the highest rank of Grand Moff. Tarkin believes that humans are superior to aliens, and that the most efficient way to cripple enemies is to destroy their hope. The Death Star exemplifies the Tarkin Doctrine: "Rule through fear of force rather than by force itself."

DESTROYER OF WORLDS

The Death Star's primary weapon is a planet-shattering superlaser. The superlaser is formed by eight combined beams, which are fired in alternate sequence to create a huge blast of energy with more firepower than half of the Imperial fleet. After firing, the superlaser requires a recharge period of 24 standard hours before it can be fired again, so Death Star gunners are trained to hit their target on the first shot.

Stationed at controls in the eight separate beam shafts, crews of gunners adjust and monitor the pulses of each energy beam that feeds into the centrally focused superlaser.

General Tagge is a senior Imperial Army tactician.

Admiral Motti is in charge of Death Star operations.

Grand Moff Tarkin is the Death Star's commander.

DEATH STAR OFFICERS

With the Imperial Senate under Palpatine's control, the military becomes the true government of the Empire. The Imperial Navy's key directive is to combat space piracy and transport military personnel, while the Imperial Army is charged with maintaining planetary order and removing threats to the Empire. Palpatine eventually overhauls and integrates the forces of the Army and Navy, which creates rivalries between such powerful individuals as General Tagge and Admiral Motti.

TURBOLASER DEFENSES

The Death Star's surface is defended by deadly turbolaser towers, which fire sustained, organized volleys. The turbolasers' poor recharge rate and slow rotation speed creates gaps in the station's defensive screen, but Imperial engineers are confident that the Death Star's state-of-the-art weapons systems can defeat any threat.

In addition to automated weapon systems, manned laser cannons are used to repel starfighter assaults.

IMPERIAL ENGINEER

The Death Star's chief engineer is Bevel Lemelisk, who previously helped the Geonosians produce their attack craft and also designed the Death Star's prototype, the first weapon ever to wield a superlaser. Despite his reputation, Lemelisk is hardly a perfectionist, but because of his connections to other high-ranking Imperial officials, few challenge his expertise. When it is eventually discovered that the Death Star has a major design flaw, the Emperor will hold Lemelisk responsible.

To safeguard his secret design plans from computer thieves, Bevel Lemelisk initially drew his prototype designs on reusable durasheet scrolls. The blueprints would fade away and disappear after a short period.

THE CIVIL WAR

FEW DARED TO oppose openly the might of the Galactic Empire, and those who did were silenced forever or enslaved. The rebellion against Palpatine's oppressive rule was initially fueled by anger and outrage over the Empire's many injustices and it began to take form when shared whispers between individuals such as Senators Bail Organa and Mon Mothma evolved into secret meetings. At these gatherings, plans were made to form a resistance organization named the Alliance to Restore the Republic, which became recognized by the Empire as the Rebel Alliance. Unfortunately, one of the Alliance's leaders, Princess Leia Organa of Alderaan, came under the scrutiny of Darth Vader, who had reason to believe that her so-called "mercy missions" to worlds devastated by Imperial weapons were a cover for treacherous Alliance subversions. When Vader's Imperial Star Destroyer pursued the Princess's consular ship, *Tantive IV*, to the Tatooine system, the Sith Lord found himself in orbit above his despised homeworld.

Bail Organa helps organize resistance to Palpatine's rule.

LEIA'S MISSION

UNDER PALPATINE'S REIGN, the Senate slowly dissolves, but one brave young Senator—Princess Leia Organa of Alderaan—dares to criticize the Emperor's policies. Using information she gains as a Senator and her diplomatic immunity, Leia secretly assists her father, Bail Organa, to expand the underground Rebel Alliance. While on a mercy mission to the planet Ralltiir, Leia learns the Empire is constructing an immense superweapon. After Rebel agents secure the plans for the weapon and transmit them to Leia, she travels to Tatooine to summon the help of Obi-Wan Kenobi.

BLOCKADE RUNNER

Equipped with a very fast sublight drive and an efficient hyperspace jump calculator, Corellian Corvettes such as Princess Leia's consular ship, *Tantive IV*, are the choice vessel for evading Imperial ships, leading some Imperials to refer to them as "Rebel blockade runners." Although *Tantive IV* has lived up to its reputation on many occasions, the ship fails to outrun the Star Destroyer *Devastator* over Tatooine and is drawn into its hangar.

DARK ENCOUNTER

On her first visit to Coruscant, Leia attends a reception at the Imperial Palace and meets the Emperor and Darth Vader. Despite their powers, the Sith Lords do not sense anything unusual about Leia, who is unaware of her true heritage. Disturbed by the encounter, Leia becomes a Senator, determined to fight for fairness and justice.

ENTER THE DARK LORD

After *Tantive IV* is secured, Darth Vader boards the ship to search for the stolen Death Star plans. As he orbits the world that was once his home, long-suppressed memories fill him with silent rage.

SECRET MESSAGE

Realizing she cannot escape, Leia decides to entrust the Death Star plans to R2-D2, dictating a message to Obi-Wan Kenobi that the astromech records. Moments later, Leia is captured by stormtroopers, who fail to notice R2-D2 heading for an escape pod.

KYLE KATARN

A special agent for the Alliance, Kyle Katarn infiltrates a top-secret Imperial complex on the planet Danuta to steal technical readouts for the Death Star, then transmits the plans to Princess Leia's ship. In the years that follow, Katarn wins many battles against the Empire, and discovers that he is Force-sensitive.

JEWEL OF THE GALAXY

With its clear blue skies and snow-topped mountains, Princess Leia's homeworld of Alderaan is renowned throughout the galaxy for its natural beauty. Ruled by the democratic Viceroy and First Chairman Bail Organa, the planet has been a long-established centerpoint in galactic politics, exploration, and culture for many millennia. Alderaanian exploration vessels plied many of the most important trade routes in the galaxy. Colonists from Alderaan also traveled far and wide, settling many scattered worlds. The planet has no weapons or military force, but this was not always the case.

REBEL PRINCESS

The youngest member of the Imperial Senate, Princess Leia Organa uses all her resources to help the Rebel Alliance. She has trained in the political arts and military discipline, and is an expert shot with a blaster.

LEIA'S DENIAL

After stormtroopers deliver her to Vader, Leia denies any knowledge of the transmissions beamed to her ship by Rebel spies, and insists she was on a diplomatic mission to Alderaan. Vader orders her to be taken away. He then instructs an aide to send a distress signal from *Tantive IV*, in order to dupe the Senate into believing the crew were killed by unknown forces instead of Imperial troops.

ESCAPE TO TATOOINE

C-3PO, also serving aboard Leia's ship, reluctantly follows R2-D2 into an escape pod. Together they jettison from the captured *Tantive IV*. Because the *Devastator's* scanners do not detect life-forms within the pod, it is assumed its ejection was triggered by a short-circuit. But when Darth Vader learns that the Death Star plans are no longer on board Leia's ship, he sends troops to search for the pod on Tatooine.

SON OF SKYWALKER

Like his father before him, Luke dreams of adventures that will take him far from his desert homeworld.

LUKE'S DESTINY

WHILE OBI-WAN SECRETLY monitors young Luke Skywalker, Owen and Beru Lars raise the boy as if he was their own son, a son who might take over the farm someday. But with each passing year, Luke becomes increasingly restless and eager for adventure.

On one occasion, Luke and his childhood friend Windy ride into the Jundland Wastes and get lost in a canyon. Fortunately, they are found by Obi-Wan, now using the name "Ben," who escorts them safely back to the Lars homestead. Although Luke expects his uncle to be grateful to Ben, he is baffled when Owen orders his rescuer off the farm and warns him not to come back. Years later, the purchase of an R2 unit and protocol droid from Jawas will lead to a fateful reunion with the old hermit.

While repairing a moisture vaporator, Luke sights bright glints in the sky. The view through his macrobinoculars confirms he is witnessing a space battle.

RESTLESS SPIRIT

Luke grows up believing both his parents are dead, and that his father had been a navigator on a spice freighter. He has no interest in moisture farming, and feels trapped by his uncle's efforts to keep him on the farm for "only one more season." With most of his friends gone, he wishes he could find a way to leave Tatooine, but fears he's fated to watch the same suns set for years to come.

LUKE'S GUARDIANS

To protect Luke from Vader, and to prevent him from following his father's path, Owen and Beru Lars shield him from any knowledge of his Jedi heritage. Although Owen would like Luke to focus on the farm, he doesn't want to hold him back—he is mainly concerned with ensuring Luke's safety.

After R2-D2 and C-3PO are captured by Jawas, they are sold to Luke's family. Owen Lars is more concerned with the imminent harvest than the past, and does not recognize C-3PO as the same protocol droid who once served Shmi Skywalker.

WORKSHOP REVELATIONS

Having had his memory wiped years before, C-3PO does not remember the Lars homestead or the name "Skywalker." While C-3PO takes an oil bath, Luke plays with a model of his grounded T-16 skyhopper. He is amazed when C-3PO admits that he and R2-D2 know of the Rebellion, and have been in several battles.

MYSTERIOUS MESSAGE

While Luke is cleaning R2-D2, the droid projects a fragment of the holo-recording meant for Obi-Wan Kenobi. Programmed not to reveal Leia's identity, C-3PO states only that she was an important passenger on their last voyage.

West of the Xelric Draw, Jawas vigilantly patrol the perimeter of their mountain fortress to prevent attacks by Sand People.

JAWA TRADERS

Natives of Tatooine, Jawas are rodentlike creatures who live and travel in clans. These mechanically-inclined scavengers can transform the most rusted piece of scrap into something useful, as evidenced by their conversion of abandoned ore-hauler vehicles into sandcrawlers. However, colonists are cautious of purchasing refurbished technology from Jawas, who do not always build items to last.

SEARCHING FOR R2-D2

To seek out Obi-Wan Kenobi, R2-D2 escapes from the Lars homestead after sunset. Instead of risking an encounter with Tusken Raiders at night, Luke and C-3PO wait until the next morning to begin their search. With the protocol droid at the controls of his landspeeder, Luke is free to scan the terrain for R2-D2's tracks.

BIGGS DARKLIGHTER

Luke's best friend on Tatooine is Biggs Darklighter, who is also a skilled pilot. Unlike Luke, Biggs was able to leave Tatooine and attend the prestigious Academy. After completing his training, Biggs revisits his homeworld and tells Luke that he's been assigned a commission as First Mate aboard the starship *Rand Ecliptic*. He also confides that he has made certain friends at the Academy, and that they plan to jump ship and join the Rebel Alliance.

Standing atop the roof of Tosche station, Luke tells his friends Fixer, Camie, and Biggs about the space battle he saw in Tatooine's orbit, but they are skeptical about his claims.

A JEDI IN EXILE

FOR TWO DECADES, Obi-Wan Kenobi lives alone amidst the wastes of Tatooine, serving as Luke Skywalker's secret guardian. Except for Owen and Beru Lars, no one on the planet knows he is a Jedi. However, accounts of his apparent abilities to roam without fear and communicate with beasts have earned him a reputation as a wizard, and even the Sand People keep their distance. Although his isolation has made him slightly eccentric, he does not feel lonely, as the Force is his great ally and constant companion. After learning how to merge his consciousness with the Force from the spirit of Qui-Gon Jinn, he becomes even more mindful of the present, and more hopeful for Luke's future.

THE SAND PEOPLE STRIKE

After Luke and C-3PO locate R2-D2, the wayward astromech informs them that several creatures are approaching from the southeast. Instead of leaving the area immediately, an intrigued Luke recklessly fetches his projectile rifle and uses his macrobinoculars to scan the surrounding canyon for Sand People—also known as Tusken Raiders. Moments later, Luke and C-3PO are ambushed by a group of Tuskens.

THE WIZARD EMERGES

Discreetly monitoring Luke's journey into the Jundland Wastes, Ben Kenobi uses his powers to rescue an unconscious Luke from the Tusken Raiders. When Luke informs Ben that R2-D2 is searching for Obi-Wan Kenobi, Ben reveals his true identity.

Damaged during the attack by the Sand People, C-3PO is assisted by Ben and Luke. Ben recognizes both C-3PO and R2-D2, but chooses to keep this information to himself.

BEN'S HOME

A remote dwelling abandoned by a frontier moisture farmer, Ben's house is a simple but homely abode. In his cellar workshop, he constructs mechanical items that he exchanges for goods from Jawa traders.

SLAUGHTERED JAWAS

On the way to Anchorhead, Luke's party encounters the wreck of the sandcrawler owned by the Jawas that sold R2-D2 and C-3PO to Owen Lars. The vehicle is surrounded by dead Jawas, and although it appears the Sand People carried out the attack, Ben observes evidence that Imperial stormtroopers are responsible. Realizing the Empire is hunting the droids, and fearing for his uncle and aunt's safety, Luke races home.

VICTIMS OF THE EMPIRE

Luke returns to the Lars homestead too late to save Owen and Beru. Seeing the smoldering remains of his aunt and uncle, his compliance to the Empire comes to an end—replaced by a strong resolve to do everything he can to help the Rebels. After rejoining Ben and the droids, Luke volunteers to help Ben reach Alderaan, and declares that he wants to become a Jedi, like his father before him.

RETURN TO DUTY

Inside Ben's house, R2-D2 fulfills his mission by delivering Princess Leia's holographic message to General Obi-Wan Kenobi. The recording explains that R2-D2 is carrying information vital to the Rebellion, and pleads for Kenobi to deliver the astromech to Leia's father, Bail Organa, on Alderaan. Ben knows he must act immediately and appeals to Luke for help. Because Luke feels more obligated to his uncle, he agrees only to take Ben as far as Anchorhead.

ANAKIN'S LIGHTSABER

"Your father wanted you to have this," Ben tells Luke as he gives him Anakin's lightsaber. In fact, Vader remains unaware of Luke's existence, but Ben thinks it best to protect Luke from the truth about his father.

KRAYT DRAGONS

To scare away the Tusken Raiders that attack Luke, Ben emulates the terrifying sound of a krayt dragon. Large carnivorous reptiles that live in Tatooine's mountainous areas and caves, krayt dragons have claws that can shred through durasteel, and are among the most fearsome creatures in the Outer Rim. Krayt dragon gizzards contain beautiful pearls, and because the dragons are so difficult to kill, a single pearl is worth a small fortune. Young Sand People hunt krayt dragons in an initiation rite to prove themselves as warriors.

**IMPERIAL ROAD BLOCK**

Upon entering Mos Eisley, Luke is stopped by stormtroopers. To Luke's amazement, Ben uses the Force to convince them that C-3PO and R2-D2 are not the droids they're looking for.

PASSAGE TO ALDERAAN

AFTER CREMATING THE remains of the murdered Jawas, Luke, Ben, and the droids spend the night at Bestine. They then proceed to Mos Eisley Spaceport, where they hope to find a pilot who will take them to Alderaan. Because Tatooine is so far from Imperial activity, Mos Eisley is a haven for smugglers, including the Corellian mercenary Han Solo. He agrees to deliver the group to Alderaan, but when Solo realizes an Imperial armada is trying to apprehend his passengers, he wonders if he should have negotiated a higher advance. While the *Millennium Falcon* travels through hyperspace to the Alderaan system, Ben instructs Luke how to use the Force to guide his lightsaber. When the ship drops out of hyperspace, her hull is hammered by rocky debris, and Solo realizes that Alderaan has been blown away.

SCUM AND VILLAINY

Inside the Mos Eisley Cantina, Ben meets Chewbacca, the Wookiee copilot of Han Solo's starship. Before Chewbacca can introduce Ben to his partner, Luke is accosted by two criminals, Dr. Evazan and Ponda Baba. Ben steps in and attempts to resolve the situation peacefully, but when the villains draw their blasters, he ignites his lightsaber and moves fast, disabling both attackers and leaving Ponda Baba minus one arm.

**HIRING HAN SOLO**

The captain of the *Millennium Falcon*, Han Solo openly boasts that his ship can outrun Imperial vessels. Luke bristles during the negotiations for Solo's fee to transport them to Alderaan, not knowing that Solo is as desperate for money as they are to leave Tatooine. On a recent smuggling run, Solo dumped a spice shipment before Imperials boarded his ship. Although he avoided arrest, he now owes Jabba the Hutt for the lost spice.

CANTINA BAND

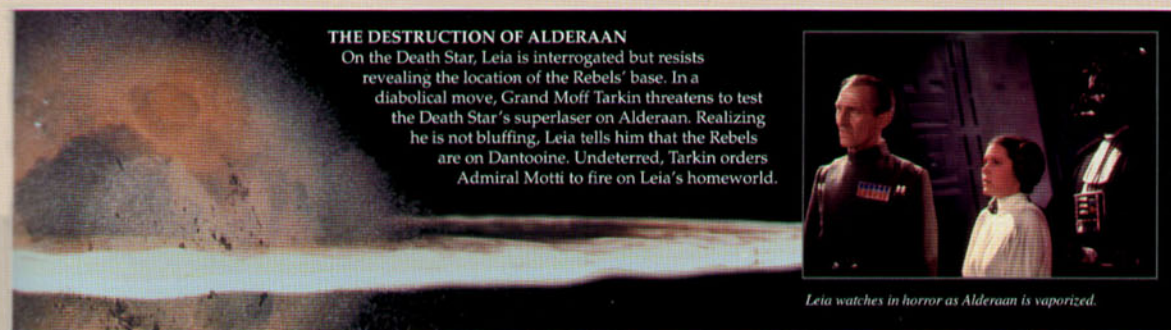

The Modal Nodes are a popular quintet of Bith musicians. Their lead player, Figrin D'an, is a master of the kloo horn and an expert gambler. After arriving on Tatooine, they were hired by Jabba the Hutt, but incurred his wrath by accepting an offer to perform at the ill-fated wedding of his nemesis, the Whiphid crime lord, Lady Valarian. Fortunately, they escaped the debacle, and found work at the Mos Eisley cantina.

**THE DESTRUCTION OF ALDERAAN**

On the Death Star, Leia is interrogated but resists revealing the location of the Rebels' base. In a diabolical move, Grand Moff Tarkin threatens to test the Death Star's superlaser on Alderaan. Realizing he is not bluffing, Leia tells him that the Rebels are on Dantooine. Undeterred, Tarkin orders Admiral Motti to fire on Leia's homeworld.

Leia watches in horror as Alderaan is vaporized.

**DISGRUNTLED HUTT**

After Greedo's demise, Jabba, Boba Fett, and several henchmen surround Solo's vessel. The Hutt agrees to wait for the owed money plus an additional percentage, but threatens to reinstate the bounty if Solo fails to deliver.

**GREEDO'S END**

While Chewbacca prepares the ship for launch, Solo finds himself at the wrong end of Greedo's blaster in the cantina. According to Greedo, Jabba has placed a bounty on Solo's head, which he hopes to claim. Failing to notice Solo drawing his own blaster, a fatal blaster bolt puts paid to the Rodian's plans.

FAST ESCAPE

Following Solo's instructions, Luke, Ben, and the droids find the *Millennium Falcon* in Docking Bay 94. Unfortunately, the wanted droids are sighted by a Kubaz spy named Garindan, who alerts his Imperial contacts. Stormtroopers respond quickly, but Solo and Chewbacca execute a hasty escape and launch the ship into space. Swiftly evading the Imperial blockade, the *Falcon* makes the jump to hyperspace. As they travel to Alderaan, Ben introduces Luke to the ways of the Force and begins his lightsaber training. Suddenly, Ben feels a major disturbance in the Force, which leads him to believe "something terrible has happened."

**"THAT'S NO MOON!"**

Ben's premonition is borne out when the ship emerges from hyperspace, only to find the rocky remnants of the destroyed Alderaan. Sighting a lone Imperial TIE fighter, Solo guides the *Falcon* after it until the TIE approaches what appears to be a small moon. But as they draw closer, Obi-Wan realizes they are heading straight for an immense space station. Solo attempts to reverse course, but the starship is captured by a tractor beam and drawn into the Death Star.

**BREAKOUT**

Disguised as stormtroopers, Luke and Han liberate Princess Leia from cell 2187, but become trapped within the detention block. Thinking fast, Leia blasts a hole in the block's corridor floor, allowing a garbage chute to serve as an escape route.

TRASH WOES

The garbage chute deposits Princess Leia and her would-be rescuers into a trash compactor, which collects all kinds of refuse for processing before it is dumped into space. Fitted with magnetically sealed walls that can withstand blaster fire, the compactor is also home to a large dianoga, which nearly drowns Luke. When two opposite walls begin to converge, Luke uses his comlink to summon help from C-3PO and R2-D2, who work fast to prevent their allies from being crushed to death.

"NOW, I AM THE MASTER"

AFTER THE *MILLENNIUM FALCON* is drawn into the Death Star, Darth Vader inspects the captured starship in the docking bay and is notified that its markings match the freighter that blasted out of Mos Eisley. An initial inspection finds no one on board, but the Imperials are unaware that Luke, Ben, Han, Chewbacca, and the droids have concealed themselves in the *Falcon*'s smuggling compartments. Knowing that their only chance of escape is to disable the tractor beam that locked onto the *Falcon*, Luke and his allies infiltrate the docking bay's control room, where R2-D2 accesses an Imperial

computer to provide Ben Kenobi with directions to the tractor beam generator. But when R2-D2 discovers that Princess Leia is a prisoner on the Death Star and scheduled to be terminated, Luke enlists the reluctant mercenaries for an impromptu rescue mission.

BEN'S MISSION

Although Luke wants to help Ben disable the tractor beam generator, Ben insists on going alone. Following the directions that R2-D2 retrieves from the Death Star's computer, he arrives at a power terminal that stands atop a 35-kilometer-tall generator tower. The wily Jedi makes adjustments to the terminal, causing a power loss that will allow the *Falcon* to escape.

**DIANOGA**

Native to the planet Vodran, dianoga are amphibious, omnivorous scavengers. Each dianoga has a single eyestalk that extends above water like a periscope, and seven tentacles that—if severed—will grow back. Dianoga enter starships by crawling into waste compartment tanks, but because they actually feed on and digest waste products, most vessel commanders allow them to remain in a ship's refuse system.

**PERILOUS CHASM**

Pursued by stormtroopers, Luke and Leia nearly plummet to their deaths when they flee into an air shaft. An extendible bridge allows pedestrians across, but Luke unintentionally destroys its controls. While Leia exchanges fire with the stormtroopers, Luke deploys a grappling hook, which allows them to swiftly swing across the chasm.

**THE DUELISTS**

Darth Vader senses his former Master's presence on the Death Star, and intercepts Kenobi. They duel with lightsabers, and Vader is confident that he will be the victor, asserting that the roles have reversed since their last fateful encounter on Mustafar—and that now, he is the master. As their battle brings them to the corridor outside the docking bay, the Sith Lord does his best to wear down the aged Jedi, and when Ben appears to surrender, Vader does not hesitate to strike. But he is surprised when the red blade of his Sith lightsaber connects only with his opponent's empty robes, leaving him to wonder if Obi-Wan has somehow become even more powerful.

**A NARROW ESCAPE**

The final moments of Vader and Kenobi's duel are observed by Luke and his companions as they enter the docking bay. In a diversionary move, Ben allows Vader to cut him down. Luke is devastated by Obi-Wan's sacrifice, but when he hears the Jedi's disembodied voice urging him to run, he escapes with the Princess, Solo, Chewbacca, and the droids. Four TIE fighters pursue and attack the *Falcon*, but Solo and Luke man the ship's quad laser cannons and destroy the enemy ships.

THE BATTLE OF YAVIN

THE GREAT TEMPLE

On arrival, Rebel escorts take Leia and her allies to the ancient Massassi pyramid now known as the Great Temple, which Alliance engineers have made fit for habitation. During the Clone Wars, Jedi Knight Anakin Skywalker dueling with the deadly, Force-sensitive Separatist commander Asajj Ventress at this same location.

BATTLE PLAN

The Death Star data stored in R2-D2 yields the discovery of an unshielded reactor shaft that—if properly targeted—could lead to the superweapon's destruction. With little time to spare, General Dodonna prepares a plan of attack that requires Rebel starpilots to fly one-man fighters to the Death Star. After maneuvering into the station's equatorial trench and speeding to their target, the pilots will fire proton torpedoes into the reactor shaft's two-meter wide exhaust port. Although several pilots question the possibility of hitting such a small target, they know that this is the only way to defeat the Imperials.

In a briefing room, Rebel starfighter pilots view the technical readouts of the Death Star as General Dodonna outlines their mission.

ALLIANCE STARFIGHTERS

At the Battle of Yavin, pilots of older Y-wing fighters fly as Gold Squadron, while pilots of new, recently acquired X-wings fly as Red Squadron. Some of the Rebel pilots, such as Biggs Darklighter, are highly trained Imperial defectors, while others, like Luke Skywalker, have relatively limited piloting experience. Of the 30 Rebel pilots who fight for the Alliance at the Battle of Yavin, only three will survive the assault on the Death Star.

Briefly reunited with Luke on Yavin 4, Biggs Darklighter is killed during the battle by fire from Darth Vader's fighter.

FLEEING THE DEATH STAR with the technical readouts of the battle station intact in R2-D2's memory banks, Princess Leia and her new allies head for Yavin 4, the secret base of the Rebel Alliance. A small moon orbiting the gas giant Yavin, the jungle world of Yavin 4 is the ideal location for the Alliance's headquarters. Since the departure of the Massassi warrior race many years previously, Yavin 4 has no sentient natives to dominate or mineral wealth to exploit, and so the moon holds no interest for the Empire and seldom appears on official star charts. Having relocated to Yavin 4 after abandoning their former base on Dantooine, the Rebels are cautiously optimistic that the Empire will continue to maintain its distance. However, as the *Millennium Falcon* travels to Yavin 4, Leia quickly realizes that the relative ease of their escape carries a heavy price, as the ship is carrying a tracking device planted by Imperial technicians. Aware that the Empire can now pinpoint the exact location of the secret base, the Rebels prepare for battle as they await the impending arrival of the Death Star in the Yavin system.

High over the Death Star, an X-wing takes evasive action to avoid a TIE fighter's laserfire.

Viewing the battle through his transparisteel viewport, a TIE fighter pilot fires on the enemy.

DEATH STAR TRENCH

After Rebel pilots prove capable of evading the Death Star's turbolasers, Darth Vader orders the deployment of TIE fighters for ship-to-ship combat. But when Vader realizes that several Rebel starfighters are trying to reach a specific target in the Death Star's equatorial trench, he joins the fray in his TIE Advanced x1 prototype, flanked by two wingmen.

Trusting in the Force, Luke Skywalker fires his fighter's proton torpedoes into the port.

CHAIN REACTION

After two consecutive three-pilot teams enter the Death Star trench but fail to hit their target, Luke makes a final, desperate effort. The sudden return of Han Solo saves him from Vader's laserfire, and Luke's torpedoes hit their mark, causing a chain reaction that obliterates the station.

VICTORY CEREMONY

Following the Death Star's destruction, the Rebels celebrate in the grand audience chamber of the Great Temple. Leia honors Luke, Han, and Chewbacca in recognition of their bravery and heroism.

VADER'S ESCAPE

With his TIE fighter crippled by a shot from the *Millennium Falcon*'s lasers, Vader is forced to crash-land on the planet Vaal. His journey to an Imperial Relay Outpost is interrupted by an attack from vicious creatures, but he eventually reaches a shuttle that carries him to Coruscant.

ENCOUNTER ON MIMBAN

An engine malfunction in Leia's Y-wing causes her and Luke to land on Mimban.

TWO YEARS AFTER the Battle of Yavin, Luke Skywalker escorts Princess Leia across the galaxy, heading for the planet Circarpous IV, where a meeting has been arranged with potential funders for the Rebel Alliance. Before they can reach their destination, they are forced to crash-land with R2-D2 and C-3PO on Circarpous V, a swamp planet more commonly known as Mimban. There they discover a secret Imperial mining facility

and meet Halla, an old woman who claims to be Force-sensitive. Halla possesses a small splinter of the legendary Kaiburr crystal, which greatly magnifies one's perception of the Force. She recruits Luke and Leia to help her find the Kaiburr crystal before it falls into Imperial hands.

WORLD OF DANGER

In addition to the threat of the Imperial presence, Leia and Luke's initial efforts to escape from Mimban are fraught with unexpected dangers at nearly every turn. They are attacked by monstrous wandrellas, amoebic cave creatures, and native Coway warriors before they locate the temple that holds the Kaiburr crystal, where they face their darkest nemesis—Darth Vader.

Disguised as miners, Luke and Leia enter a Mimban tavern. Shortly after meeting Halla, they are captured by Imperial stormtroopers.

Already aware of the identity of the Rebel pilot who destroyed the Death Star, Darth Vader is notified by the Imperial Governor that Luke and Leia have been captured. Vader's limited knowledge of Padmé Amidala's death precludes initial suspicions that Luke is his son.

Halla helps Luke and Leia escape from their captors, and they travel through the jungle until they reach the Temple of Pomojema, God of the Kaiburr, where they find the Kaiburr crystal. They are tracked by Darth Vader, who seeks vengeance for the setbacks caused by the Rebels.

FIGHTING THE DARK LORD

While Luke is temporarily pinned by heavy stones in the temple, Leia picks up his lightsaber to fight Darth Vader. After surprising Vader with a glancing blow, Leia is felled by his merciless blade, but Luke recovers in time to retrieve his lightsaber and strike back at the Dark Lord.

HEALING POWERS

With Leia left mortally wounded by Vader's vicious lightsaber attack, Luke uses the miraculous Kaiburr crystal to heal her wounds. They steal a starship and take the crystal with them, but Luke eventually discovers that the crystal's power decreases in direct proportion to its distance from the Temple of Pomojema.

FROM YAVIN TO HOTH

After the Battle of Yavin, Han Solo continues to aid the Rebel Alliance. When Luke Skywalker accidentally discovers the remote ice planet Hoth, Han is instrumental in persuading the Rebel leaders that it would make an excellent location for a new base. Solo later plays a major role in preventing the destruction of the Alliance fleet by Imperial forces as the Rebels attempt to relocate to Hoth. Although Han has every intention of repaying Jabba the Hutt for the lost spice shipment, the smuggler cannot stop the impatient crime lord from putting an even larger bounty on his head. The cyborg bounty hunter Skorr nearly captures Solo on Ord Mantell, but the failed effort backfires and lands Skorr in trouble with the Imperial authorities.

2. Working under contract for Boba Fett, several bounty hunters—including Dengar, Bossk, and a very vengeful Skorr—manage to capture Solo, Chewbacca, and Luke in the Hoth system, but fail to discover the location of the new Rebel base.

1. After Han Solo uses a prized energy crystal to foil Vader's plan for an all-out assault on Yavin 4, an Imperial armada is unable to prevent the Rebel fleet's evacuation to the third planet in the Hoth system. The Alliance's new headquarters is named Echo Base.

3. Unaware that his subcontractors have already acquired the wanted Rebels, Boba Fett meets with Darth Vader on Ord Mantell to suggest using Solo as bait to capture Skywalker. The Rebels escape, but Fett's plan will be put into practice by the Dark Lord in the future.

Despite Luke's lack of formal training in lightsaber combat, he is assisted and enabled by the spirit of Ben Kenobi to defeat Darth Vader. The Dark Lord loses his right arm and topples into a deep, crumbling well, but Luke's instincts tell him Vader survived the fall.

BATTLE OF HOTH

Imperial probe droids use sophisticated sensors to search for any sign of Rebel activity.

After failing to stop the Rebel evacuation from the base on Yavin 4, Darth Vader decides upon a new course of action. Imperial probe droids are deployed throughout every sector of the galaxy, each seeking the location of the Rebels' new secret headquarters. When Vader learns a probe droid has sighted a snow-base power generator on an ice planet in the Hoth system, he is immediately certain he has found the Rebels. Vader directs his massive flagship, the *Executor*, and a fleet of five Star Destroyers to travel at lightspeed to the Hoth system. However, the *Executor's* commanding officer, Admiral Ozzel, brings the vessels out of hyperspace too soon, delivering the ships too close to the Hoth system. His mistake alerts the Rebels to the Imperial threat in time for them to raise a planetary energy field over their base. After Vader disposes of Ozzel, the Dark Lord orders that the battle will be waged on the planet's surface.

TAUNTAUN PATROL

Life is scarce on Hoth, but the Rebels have managed to tame the hardy native tauntauns for use as transports. After several fearsome wampa creatures infiltrate their base, the Rebels realize their security measures are lacking. Working separately, Han and Luke place additional sensors around the base perimeter to anticipate and distinguish any potential invaders.

THE ICE CREATURE'S CAVE

While planting sensors for the Alliance's warning network, Luke is attacked and knocked unconscious by a wampa. He awakens to find himself suspended upside-down in a cave, with his feet embedded in the ceiling and his lightsaber half-buried in the snow below. Fortunately, Luke has learned to use the Force to move objects, and manages to recover and activate his weapon, wounding the wampa before it can make a meal of him.

After escaping the wampa, Luke is close to death when he sees the spectral form of Obi-Wan Kenobi, who instructs him to go to the Dagobah system and learn from Yoda.

Rebel pilot Hobbie Klivian expresses doubt over the evacuation plan, but the Rebel transports successfully evade the Imperial armada.

IMPERIAL ASSAULT

With the Imperial fleet in orbit, the Rebels at Echo Base (so-named because of the huge, echoing caves in which it was built) fire their powerful ion cannon at the Star Destroyers. This creates an escape corridor for their fleeing transports, but Rebel snowspeeders are less effective at stopping the huge Imperial AT-AT (All-Terrain Armoured Transport) walkers that attack the base from ground level. Luke Skywalker single-handedly brings down an AT-AT after his snowspeeder is shot down, but the Rebels suffer many casualties, and the day belongs to the Empire.

AT-AT walkers, AT-ST (All-Terrain Scout Transport) walkers, and Juggernauts form the spearhead of the Imperial forces on Hoth.

BACTA TANK

Suffering from frostbite and many wounds after his encounter with the wampa, Luke is submerged in a bacta-filled tank in the medical unit on Echo Base. A synthetic chemical, bacta is a healing agent formed from a combination of red alazhi and kavam bacterial particles mixed with the colorless liquid ambori. This mixture mimics the body's own vital fluids and promotes quick, scar-free tissue growth.

HOTH PREDATORS

Covered with white fur and averaging over two meters (6.5 feet) in height, wampa ice creatures are carnivorous predators indigenous to Hoth. Their long arms end in sharp claws that are strong enough to carve lairs out of the ice. Wampas rarely kill their prey outright or hunt when they are hungry. Instead, they stun their prey, haul the still-breathing victims back to their caves, and secure them in ice for later consumption. Their primary prey are tauntauns, who can barely smell beyond their own stench, allowing the relatively scentless wampa to sneak up on them with ease.

The Rebel Alliance uses Gallofree Yards' transports to ship food, ammunition, weapons, medical supplies, troops, and vehicles to all corners of the galaxy. Seldom armed, these ships rely on starfighter escorts for protection.

THE DARK LORD ON HOTH

Vader arrives on the ice planet just as the *Millennium Falcon* escapes from Echo Base. But as Han Solo's ship ascends from Hoth, Vader directs his fleet to pursue the Corellian freighter. Remembering his conversation with Boba Fett on Ord Mantell, the Dark Lord decides to capture Solo and use him as bait to trap his Force-powerful friend, Luke Skywalker.

Shortly after crash-landing on Dagobah, Luke and R2-D2 disembark the partially submerged X-wing to explore their murky surroundings. The boggy world is devoid of civilization but inhabited by millions of life-forms. These include massive dragonsnakes that lurk underwater, one of which nearly makes a meal of R2-D2.

A JEDI IN TRAINING

COMPELLED BY HIS vision of Ben Kenobi on Hoth, Luke Skywalker travels with R2-D2 to the Dagobah system to seek out Kenobi's own instructor, the Jedi Master Yoda. Having learned from Ben that Darth Vader helped the Empire hunt down and destroy the Jedi Knights, Luke knows that Yoda—like Ben—went into hiding to escape execution. As he approaches Dagobah, Skywalker is surprised to find that the planet has no cities or any evidence of technology. As he descends, Luke loses control of his X-wing in the dense atmosphere and is forced to make an emergency landing. Arriving on the mist-shrouded swamp world, Luke realizes how desperate Yoda must have been to survive. He has no idea what the Jedi Master looks like, but imagines him to be a great warrior.

FRIEND OR FOE?

While setting up a temporary camp, the sudden, unexpected appearance of a small creature causes Luke to draw his blaster. The young Rebel quickly decides that the odd, green-skinned being poses no threat, but becomes annoyed when the creature starts rummaging through his provisions. When Luke mentions that he is looking for a Jedi Master, the creature's eyes brighten, and he offers to take Skywalker to Yoda.

MUD HOUSE

Luke and R2-D2 follow the creature back to his home, a dome-shaped hut built at the bottom of a huge gnarltree. The hut's entry is large enough for Luke to crawl through but too small for R2-D2, who remains outside. Inside, Luke barely notices the inner structure, which includes salvaged items from a Republic-era spacecraft.

ALIEN ECOSYSTEM

One of the most bizarre organisms on Dagobah is the knobby white spider. In fact, the spider is a mobile root that is part of the gnarltree's life cycle. This root breaks free of its parent tree to roam the swamps and devour animals. After gathering enough nutrients, the spider finds a clear spot to anchor its legs, which eventually transform into roots that allow the spider to grow into a towering gnarltree.

The core of the carnivorous knobby white spider's body is made primarily of calcified wood.

YODA REVEALED

Inside the hut, an impatient Luke is startled to hear Ben Kenobi's voice address the creature, whom Luke suddenly realizes is Yoda.

RIGOROUS EXERCISE

With 800 years of experience training Jedi, Yoda pushes Luke to his physical and mental limits. Luke proves to be a talented student and learns greater control of his powers, but as his training did not begin in infancy, he finds it difficult to contain his emotions.

THE LAST JEDI MASTER?

Yoda's powers have helped him survive but, at 900 years old, he cannot escape old age. If he fails to train Luke, the legacy of the Jedi could die with him.

THE CAVE

Beneath an enormous gnarltree on Dagobah, there is a cave that is strong with the dark side of the Force. The cave is possibly a vestige of power from a dark Jedi who landed on Dagobah during the Clone Wars. After venturing into this cave, Luke has a vision that anticipates the truth about his relationship with Darth Vader.

In the cave, Luke confronts his worst nightmare.

Unleashing his anger, Luke ends the duel swiftly.

Vader's ruined helmet reveals Luke's own visage.

BOUNTY HUNTER ON DAGOBAH

After Luke and Yoda realize they are being monitored by a mysterious humanoid on Dagobah, the latter instructs Luke to stop the intruder. Luke races through the swamp until he finds himself his quarry: a droid bounty hunter named Milko. The droid threatens to kill Luke, but then surrenders his weapon and begs for mercy. Luke decides to threaten rather than destroy Milko, then allows him to leave in the scout ship that transported him to Dagobah. As the droid departs, Luke has a feeling that their encounter was a test arranged by Yoda, but is uncertain whether he passed or failed.

Still learning the ways of the Force, Luke is more likely to reach for his blaster than his lightsaber to deal with a threat.

FAILING TO BELIEVE

When Luke's X-wing suddenly sinks into the swamp, Yoda suggests that the Force could be used to remove the starfighter. Because Luke does not believe it is possible, he fails to raise the ship. Yoda transfers the ship to dry ground with ease, and gains even more respect from his pupil.

URGENT DEPARTURE

Unwilling to dismiss a frightening vision of Han and Leia in pain, Luke decides he must interrupt his Jedi training and attempt to rescue his friends. Despite the protests of both Yoda and the spirit of Obi-Wan, who suspect a trap, he leaves Dagobah but promises that he will return. Following his vision, he heads for the Bespin system.

"NO DISINTEGRATIONS"

INTO THE ASTEROID FIELD

Han Solo, Leia, Chewbacca, and C-3PO evade the Imperial blockade at Hoth, but are unable to escape into hyperspace because the *Falcon's* hyperdrive is damaged. Rather than surrender, Solo steers the ship into an asteroid field.

After repeatedly denying that she has feelings for him, Leia responds to Han's discrete kiss, but breaks away when they are interrupted by C-3PO.

JAWS OF THE SPACE SLUG

While the Imperials scan the asteroid field for his ship, Han finds temporary shelter for the vessel within a deep cave on a large asteroid. The *Falcon's* crew attempt to repair their hyperdrive, but when they discover that the "cave" is actually the innards of an enormous space slug, they are forced to flee, barely escaping the creature's closing jaws.

THE BOUNTY HUNTERS

On the *Executor's* bridge, the assembled bounty hunters attract anxious glances from the Imperial officers, outraged that Vader has even considered soliciting the services of such disreputable individuals. The Sith Lord offers a substantial reward to the hunter who finds Solo's ship, and the endeavor becomes an open competition. Boba Fett has already sabotaged Dengar's starship, and IG-88—having calculated that Fett will be first to find the *Falcon*—has placed a tracking device on *Slave I*.

RECRUITING DENGAR

Unlike his rivals, Dengar is already on board the *Executor* when Vader places a bounty on Han Solo. Dengar had tracked Solo to Hoth, but was captured by Imperial soldiers during the Rebel evacuation. Vader lets the hunter live in exchange for another attempt to find Solo.

HAVING FAILED IN his attempt to capture Luke Skywalker during the assault on Hoth, Darth Vader remains obsessed with finding the young Rebel. When the Imperial fleet notifies the Dark Lord that the *Millennium Falcon* is still in the Hoth system, Vader realizes that Han Solo's ship is disabled. The Imperial fleet attempts to stop Solo's ship, but Han loses his pursuers in an asteroid field. Vader receives a communication from the Emperor, and suggests to his master that Luke would be a powerful ally if he could be turned to the dark side. Determined to capture Luke's friends, and aware that Skywalker will sense their suffering through the Force, Vader summons Boba Fett and several other bounty hunters to the *Executor*. Because of Fett's reputation for disintegrating his targets, the Dark Lord warns them that he wants Solo and his companions alive.

THE BOUNTY HUNTERS' GUILD

The oldest and largest of the galaxy's hunter fraternities, the Bounty Hunters' Guild was for many years headed by Bossk's father, Cradossk. Several months after the Battle of Yavin, Boba Fett petitioned for Guild membership, which pleased Cradossk but angered Bossk. Unknown to the Guild, Prince Xizor had schemed to create a mercenary force of freelance hunters, contracting Boba Fett to join the Guild and destroy it from within. Fett's efforts worked, for Bossk devoured his own father, and the Guild divided into two warring factions.

4-LOM, a thieving protocol droid, has paired up with Zuckuss to work together as a team.

Zuckuss is an ammonia-breathing Gand findsmen. He employs special religious rituals to locate his quarry.

Bossk, like most Trandoshans, hates Wookiees. He intends to obtain Chewbacca's pelt, despite Vader's orders.

Dengar is a former swoop jockey. Banned from racing, he became an assassin, then turned to bounty hunting.

BOBA FETT

By the time of the hunt for Han Solo, Jango Fett's unmodified clone has reached the age of 35 standard years and is at the peak of his bounty hunting abilities. Boba Fett has made many modifications to Jango's starship, *Slave I*, and added many devices to his own armor, including anti-security blades to bypass most door-locking systems.

IG-88 DROID

Engineered and constructed at Holowan Laboratories, the assassin droid known as IG-88 (right) is actually one of four identical robots who share a collective consciousness as well as a goal of galactic conquest. It is the droid designated IG-88 B that accepts Vader's assignment.

The IG-2000 is IG-88 B's modified Trilon Aggressor assault fighter. IG-88s A, C, and D fly identical ships.

CAMOUFLAGE TECHNIQUE

To evade the Imperial fleet, Solo maneuvers his ship to lock onto the back of a Star Destroyer's bridge, where it effectively "vanishes" from Imperial sensors. Aware of standard Imperial procedures, he waits for the vessel to dump its garbage, then detaches the *Falcon* to float away with the refuse. Unfortunately, Boba Fett anticipates Solo's actions, and stealthily pursues his prey to the Bepin system.

BETRAYAL IN THE CLOUDS

ESCAPING FROM THE Imperial Fleet, Han Solo sets course for the planet Bespin, where his old friend Lando Calrissian runs Cloud City, an orbital gas-mining facility. Since assuming the role of the installation's Baron Administrator, Calrissian has managed to increase production at Cloud City, and he has also transformed its hotel-casinos into exclusive, luxurious resorts. In his attempts to revitalize the facility, he has tried to avoid dealing with the Empire, but this proves impossible after Boba Fett reports to Darth Vader that the *Millennium Falcon*—traveling at sublight speed—is heading for the Bespin system. The bounty hunter and the Imperials arrive before Solo's ship, and Vader instructs Calrissian to cooperate with his plan to capture the Rebels or suffer the consequences.

UNEXPECTED MEETING

Leia, Han, and Chewbacca become more suspicious of Lando after Chewie finds C-3PO's dismembered parts in a junk room. However, they accept Lando's invitation for refreshments, and allow him to lead them to a dining room. There, they are startled to find Darth Vader, who proves that a blaster is no match against the dark side of the Force.

After the Rebels land, Lando Calrissian greets them and escorts them into Cloud City. C-3PO strays from his friends and stumbles upon a squad of stormtroopers, who blast him into pieces.

CONSTRUCTIVE PRISONER

After being captured by the Imperials, Chewbacca is baffled as to how C-3PO's parts have arrived in his cell. Despite the lack of tools, the Wookiee is able to reattach the droid's head to his torso.

When Lando learns Vader intends to allow Boba Fett to deliver Han to Jabba the Hutt, he realizes his deal with the Empire will not ensure the safety of Cloud City's citizens.

DUEL ON CLOUD CITY

After Luke arrives on Cloud City, Darth Vader waits for his prey in the carbon-freeze chamber. Skywalker is lured into the Dark Lord's sinister trap, but avoids being frozen and impresses Vader with his fighting prowess.

NIGHTMARISH REVELATION

The lightsaber duel ends when Vader strikes a blow that costs Luke both his right hand and his weapon. Having been told by Ben Kenobi that Vader killed his father, Luke listens with horror as the Sith Lord declares: "No, Luke. I am your father." Vader believes Skywalker can destroy the Emperor, and invites Luke to join him so that they can overthrow Palpatine and rule the galaxy as father and son.

THANK THE MAKER?

When C-3PO's shattered parts are presented to Darth Vader, he instantly recognizes the droid he built as a child. He orders the parts to be destroyed, but after capturing the Rebels, he learns that the droid's pieces have been recovered by Solo's copilot. The Dark Lord uncharacteristically rescinds his previous order, and has C-3PO's remains delivered to the Wookiee's cell.

DESPERATE ESCAPE

Refusing to surrender, a wounded Luke tumbles through a network of gas exhaust pipes before he is ejected through a port beneath Cloud City. As he clings to a weather sensor vane, he uses the Force to summon Leia. Although Leia, Chewbacca, the droids, and their new ally Lando manage to rescue Luke and flee the Bespin system, they are unable to stop Boba Fett from leaving Cloud City with Han.

UNCERTAIN FUTURE

The *Millennium Falcon* travels to the farthest reaches of the galaxy, where the Rebels regroup with the Alliance fleet. Luke is transferred to a medical frigate, where he receives a synthetic hand to replace the one he lost in combat. While Chewbacca and Lando depart in the *Falcon* to investigate Boba Fett's progress to Tatooine, Leia decides not to confide in Luke about her love for Han, and Luke tells no one of Vader's claim.

FREEZING SOLO

Carbon-freeze chambers are used to suspend exotic gases within blocks of carbonite for export from Cloud City. Darth Vader plans to utilize this technology to capture Luke Skywalker, but decides to test it on Han Solo to see if a human can survive the freezing process. Han lives, and a disillusioned Lando decides it is time to stop helping the Empire.

SHADOWS OF THE EMPIRE

CONTROLLER OF THE largest merchant fleet in the galaxy, the Falleen Prince Xizor—the secret leader of the Black Sun organization—has proven useful to the Emperor for coordinating clandestine shipping assignments. While meeting on Coruscant, Xizor witnesses the Emperor's holographic communication with Darth Vader, and discovers Vader's relationship to Luke Skywalker. Ten years earlier, Vader exterminated 200,000 Falleen to contain a lethal bioagent that had been accidentally released by Imperial scientists on Xizor's homeworld. Seeing an opportunity for vengeance, Xizor plans to ruin Vader's standing with the Emperor by framing him for the assassination of Palpatine's would-be prize, Luke Skywalker. Meanwhile, Boba Fett is tracked by Rebels and rivals as he tries to deliver Han Solo to Jabba the Hutt.

GURI

A human replica droid programmed to be an assassin, Guri was created to serve Xizor, who trained her to be his second-in-command. When Guri is left without a master, she seeks out a droid engineer to restructure her programming and erase her bad memories, which enables her to begin a new life.

THE BLACK SUN CONTRACT

Following Darth Vader's failed mission to Cloud City, the Emperor orders him to work with Prince Xizor to coordinate the shipment of construction materials for the second Death Star. Because Xizor's ties to Black Sun are well known, Vader strongly advises against dealing with him, but the Emperor dismisses the Dark Lord's protests.

TRACKING BOBA FETT

Captain of the *Outrider* starship (above right), the smuggler Dash Rendar discovers the location of Fett's *Slave I* and guides the Rebels to an Imperial enclave on the planet Gall.

A NEW LIGHTSABER

In Ben Kenobi's abandoned home on Tatooine, Luke finds a book with instructions for building a lightsaber. Unlike the one he lost on Cloud City, his new lightsaber follows the design of Ben's weapon. The assembly is barely completed when Luke uses the lightsaber to defend himself against Jabba's swoop gang, who have been deceived by Xizor into believing Vader wants Luke dead.

DASH RENDAR

A freelance pilot and gun for hire, Dash Rendar delivered food to the Rebels at Echo Base, and bravely commandeered a snowspeeder to take down an AT-AT during the Battle of Hoth. After aiding Luke Skywalker and the Bothan spynt to capture the plans for the second Death Star, Dash's *Outrider* vanishes in the explosion that claims Xizor's skyhook. But months later, Rendar turns up in a cantina on Hurd's moon, where he meets the reformed Guri.

UNDERCOVER ASSIGNMENT

Unaware of Xizor's plotting, Leia arranges a meeting with Black Sun to find out who is trying to kill Luke. To maintain secrecy, Chewie and Leia disguise themselves as the bounty hunters Snoova and Boushh.

XIZOR'S LAST STAND

After the Rebels discover Xizor's role in the plot to kill Luke, Xizor retreats to his luxury skyhook, the *Falleen's Fist*, a satellite tethered in a low Coruscant orbit. Xizor is ultimately unable to escape the wrath of Darth Vader, who has learned of the Falleen's treachery and directs the *Executor* to obliterate the skyhook and everyone on board.

DELIVERING THE GOODS

En route to Tatooine, Boba Fett realizes that delivering Han Solo to Jabba the Hutt may be trickier than he had anticipated. Fett's carbonite-frozen acquisition has made him the target of not only the Rebel Alliance but every competitive bounty hunter in the galaxy (above). Leaving a trail of frustrated Rebels at Gall and dead hunters and mercenaries in his wake, Boba Fett eventually presents Han Solo to Jabba the Hutt (left), who is so delighted by the idea of adding Solo to his art collection that he even agrees to Fett's demand for a higher fee.

PRISONERS OF JABBA THE HUTT

Like most Hutts, Jabba is an unabashed megalomaniac who lives to control others and be the center of attention.

HAVING FAILED TO rescue Han Solo from the clutches of Boba Fett, Luke Skywalker puts another plan in motion. Because Tatooine is surrounded by an Imperial blockade, and Jabba's palace is so heavily secured, Luke knows that any attempt to rescue Han must be done with extreme discretion. It will also require some of his allies to become Jabba's prisoners. Ordering the droids to go to the palace, Luke deliberately leaves C-3PO unaware of various details, including the whereabouts of Lando and Chewbacca, the lightsaber concealed within R2-D2, and the fact the droids will be presented as a "gift" to Jabba. Although Luke's plan does not anticipate his encounter with a monstrous rancor, Jabba is defeated and Han and his friends escape Tatooine.

JABBA AND THE GAMORREANS

Violent, porcine beings, Gamorreans are not known for their intelligence. When Jabba employed 12 Gamorrean guards, he was told it was their custom to engage employers in combat before they agreed to work. Jabba informed them it was Hutt tradition to fight blindfolded, and if they agreed to wear blindfolds, he would take them all on at once. After their eyes were covered, Jabba had his henchmen batter the Gamorreans. The nine survivors remain in awe of Jabba's fighting skills.

JABBA'S PALACE

A sandrock fortress with outer walls specially reinforced with ultra-strong ditanium, Jabba the Hutt's palace is located in a remote region of Tatooine's Dune Sea. No one knows exactly when the centuries-old structure was built, but it had been long inhabited and used as a monastery by the B'omarr monks before Jabba took it over and transformed it into his impregnable base of operations.

BOUSHH'S BOUNTY

Chewbacca insists on participating in Han's rescue, but knows that Jabba would see through any disguise he might use to infiltrate the palace. To gain entry, he allows himself to be manacled and escorted by Leia, who reprises her role as Boushh to collect the bounty on Chewie.

BRIEF REUNION

While Jabba and his court are sleeping, Leia liberates Han from the carbonite block. Temporarily blinded by hibernation sickness, Solo is barely reunited with the Princess when they are discovered. Han is thrown into the same cell as Chewbacca, while Jabba adds Leia to his slave harem.

A birthday gift to Jabba from Bib Fortuna, the fearsome rancor is a semisentient beast who dwells in a pit below the crime lord's court.

ENTER THE JEDI

Carrying no weapons, Luke bypasses Jabba's security sensors and uses the Force to subdue the guards, but when he confronts the Hutt, he learns that Jabba is immune to Jedi mind tricks. However, Jabba realizes that Luke poses a threat, and attempts to feed him to his pet rancor. After it fails to make a meal of Luke, the Hutt decides to introduce his Rebel captives to a larger creature—the Sarlacc.

While Jabba watches from his luxury Ubrikkian sail barge, Khetanna, a sand skiff positions Luke Skywalker above the Sarlacc's pit.

THE HUTT'S LAST GASP

Chained to Jabba and forced to wear a revealing slave-girl costume that precludes the possibility of concealing any weapons, Leia has little hope of escape. But when Jabba becomes distracted by the spectacular battle outside his sail barge, the Princess seizes the chance to toss the chain around her captor's thick neck and strangle him.

THE GREAT PIT OF CARKOON

Perched at the end of a plank that extends from the sand skiff, Luke gazes down into the maw of the enormous, omnivorous Sarlacc, who lives below Tatooine's surface in a deep sand hole called the Great Pit of Carkoon. As he steps off the plank, Luke backflips and catches his lightsaber, which R2-D2 shoots into the air. A fierce battle ensues, as the captive Rebels fight for their lives.

Jabba's sail barge is wracked by a series of explosions as Luke and his allies make their escape. Most of the Hutt's entourage perish, but Bib Fortuna makes an emergency getaway in a small patrol craft.

**YODA'S TWILIGHT**

After many centuries, age has finally caught up with the Jedi Master Yoda. He tells Luke that his training is complete, but that he will not become a Jedi until he confronts Darth Vader. Before he expires, Yoda reveals that Vader is indeed Luke's father, and that "there is another Skywalker..."

"THERE IS ANOTHER"

SINCE HIS ENCOUNTER with Darth Vader at Cloud City, Luke Skywalker has told no-one of the Dark Lord's claim to be his father. Uncertain of whether Vader was lying, he remains even more disturbed by the fact that Vader's claim is entirely inconsistent with Ben Kenobi's account of the death of Anakin Skywalker. After liberating Han from Jabba's clutches, Luke returns to Dagobah to fulfill his promise to Yoda and complete his training. He is also determined to learn the truth about his heritage, and hopes the old Jedi Master can provide the answers. In the meantime, the Rebel Alliance has regrouped to discuss how to destroy the Empire's most fearsome new weapon—the second Death Star. Top-secret design and construction-schedule information, previously obtained by a team of Bothan spies who were assisted by Luke and Dash Rendar, are analyzed and a plan is formulated. But the Rebels are unaware that their every move has been manipulated by Palpatine himself.

BEN'S REVELATION

Feeling uncertain of himself after Yoda's passing, Luke is surprised to be visited yet again by the spirit of Obi-Wan. Because Ben believes that Anakin Skywalker was effectively destroyed when he became Darth Vader, he maintains that he was being truthful—from a certain point of view—when he told Luke that Vader killed his father. Although Luke believes there is still good in Vader, Ben is convinced that he is completely evil. However, he echoes Yoda's words that Luke must face Vader again. Asked to explain Yoda's mention of "another Skywalker," Ben reveals the existence of Luke's twin sister, and Luke instantly realizes that his sibling must be Leia.

REBEL LEADERS

A founder of the Alliance to Restore the Republic—the official title of the Rebel Alliance—Mon Mothma (right) is now its Commander-in-Chief. At the Sullust system, Mon Mothma, Admiral Ackbar, and General Crix Madine meet with allies to disclose the information gathered by the Bothans. According to the intelligence, a new Death Star is being constructed in the Endor system, but its weapon systems are not yet operational. More importantly, the Emperor himself is overseeing the final construction. Using this information, the Rebels plan to attack and destroy the Empire's unfinished battle station.

Admiral Ackbar (center left) and Mon Mothma (center right) address a Rebel assembly in a holographic amphitheater on Ackbar's flagship, the Mon Calamari cruiser Home One.

**STOLEN SHUTTLE**

Traveling in the stolen Imperial shuttle *Tydirium*, Luke, Leia, Han, Chewbacca, and the droids rely on a secret clearance code to trick the Imperial fleet into allowing them to land on Endor's forest moon. Their mission is to destroy the planetary shield generator that protects the orbiting Death Star, leaving the station vulnerable to a full-scale attack by Rebel starfighters.

**SPEEDER BIKE CHASE**

On Endor, Luke and Leia are hunted by Imperial scout troopers. The Rebels defeat their pursuers in a high-speed chase on speeder bikes, but become separated in the moon's dense forest.

Arriving on the half-completed Death Star, Vader is greeted by Moff Jerjerrod, the battle station's commanding officer.

DEATH STAR II

Unlike its smaller predecessor, the new Death Star is more an elaborate trap than a secret weapon. Despite the Alliance's faith in the Bothans, the only reason they know about the Imperial activity at Endor is because Emperor Palpatine released the information to lure the entire Rebel fleet to its doom. As the Rebels prepare to disable the shield generator, they are unaware that the Death Star's weapon systems—including its superlaser—are fully operational.

Towering above the forest moon's surface, the Empire's planetary shield generator creates a powerful force field around the orbital Death Star.

While being stalked by scout troopers, Leia meets Wicket W. Warrick, a young Ewok. The Ewoks are angered by the Imperial presence, and after Wicket introduces Leia to the Ewok elders, the Rebellion gains new allies.

JEDI TWINS

Reunited with Leia at the Ewok village, Luke declares that he is endangering their mission because Vader can sense his presence. He then reveals that Darth Vader is his father, and also Leia's. When Luke states his intentions to confront Vader, Leia tries to persuade him to run away instead. But because Luke believes he can save his father from the dark side, he leaves to find the Sith Lord.

BATTLE OF ENDOR

DECIDING TO CONFRONT Vader face-to-face, Luke Skywalker surrenders to Imperial soldiers on Endor and is brought before his father. Because this reunion was anticipated by the Emperor, who has also foreseen that his Sith apprentice will deliver Luke to him, Vader realizes his own destiny is simply to be a pawn in his Master's schemes. Faced with his Master's apparent omniscience, Vader abandons his ambition to overthrow Palpatine and rule the galaxy side-by-side with his son, and Luke notices that his father is less bold than he was at their last meeting on Cloud City. Sensing Vader's conflict, Luke's instincts tell him that Anakin Skywalker has not been completely consumed by evil—but the Dark Lord maintains that "it's too late for me, son..."

WOODLAND ADVERSARIES

Imperial stormtroopers have advanced weapons and are trained to fight in diverse environments, so they are not initially intimidated by the Ewoks or the forest moon's terrain. But as the Battle of Endor progresses, the stormtroopers realize they have grossly underestimated the diminutive race, who have allied themselves with the Rebels to defeat their common foe. Ewok warriors take every advantage of their natural surroundings to surprise, misdirect, trip, snare, and crush the white-armored soldiers.

FATEFUL DUEL

Brought before the Emperor, Luke refuses to join the Sith Lords. Goaded by Palpatine, Luke engages Vader in a brutal duel. When Vader is injured, the Emperor commands Luke to kill his father—but the Jedi refuses.

When Luke's thoughts betray Leia's existence, he unleashes his fury on Vader as the Sith Lord threatens to recruit his sister to the dark side.

ATTACK OF THE SITH

Angered by Luke's unwillingness to follow his father's path, the Emperor releases a storm of Sith lightning on the Jedi. But in failing to foresee Luke's defiance, the Emperor reveals that his own powers are fallible, and a wounded Vader realizes Palpatine can be destroyed.

REBEL COMMANDOS

Han, Leia, and Chewbacca lead a team of commandos through the Endor forest, heading for the Empire's shield generator. Thanks to help from the Ewoks, they destroy the shield generator, enabling the Rebel Alliance's fleet to direct a full-scale attack on the Death Star.

DEATH STAR ASSAULT

Newly promoted to the rank of General, Lando Calrissian pilots the *Millennium Falcon* through the Death Star's superstructure. For his copilot, Lando chooses his longtime Sullustan friend Nien Nunb (left). A legend on his homeworld for his exploits as a pro-Rebellion space pirate, Nunb's enhanced sense of direction makes him an excellent pilot and navigator.

A DESTINY FULFILLED

The moment that Darth Vader realizes he cannot allow Palpatine to kill his son, he becomes Anakin Skywalker once more. Fulfilling the prophecy that he will bring balance to the Force, Anakin seizes the Emperor. Mortally wounded by Sith lightning, the Chosen One hurls Darth Sidious down an elevator shaft, and the Emperor explodes in a violent release of dark energy.

VADER UNMASKED

As Luke escapes the Death Star, Anakin asks Luke to remove his mask so he can look at his son with his own eyes before he dies. Despite the atrocities he committed as Vader, Anakin is comforted by his son's determination to recover the good that remained in him.

INTERSTELLAR CELEBRATION

News of the Emperor's death and the Rebel victory at Endor spreads fast throughout the galaxy via the HoloNet, and many worlds respond with celebrations. On Coruscant, fireworks fill the sky as Palpatine's statue is toppled by a jubilant population.

THE EMPEROR'S HAND

After Luke escaped Vader at Cloud City, Palpatine secretly ordered Mara Jade, his personal aide, to assassinate Luke. Infiltrating Jabba's palace just before Luke arrived, events transpired to thwart her plan. Jade is on Coruscant when Palpatine dies, but she hears his last command: "You will kill Luke Skywalker."

UNITED IN SPIRIT

While the Rebels celebrate with the Ewoks on Endor, Luke is momentarily distracted by the apparitions of Yoda, Ben, and a man he instinctively recognizes as a younger Anakin Skywalker. Luke rejoins the party, and the Jedi spirits fade away into the night.

A NEW ERA

THE DEATH OF Palpatine and the destruction of the Death Star were devastating blows to the Empire, but the battle was not over for Luke Skywalker and his allies. Some Imperials went into hiding or became warlords, but the most dangerous remained loyal to the Emperor long after his apparent demise. After Luke learned that Palpatine's consciousness had survived beyond the Battle of Endor, he had to conquer his own temptation toward the dark side to defeat his most sinister foe. As Luke encountered new adversaries, he also discovered other Force-sensitive beings. He came to believe that the Jedi Order might thrive once more, not as it was, but in an adapted form to suit the needs of the New Republic. Assuming the mantle of a Jedi Master, he now trains his disciples to use the Force to help the helpless and aid the government, which has become the Galactic Federation of the Free Alliances. The Jedi Knights continue to serve as a beacon of hope throughout the galaxy.

THE NEW REPUBLIC

THE ROGUE AND THE PRINCESS

Four years after the Battle of Endor, a jealous Han Solo kidnaps Princess Leia when she receives a marriage proposal from Prince Isolder of the powerful Hapes Consortium. Drawn closer during the events that ensue, Leia and Han return to Coruscant and marry.

CORUSCANT RECLAIMED

On Coruscant, the former Imperial Palace becomes the seat of government for the New Republic. Princess Leia Organa Solo believes that the new headquarters will serve as an affirmation of the New Republic's ideals and a final victory over the Empire.

POLITICAL INFIGHTING

As the New Republic establishes itself, the abilities of its leadership are questioned by the Bothan Councillor Borsk Fey'lya (above right). Han Solo rightly suspects that Fey'lya is motivated by his own political ambitions.

To defend themselves against Force-sensitive enemies, Grand Admiral Thrawn and his loyal officer Captain Pellaeon carry Force-repelling ysalamiri creatures, which are native to the planet Myrkr.

GRAND ADMIRAL THRAWN

Despite the Empire's anti-alien policies, a Chiss named Mitth'raw'nuruodo demonstrated such impressive tactical skills that the Emperor approved his formal Imperial military training. Mitth'raw'nuruodo became known by the shortened name of Thrawn, and eventually achieved the rank of Grand Admiral. Shortly before the Battle of Hoth, a successful collaboration with Darth Vader led to Thrawn being rewarded with the authority to call upon the services of the Dark Lord's private assassins, the Noghri death commandos.

The clone of a deceased Jedi Master, Jorus C'baoth was created by Palpatine to guard Imperial treasure and a cloning facility on Wayland. C'baoth suffers from clone madness, the result of being grown too quickly, and slips into periods of confusion and insanity.

JORUS C'BAOTH

Five years after Palpatine's death, Thrawn seeks the Emperor's hidden storehouse of secret technology on the planet Wayland. Thrawn and Captain Pellaeon are attacked by the self-proclaimed Jedi Master Jorus C'baoth, but are protected by Force-repelling ysalamiri. Thrawn offers to abduct and deliver two Jedi apprentices—Luke and Leia—in return for C'baoth's assistance and access to the storehouse.

C'baoth (above) employs Jedi battle meditation to direct Imperial forces at Sluis Van Shipyards (left).

STRIKING THE SLUIS SECTOR

In a scheme to steal starships and expand the dwindling Imperial fleet, Thrawn orchestrates a simultaneous assault on three planets in the Sluis Sector, then stages a surprise attack at Sluis Van Shipyards. Beaten by Han Solo and Lando Calrissian, Thrawn flees without any additional ships.

NOGHRI WARRIORS

Natives of the planet Honoghr, the deadly Noghri were nearly annihilated by a series of ecological disasters until the arrival of Darth Vader. Claiming that a crashed Republic starship was responsible for Honoghr's ravaged state, Vader offered aid to the surviving Noghri, who were so grateful that they became his private assassins. Decades later, Princess Leia's encounter with a Noghri leads her to Honoghr, where she discovers that Vader deceived the Noghri in order to transform them into his most loyal militia.

JADE AND KARRDE

In the founding New Republic, Palpatine's former assassin Mara Jade has to use false identities to survive. Under the alias Celina Marniss, she saves the life of the smuggling chief Talon Karrde, who repays her with a job. Based on Myrkr, Karrde initially helps Thrawn, but ultimately becomes an ally of the New Republic.

On Coruscant, Leia Organa Solo gives birth to twins—a girl and a boy, Jaina and Jacen—who will join a new generation of Jedi Knights.

THE DEATH OF THRAWN

While C'baoth attempts to use an evil clone of Luke to draw Luke and Leia to the dark side, Thrawn prepares a trap for the New Republic at the shipyards on Bilbringi. Fortunately, Mara Jade slays Luke's clone and C'baoth, while Thrawn's Noghri bodyguard—determined to avenge his people's betrayal by the Empire—fatally stabs his master.

EMPIRE REBORN

THE NEW REPUBLIC'S restoration of Coruscant inspires many to believe that the Imperial threat has been greatly reduced.

But six years after the Emperor's death, an invigorated Imperial military drives the founding government's leaders into hiding. Sensing a dark power behind the attacks, Luke Skywalker travels to Byss, an Imperial stronghold near the center of the galaxy. On Byss, Luke discovers that Palpatine has risen from the dead to restore his Empire. Although Palpatine has recruited dark-side adepts, he intends to take a Jedi as his new apprentice. When Luke and Leia resist, Palpatine sets his sights on Leia's unborn child.

PALPATINE RETURNS

Following the destruction of the second Death Star, Palpatine's consciousness spent over a year drifting across space. On reaching Byss, he awakened and recuperated in the body of a clone, one of many kept in reserve. Because the clones can only contain his evil for a limited time, Palpatine strives to take possession of a strong Jedi body.

WORLD DEVASTATORS

The Emperor attacks the New Republic with his World Devastators—machines designed to strip planets of their natural resources and manufacture new weaponry. Internal tractor beams suck up chunks of planetary surface into a molecular furnace, which converts the metals, carbons, and rare elements into useful materials. Palpatine unleashes the World Devastators on Mon Calamari, but Luke Skywalker obtains a coded signal that allows R2-D2 to reprogram the Imperial superweapons to turn against each other.

BOUNTY HUNTER TEAM

As the galactic struggle continues, the bounty hunters Dengar and Boba Fett attempt to capture Han and Leia and collect on a bounty offered by the Hutts. When the bounty hunters' mission fails miserably, Dengar proclaims he will never work with Fett again.

Captured on Byss by Imperial forces, Leia studies a Jedi Holocron owned by Palpatine. When she escapes, Leia takes the Holocron to learn from its gatekeeper, a holographic simulacrum of Jedi Master Bodo Baas.

LOST JEDI

On Nar Shaddaa, Leia finds Vima-Da-Boda, a former Jedi who is the 200-year-old direct descendant of Nomi Sunrider. Vima has been in self-imposed exile since taking vengeance on her own daughter's killer, but leaves with the Princess to become a Jedi instructor.

From Palpatine's Holocron, Luke learn of Kam Solusar (above right), a Jedi who escaped the Purge. After being rescued by Luke from Nepsis VIII, Kam meets Leia.

NEW WAR DROIDS

Palpatine's return is accompanied by new technology to wage war against the New Republic. These weapons include Shadow Droids—space-faring fighters built around the hard-wired brains of fallen Imperial ace pilots—and X-1 Viper "Automadons," war droids that absorb energy from enemy lasers to power their own weapons.

DARK JEDI?

When Luke Skywalker finds Palpatine on Byss, he stays and surrenders to him while Han and Leia escape. Luke allows Leia to believe that he has joined the dark side. Determined to rescue her brother, Leia returns to Byss and discovers he is attempting to destroy Palpatine and his clones. Luke and Leia combine their powers, but fail to prevent Palpatine from escaping.

ANAKIN SOLO

After the Emperor's Galaxy Gun weapon destroys the New Republic base on Pinnacle Moon, its leaders and their families flee to Nepsis VIII, where Leia gives birth to her third child, a son. Although her husband suggests the boy should be named Han Solo, Jr., Leia insists that his name is Anakin.

PALPATINE'S END

When Palpatine's latest clone body begins to deteriorate at an accelerated rate, he consults with Sith spirits who advise him to transplant his psyche into Anakin Solo. Palpatine tracks the Solos to the planet Onderon and attempts to possess the infant, but Luke's new ally, the cyborg Jedi Empatojayos Brand, absorbs and vanquishes Palpatine's evil spirit.

MARRIAGE OF MARA AND LUKE
In 19 A.B.Y., Mara Jade and Luke Skywalker marry. Because Mara was once Luke's enemy, many regard their union as symbolic of a bright future for the New Republic.

THE NEW JEDI ORDER

AS LUKE'S EXPLOITS introduce him to more Force-sensitive beings, he decides to train them in the ways of the Force to become Jedi Knights. Instead of attempting to recreate the former Jedi Order, Luke develops new teaching methods to encourage greater independence among his students, who are expected to maintain unity and defend the worlds of the New Republic. After consulting with his sister, Leia, Luke chooses the abandoned Rebel base on Yavin 4 for the site of his Jedi Academy. One of his students, Kyp Durrion, falls under the spell of the spirit of the long-dead Dark Lord, Exar Kun, but finally prevails and becomes a Jedi Knight. Kyp is among the first Jedi to encounter the most devastating threat to the New Republic—the Yuuzhan Vong.

JEDI ACADEMY

Eleven years after the Battle of Yavin, Luke returns to Yavin 4 to found his *praxeum*, a place of learning for prospective Jedi Knights. His students include the sky-hermit Streen, the brash Kyp Durrion, the self-doubting clone Dorsk 82, and Kirana Ti of Dathomir. Although Luke draws from his instruction with Yoda and knowledge of the Jedi Order, he does not adhere to its traditional mandates of selecting only Force-sensitive infants, training one apprentice at a time, and eschewing marriage.

SKYWALKER'S STUDENTS

Luke transforms the ancient Massassi temples on Yavin 4 into the base for his new Jedi Academy. With R2-D2 by his side, he addresses the Jedi lore-master Tionne, and the prospective Knights Kirana Ti, Streen, Kyp Durrion, and Dorsk 82.

A starship delivers Streen and Kirana Ti to the ruins of a mining city on the isolated world Corbos. The two students arrive to help Kyp Durrion and Dorsk 82, who have encountered a murderous leviathan that seems to thrive off the spirits of its victims. Luke shows his confidence in the new Jedi Knights by allowing them to tackle the assignment while he remains on Yavin 4 to supervise his trainees.

THE YUUZHAN VONG

Twenty-five years after the Battle of Yavin, the New Republic is confronted by the Yuuzhan Vong, deadly aliens who worship merciless gods. The Yuuzhan Vong are refugees from a destroyed home planet, and they use massive bioengineered spacecraft to locate and conquer new worlds. Their starships rely heavily on dovin basals, spherical organisms that can project a gravity well to pull the ships through space. The Yuuzhan Vong use one of their dovin basal creatures to wrench the Dohdido moon out of orbit, pulling it down onto the planet Sernpidal (left). Eschewing manufactured technology, Yuuzhan Vong warriors attack close-range targets with flesh-shredding razor bugs (below right). In perhaps their greatest demonstration of power, the Yuuzhan Vong conquer Coruscant, rename it Yuuzhan'tar, and attempt to terraform the world.

THE DEATH OF CHEWBACCA

When Han Solo and Chewbacca fly the *Millennium Falcon* to the Outer Rim planet Sernpidal, they have no idea that the Yuuzhan Vong intend to use a gravity weapon to crash Sernpidal's moon into the planet's surface. Chewbacca loads refugees onto the *Falcon* as fast as he can, but is unable to return to the ship before Anakin Solo executes an emergency launch. Moments later, Chewbacca dies in a planet-shattering explosion.

HAN AND LEIA'S CHILDREN

Like their mother and uncle, the Solo children are strong with the Force. Nearly two years into the war against the Yuuzhan Vong, the Jedi twins Jacen (above left) and Jaina Solo (above right) are 18, and their younger brother Anakin (above center) is in his 16th year. When they participate in a mission to eliminate the Yuuzhan Vong cloning labs that grow the Jedi-hunting voxyn, Anakin sacrifices himself to help destroy the voxyn. Anakin's death prompts Jaina to be temporarily drawn to the dark side, and leaves Jacen to question the path of a Jedi.

BEHIND THE SCENES

FROM CONCEPT SKETCHES and set design to visual effects and the final edit, George Lucas has been involved in every aspect of production on the *Star Wars* movies, overseeing all of the key creative decisions. "Normally, a director is concerned mainly with character and with telling the story. In the *Star Wars* films, that is important, but equally important are all the details. They're like little time bombs all over the set, thousands of them, and if you don't catch one, it could do you in." Lucas is widely credited with reinventing the way in which visual effects are used in cinema, not merely to create illusions but to serve the story. "I took something that was not very well regarded, a kind of esoteric, technical-cult enthusiasm, and recognized it for the art it is and gave it a showcase where people could really see and appreciate the artistry."

Using a 16mm camera, the young Lucas made filmmaker, a making-of documentary about Francis Ford Coppola's *The Rain People* (1968).

GEORGE LUCAS

BORN IN MODESTO, CALIFORNIA, in 1944, George Lucas is the creator of *Star Wars* and a pioneer in independent filmmaking. As a child, he often read adventure novels and watched the *Flash Gordon* serials. At some point, he "began to wonder what would happen if [the visual effects] were done really well. Surely, kids would love them even more." To create his *Star Wars* saga, Lucas studied history and mythology, and drew from aspects of films he admired, notably Akira Kurosawa's *The Hidden Fortress*. He also founded the company Industrial Light & Magic (ILM) to create the movies' visual effects. One of the most successful film series ever made, *Star Wars* transformed the entertainment industry.

LEARNING FROM EXPERIENCE

Before *Star Wars*, Lucas wrote and directed two very different films: *THX 1138*, a bleak tale set in the far future, and *American Graffiti*, an affectionate story about California teenagers set in 1962. Audiences avoided *THX 1138*, but flocked to the movie theaters to see *American Graffiti*, something Lucas would remember while he was working on the script for the first *Star Wars* film: "I realized it works a lot better to make a positive, spiritually uplifting film."

DIFFICULT SHOOT

Lucas directs Mark Hamill and Anthony Daniels (C-3PO) on location in Tunisia for *Star Wars* in 1976. To bring his vision to the screen, Lucas had to deal with harsh weather, malfunctioning effects, a temperamental crew, and anxious studio executives.

In the model-shop at Industrial Light & Magic, Lucas inspects the skeletal *Death Star* featured in *Return of the Jedi* (1983). By the early 1980s, ILM had become the world's leading visual effects company.

RALPH MCQUARRIE

According to George Lucas, *Star Wars* "might never have been made" without concept artist Ralph McQuarrie. In 1975, Lucas commissioned McQuarrie to design characters and create a series of paintings that ultimately convinced 20th Century Fox to help "green light" the movie.

McQuarrie's first concept painting depicted the droids on Tatooine. At his audition for C-3PO, actor Anthony Daniels was reluctant to play a robot until he saw this painting and felt empathy for the characters.

After the worldwide success of the first trilogy (Episodes IV–VI), Lucas focused on new projects for several years. In the 1990s, he joined forces with producer Rick McCallum (above left) to make a new prequel trilogy to complete the six-episode saga.

In *Episode III: Revenge of the Sith* (2005), Lucas makes a brief cameo appearance as Baron Papanoida.

LUCAS'S ALTER EGO

In developing Luke Skywalker (right, played by Mark Hamill), Lucas not only took inspiration from mythological heroes but from "two opposites in myself—a naive, innocent idealism and a view of the world that is cynical, more pessimistic."

THE STAR WARS SAGA

GEORGE LUCAS BEGAN writing the script for *Star Wars* in 1972. He wrote several drafts of screenplays until he was happy with the story, which began after significant events had already shaped principal characters. To better comprehend these prior events, Lucas also wrote an extensive back-story. In a 1979 interview, he recalled that the overall story had "developed into an epic on the scale of *War and Peace*, so big I couldn't possibly make it into a movie. So I cut it in half, but it was still too big, so I cut each half into three parts. I then had material for six movies." The saga, originally the adventures of Luke Skywalker, finally evolved into the story of Darth Vader.

EPISODE IV: A NEW HOPE (1977)

In Lucas's original script, Obi-Wan Kenobi (Alec Guinness) survived his duel with Darth Vader. Preproduction was already underway when Lucas decided to kill Obi-Wan, whose death dramatically increased the threat of both Vader and the Death Star. Guinness helped redevelop his character and worked with Lucas on the idea of having Kenobi become one with the Force. Initially released as *Star Wars*, the movie was re-titled *Episode IV: A New Hope* for its 1979 re-release.

EPISODE V: THE EMPIRE STRIKES BACK (1980)

Unlike *A New Hope*, *Empire* ends with several unresolved details, notably the fate of Han Solo and the veracity of Vader's claim to be Luke's father. Director Irvin Kershner likens *Empire* to "the second movement of a symphony. The second movement is always a *largo*; it's a slower movement and it can't come to such a climax that it has complete closure. The grand climax is in the third movement."

THE THREE DIRECTORS

The laborious, all-consuming experience of making the first *Star Wars* movie compelled Lucas (center) to hire the veteran director Irvin Kershner (left) to direct *The Empire Strikes Back* and Richard Marquand (right) to direct *Return of the Jedi*. The three directors were brought together when Kershner visited Lucas and Marquand during the filming of *Jedi*.

EPISODE VI: RETURN OF THE JEDI (1983)

Jedi was co-scripted by George Lucas and Lawrence Kasdan, who also rewrote the *Empire* script after the death of screenwriter Leigh Brackett. "Jedi was a much tougher movie to pull off," Kasdan said in a 2000 interview, "because everything has to work out so hunky-dory." Actor Mark Hamill (Luke Skywalker) recalls, "We really had the sense [that] it was the end, that they were going to tie up all of the loose ends."

REINVENTING JABBA

When the cameras rolled for *Star Wars* in 1976, actor Declan Mulholland played Jabba the Hutt opposite Harrison Ford as Han Solo in a sequence set in a Mos Eisley space port. Lucas originally intended to use stop-motion effects for Jabba, but the sequence was ultimately cut, and Jabba did not make his movie debut until *Return of the Jedi*. The cut footage was resurrected and combined with a computer-generated Jabba for the *Star Wars Special Edition* (1997).

EPISODE II: ATTACK OF THE CLONES (2002)

In a prophetic 1979 interview, Lucas said, "The day will come when video will be of equal quality to film and when more people will switch over to using video to shoot theatrical motion pictures." Lucas collaborated with Jonathan Hales to write the screenplay for *Attack of the Clones*, which was the first major feature shot entirely on high-definition videotape instead of film.

EPISODE III: REVENGE OF THE SITH (2005)

In a 2005 interview, Lucas said part of his goal with the creation of the second trilogy was to change audiences' perspective of Darth Vader in the first trilogy. "In IV, people didn't know whether Vader was a robot or a monster, or if there was anybody in there. This way, when you see him walk into the spaceship in Episode IV, you're going to say, 'Oh my God, that's Anakin. The poor guy is still stuck in that suit.' So the tension and drama is completely reversed."

SKYWALKER RANCH

As a film student at the University of Southern California, George Lucas dreamed of building his own facility for postproduction sound and editing, "a big fraternity where filmmakers could work together and create together." Using the profits from both *American Graffiti* and *Star Wars*, he

transformed a 1,700 acre ranch (later expanded to cover over 6,500 acres) in Marin County, California, into Skywalker Ranch. The Victorian-styled Main House (pictured) contains Lucas's offices and Lucasfilm's research library.

DESIGNING THE GALAXY

McQuarrie's concept art for Vader (above). John Mollo's costume sketches (right).

CONCEPT ART

George Lucas told Ralph McQuarrie that Darth Vader should be a tall, black, majestic figure with fluttering robes, possibly wearing an exotic helmet, like a Japanese warrior, with a black silk scarf across his face. Studying the original script, McQuarrie noted that Vader first appeared when he jumped from one spaceship to another, so Lucas agreed he should wear breathing apparatus. "George liked the mask that I did for Vader, with the big goggles and so he said, 'That's great, that's fine,' and we just left it at that." McQuarrie's sketches provided reference for costume designer John Mollo, who constructed Vader's costume to allow for pieces to be removed quickly so the actor "wouldn't have to go around all day in the whole caboodle."

EXPANDED CONCEPTS

Assigned to develop a new Sith villain for *Attack of the Clones*, concept artist Dermot Power drew from his own youthful interest in martial arts to create a vampiric, samurai-like female character. "I deliberately curved the Sith's lightsaber," Power says. "I wanted something exotic, almost Arabic." Power's sketches were temporarily shelved when the veteran actor Christopher Lee signed on to play Count Dooku, but the art was later utilized for Asajj Ventress, Dooku's deadly lightsaber-wielding protégé in the *Clone Wars* cartoon, comics, and novels.

Ventress debuted in *Dark Horse Comics*' "Schism" (Ostrander/Duursema/Parsons).

for the designers of the *Star Wars* saga's many costumes, sets, and models.

DEVELOPING CHARACTERS

McQuarrie created this poster concept (above), in which Chewbacca had fangs, while Lucas worked on the first *Star Wars* screenplay. The director had encouraged McQuarrie to make C-3PO look like the robot from Fritz Lang's *Metropolis* (1927). The lightsaber-wielding hero resembles Lucas at the time.

PRODUCTION PAINTINGS

When model-makers, set and lighting designers, and camera operators work together to create a sequence, production paintings help them to visualize specific scenes. After Lucas approved the concept designs for the X-wings, TIE fighters, and the Death Star trench for *A New Hope*, he assigned Ralph McQuarrie to create this painting (left) to show the scale of the Death Star battle station in relation to the size of the starfighters. This production art served as an aid to the visual effects department.

STORYBOARDS

A series of drawings that illustrate the action and composition of a shot, a storyboard may also include relevant technical notes for camerawork and effects. For *The Phantom Menace*, storyboard artist Benton Jew sometimes extended the forms of his characters beyond the rectangular "frame" (the area viewed by the camera) to better convey their movement.

USING ANIMATICS

Animatics are simulations of scenes that clarify the timing and the composition of a shot. They can be simple videotaped storyboards or complex 3-D animated computer graphics. Low-resolution 3-D animatics created by Dan Gregoire and his team were used during the entire production of *Revenge of the Sith*.

This concept art by Edwin Natividad shows the lower levels of Coruscant, where public transport is provided by a monorail system.

COSTUME DESIGN

With Lucas's attention to detail, it is no accident that many *Star Wars* characters are immediately recognizable by their clothing. For *The Phantom Menace*, Lucas asked concept artist Iain McCaig and costume designer Trisha Biggar to dress the people of Theed in the "clothing of paradise." McCaig's conceptual design for Queen Amidala combined aspects of Pre-Raphaelite paintings and art nouveau with Tibetan and Mongolian ceremonial vestments.

MATTE PAINTINGS

A key effect since the earliest days of filmmaking, matte paintings allow live-action sequences to take place in scenes that "expand" beyond the set. For *The Empire Strikes Back*, Ralph McQuarrie conceived and designed the shot that utilized his matte painting of Cloud City at twilight (below). McQuarrie's painting (above) was done by applying paint directly to a large sheet of glass, enabling the filmed action to fill in the blacked-out areas. Today, this method has been replaced by digital mattes, computer-generated environments that look absolutely real.

MOTION-CONTROL CAMERA

In the first *Star Wars* trilogy, the vehicles may have appeared to fly past the camera, but it was actually the camera that moved. ILM's first visual effects supervisor, John Dykstra, custom-hardwired a computer to an old VistaVision camera to create a motion control system that was dubbed the Dykstraflex. The Dykstraflex camera was attached to the end of a boom arm, and could be programmed to pan, tilt, pass, and track around a model positioned before a bluescreen, then repeat the same movements exactly for subsequent elements that could then be added to the same shot.

VISUAL EFFECTS

WHILE PREPARING FOR *Star Wars* in 1975, George Lucas investigated existing optical facilities but could not find "a special-effects company equipped to do what I wanted to do. The only course was to start a company of my own to do the special effects, and to start from scratch, hiring young people and, where necessary, training them." Initially founded to work solely on *Star Wars*, Industrial Light & Magic (ILM) combined new technology with old techniques to create stunning visual effects, and went on to produce groundbreaking work for over 125 features. Despite the first trilogy's award-winning visuals, Lucas was frustrated by the technological limitations, and was reluctant to develop a new *Star Wars* movie "unless I had the technology available to really tell the kind of story I was interested in telling."

Nearly 10 years after the release of *Return of the Jedi*, Lucas saw the photo-realistic computer-generated (CG) dinosaurs ILM created for Steven Spielberg's *Jurassic Park* (1993) and realized the time had come to return to *Star Wars*. "With CG at my disposal, I knew I could do whatever I wanted."

LIGHTSABER EVOLUTION

For the first three movies, the lightsaber effect utilized rotoscoping: the artistic retouching of individual frames on a length of film. Spinning wooden "blades" (right) were coated with material that reflected the set's lights, then photographed through a half-silvered mirror. Through the camera, the lightsabers appeared to glow, which was enhanced by rotoscoping. In the second trilogy (above), lightsabers were built with metal blades, and were illuminated by CG effects in postproduction.

COMPUTER-GENERATED IMAGES

For the scene in which Obi-Wan tours the Kaminoan cloning facility in *Attack of the Clones*, actor Ewan McGregor was filmed alone in front of a bluescreen, without co-actors, props, or a set. The footage of McGregor was then composited with CG characters and surroundings, and texture and details were added. The final illusion is that Obi-Wan is walking through a glass-lined corridor with Lama Su and Taun We.

SOUND DESIGN

Thinking that electronic sound had been overused in fantasy films, George Lucas encouraged the recording of sounds from real sources—not from synthesizers—for the sounds of *Star Wars*. These recordings were later enhanced to create distinctive sounds for spacecraft, weapons, and creatures. Just as sound designer Ben Burtt collected a wide variety of sounds for the first *Star Wars* trilogy, supervising sound editor Matthew Wood (above) gathered rare sounds for use in the second trilogy.

MUSICAL SCORE

Composer of the scores for all six *Star Wars* films, John Williams conducted the 87-piece London Symphony Orchestra in March 1977 to record the original music for *Star Wars* (above). Williams created a theme for all the main characters. "I made a conscious decision to try to model and shape the score on late-nineteenth-century, romantic orchestral scores," Williams said in 1979.

MODEL-MAKING

WHEN GEORGE LUCAS founded the visual effects company that would come to be named Industrial Light & Magic (ILM), he hired a group of young model-makers to build the vehicles conceived by Ralph McQuarrie and Joe Johnston for *Star Wars*. Supervising model-maker Steve Gawley has been with ILM since it was formed in 1975, and has worked on more than 40 films. Gawley says, "Throughout the years, we have built trains, planes, automobiles, spaceships, creatures, and everything in between. Additionally, we can help the directors of various projects see things in 3-D by providing maquettes [concept models] before they are realized in digital form."

ILM's chief model-maker Grant McCune masks an X-wing for the first *Star Wars* film in 1976.

SHOOTING STOP-MOTION MODELS

Stop-motion animation is the process of filming models one frame at a time, with minute adjustments to the model being made for each frame to create the illusion of motion when the film is played at normal speed. The Imperial AT-ATs in *The Empire Strikes Back* were created by Jon Berg and Tom St. Amand from concept sketches by Joe Johnston. For the prototype, Berg created moving parts that included small squared-off pistons in the upper legs, which made the AT-ATs appear more mechanically operational.

HAND PUPPETS

Special-creature designer Stuart Freeborn (at left) sculpted the foam latex puppet of Yoda for *Empire*, and engineered the mechanisms to control its eyes, mouth, and ears. The aged Jedi Master was brought to life by puppeteer Frank Oz, who also supplied Yoda's voice.

CONCEPT MODELS

Working from concept sketches by Edwin Natividad, Michael Patrick Murnane of the Skywalker Ranch concept art department worked with Sculpey (a claylike compound) to create a preproduction concept model of Zam Wesell. "Some people see a drawing differently," notes Murnane, "but when you hand over a 3-D model, you don't have to explain much. It helps to talk on the same level." The maquette served as the basis for the wardrobe department's final costume for Zam.

PLASTIC MODELS

Many model spacecrafts for *Star Wars* were assembled by combining new parts with bits and pieces from existing off-the-shelf model kits. The model of the Imperial TIE interceptor (above) was designed by Joe Johnston and constructed by Lary Tan, and measures about 61 centimeters (2 feet) across.

FULL-SCALE MODELS

Luke's landspeeder was a full-scale mechanical prop made for *A New Hope*. Built in England, one version of the landspeeder was a three-wheeled motorized vehicle, which was used for location shots in Tunisia. After it was shipped to California for additional scenes in Death Valley, some ILM employees drew curious stares when they drove it around the local streets.

ROD PUPPET

To create the rancor monster for Episode VI: *Return of the Jedi*, creature designer Phil Tippett used a 61-centimeter (2 feet) tall, foam-rubber rod puppet, controlled by three puppeteers.

SET MODELS

Used as a visual guide for set builders, set models also create positions for cameras and actors. The production art department maquette for the Yavin 4 hangar (left) in Episode IV: *A New Hope* was made of paper and cardboard.

MINIATURES

Revenge of the Sith features the largest miniature ever built for a *Star Wars* film—the volcanic planet Mustafar. Visual effects supervisors John Knoll and Roger Guyett worked with the ILM model shop, led by Brian Gernand, to film the miniature. The shoot incorporated the food-processing element methycel for lava. Lead model-maker Nick D'Abo inspects the lava flow (below).

MOVIE POSTERS

AS MOVIE POSTERS are used for advance promotions as well as actual theatrical releases and re-releases, it is not surprising that more posters have been produced for the six *Star Wars* movies than for any other film series. Most are printed in large quantities, but limited printings or commercial availability have made some of these posters highly collectible. Although a number of posters are essentially reproductions of photographs, the majority are painted works of art. According to the prolific poster artist Drew Struzan, "Photography is a direct reflection of reality. Art is interpretive, therefore it embodies more emotion and feeling. That's why George Lucas usually goes with a painting for his work, because he wants to embody the feeling, or the soul, of the movie."

Ralph McQuarrie created a poster concept (left) for "The Star Wars" while the story was still in the early stages of development.

THEATRICAL RELEASE POSTERS

The *Star Wars* Style "A" poster (right) is considered to be among the best known of all movie posters. Painted by Tom Jung, the image of Leia beside a lightsaber-wielding Luke was incorporated into the *Star Wars* logo for use on countless pieces of merchandise. The original painting is hanging in Skywalker Ranch. Actress Debbie Reynolds, the mother of Carrie Fisher (Princess Leia), loved the painting so much that Jung was asked to do a duplicate of the artwork for her. Jung went on to create the cover art for the bestselling *Star Wars* novels *Heir to the Empire*, *Dark Force Rising*, and *The Last Command*.

Roger Kastel's Empire "A" poster evokes the art for the 1967 re-release poster for *Gone with the Wind*.

The Style "B" poster for the third *Star Wars* movie, *Return of the Jedi*, was painted by Kazuhiko Sano.

TITLE CHANGE

The title "Revenge of the Jedi" appeared on Drew Struzan's 1982 teaser poster for the third film, but Lucas—believing a true Jedi would never seek revenge—changed the film's title just before its release. "The title was always intended to be *Return of the Jedi*," Lucas says. "We'd had so many difficulties with people trying to report stuff to the media that we called the film *Revenge of the Jedi* to throw people off."

EPISODE I
BLUE HARVEST
HORROR BEYOND IMAGINATION

Lucasfilm used this logo on "official" stationery for production arrangements on *Jedi*. The logo also appeared on T-shirts and caps worn by the crew, who were told to say that they were working on a horror movie.

COVERT OPERATIONS

For the film that would eventually be titled *Return of the Jedi*, Lucasfilm intended for some location shots to be on public land in Arizona and California. To thwart an invasion of *Star Wars* fans and reporters, the fictitious working title *Blue Harvest* was created. Some fans found out about the Arizona location, but *Jedi* producer Howard Kazanjian claimed that the *Blue Harvest* ploy "worked out exceptionally well."

TEASER POSTERS

Also known as pre-release or advance posters, "teaser" posters are typically distributed several months before a film's scheduled release date. The Episode I teaser was produced in November 1998 in conjunction with the release of the first theatrical trailer in the United States. The spectral, ominous shadow behind the nine-year-old Anakin Skywalker is a prophetic omen of his dark destiny, announcing the story that will unfold in the prequel trilogy.

Lucasfilm president of marketing Jim Ward, art directors Scott Erwert and Greg Bell, and copywriter Paul Venables focused on the theme of forbidden love to create the Episode II teaser.

In the fall of 2004, Lucasfilm released the teaser for Episode III. It echoed the Anakin/Vader link from the Episode I teaser, with Anakin now bound to the darkness that will consume him.

FOREIGN POSTERS

Many international *Star Wars* posters incorporate the same art as their American release's counterparts, but some are unique creations. One of the most dramatic is Witold Dybowski's art for the Polish release of *Jedi*. Lucasfilm did not provide any instructions for Dybowski, who knew only that Vader would die, and "could only assume it was a death of huge proportions."

EXPANDING THE UNIVERSE

THE *STAR WARS* movies continue to spawn an ever-increasing number of comics, novels, toys, and video games, many of which interconnect with each other and expand the range of characters, locations, and scenarios in the *Star Wars* galaxy. An incredibly diverse range of merchandise is available for fans to add to their collections, including R2-D2 bubble bath, Darth Vader lunchboxes, electronic starships, action figures, T-shirts, and highly detailed replicas of many of the props used in the six *Star Wars* films. But George Lucas dismisses the notion that licensing and merchandising was always part of his grand plan. "It certainly wasn't something anybody predicted, especially us. The first toys didn't come out until a year after the first film came out, and it's grown into this big opportunity, which has helped finance the movies for me. I enjoy toys, and I make the films to stimulate the imaginations of the audience, and especially the young people who see the films."

MERCHANDISE

BEFORE 1977, MERCHANDISING for movie properties tended to be a limited venture to promote a theatrical release. The business changed dramatically after George Lucas shrewdly retained the *Star Wars* sequel rights and negotiated away from 20th Century Fox the merchandising rights for his films. The idea for *Star Wars* merchandise came to Lucas while he was working on the first film's screenplay in his office. "I was sitting there all day, writing and drinking coffee—writing about Wookiees and such, and I thought, wouldn't it be fun to have a Wookiee mug?" Lucas thinks the idea may have been inspired by his dog, Indiana, who "was sort of a prototype for the Wookiee, and you're always seeing these mugs of your favorite dog. It was just something that I wanted to have personally on my desk while I was writing rather than an idea that I could take these out and sell them and make a lot of money."

Would any collector dare release the evil Emperor from his mint-condition confines? Kenner Products produced 136 *Star Wars* action figures and sold more than 250 million units between 1978 and 1985. After being bought by Hasbro, Kenner resumed production of new *Star Wars* action figures in 1995.

EDUCATIONAL ENTERTAINMENT
All *Star Wars* toys and games encourage the imagination, but some merchandise is more obviously educational, such as read-along books that are packaged with audio accompaniment and designed for early readers ("You will know it is time to turn the page when you hear Artoo-Detoo beep like this..."). *Planet of the Hoojibs*, adapted from *Star Wars* #55 (Marvel Comics), was released in 1983 by Buena Vista records with a 7-inch LP record or an audiocassette.

LEGO & LUCASFILM

In 1998, Lucas Licensing and The LEGO Group announced an exclusive, multi-year agreement that would give LEGO worldwide rights to produce construction sets and figurines based on *Star Wars*. This deal marked the first property ever licensed by LEGO, and gave Lucasfilm an even stronger presence in the European toy market. The 36-centimeter (14-inch) tall Yoda was an exclusive prize in a promotion for Target stores, and could be won by guessing the correct number of LEGO bricks that made up the Jedi Master. The promotion was so popular that LEGO revamped its Yoda, which was made up of 1,078 pieces, for their Ultimate Collector Series.

The 2005 Saga Edition of *Star Wars MONOPOLY* includes eight sculpted pewter tokens: Yoda, Luke, Princess Leia, Obi-Wan Kenobi, Darth Vader, the Emperor, Darth Maul, and Grievous.

BOARD GAMES

Star Wars board games can turn a quiet evening into a battle for control of the galaxy. The selection ranges from 1977's saga-specific *Destroy Death Star Game* ("First one to destroy Death Star wins!") by Kenner/Parker Bros. to *Star Wars* versions of games such as Stratego, Risk, and Trivial Pursuit. *Star Wars MONOPOLY* is available in an Original Trilogy version, a Saga Edition, and as a CD-ROM computer game.

George Lucas got his wish for a Chewbacca mug with this 17-centimeter (6 3/4-inch) tall tankard, sculpted by Jim Rumpf and produced by California Originals (Mind Circus) in 1977-78. The same company also produced tankards of Darth Vader and Obi-Wan Kenobi.

PROP REPLICAS

Most genuine *Star Wars* props are retained in the archives of Lucasfilm, but some items have been meticulously recreated to be made available to fans. Master Replicas produced the Jedi Training Remote, based on the prop seen on-screen in *A New Hope*. When placed on its display stand, the prop appears to levitate.

Using art from the Episode III style guide, Giant manufactured their "Model Droids" T-shirt featuring C-3PO and R2-D2 (above) in advance of the release of *Revenge of the Sith*.

REVENGE OF THE SPUD

Since Hasbro introduced Mr. Potato Head in 1952, the versatile vegetable has been the first toy advertised on television, a star of Disney and Pixar's two *Toy Story* movies, the official Ambassador for the Rhode Island State Tourism Board, and an incentive for children to play with their food. In 2005, Hasbro/Playskool released Darth Tater, who comes equipped with detachable eyes, tongue, nose, teeth, face-plate, helmet, cape, shoes, two ears, and two arms (one holds a lightsaber).

CONTINUING THE SAGA

RADIO DRAMAS

Author Brian Daley scripted a 13-episode radio dramatization of *A New Hope* for the US National Public Radio (NPR). It first aired in 1981, and NPR later produced dramas of *Empire* and *Jedi*. Directed by John Madden, the voice actors included Mark Hamill (Luke Skywalker) and Anthony Daniels (C-3PO). The above photo shows Daniels, Ann Sachs (Princess Leia), Perry King (Han Solo), and Billy Dee Williams (Lando Calrissian) during production of *Empire*.

IN 1979, GEORGE LUCAS told an interviewer that he had initially conceived the *Star Wars* saga as two trilogies, then "after the success of *Star Wars* [Episode IV] I added another trilogy." Lucas also stated that he had developed "story treatments on all nine" films, but his more recent revelations contradict this. As guest of honour at the *Star Wars: Celebration III* convention in 2005, Lucas admitted to an audience that "to be very honest with you, I never ever thought of anything that happened beyond Episode VI. It's the Darth Vader story." Although Lucas has no intentions of directing a third *Star Wars* film trilogy, he has announced new *Star Wars* television projects in development, including a 3-D animation version of *Clone Wars*, the cartoon action series set between the events of Episode II: *Attack of the Clones* and Episode III: *Revenge of the Sith*. With so many characters and worlds in the *Star Wars* universe, and more stories expanding the events of the film trilogies, the *Star Wars* saga is guaranteed to continue for many years to come.

Ralph McQuarrie's painting of Chewbacca's home offered TV viewers their earliest glimpse of Kashyyyk.

THE STAR WARS HOLIDAY SPECIAL

On November 17, 1978, CBS aired "The *Star Wars* Holiday Special" to an eager audience of millions. Despite the participation of most of the principal actors from *A New Hope*, an animated cartoon that introduced Boba Fett, and some fine matte paintings by Ralph McQuarrie, the overall production—promoted as "a live-animated-musical-pot pourri of pure entertainment"—was widely regarded as regrettable. The Holiday Special was never aired again or officially released on video (although bootlegs of it do exist), so it has now assumed cult status.

EWOK ADVENTURES

George Lucas executive-produced two television features, *The Ewok Adventure: Caravan of Courage* (1984) and *Ewoks: The Battle for Endor* (1985), each of which premiered on ABC in the US and were released theatrically in Europe. Lucasfilm-approved timelines place both stories before the events of *Return of the Jedi*, while producer Thomas G. Smith noted that a young Ewok's wooden two-legged walker toy is evidence that "the Imperials had been there." Actor Warwick Davis reprised his *Jedi* role as the plucky Ewok, Wicket W. Warrick, in both films. The production design was by Joe Johnston, and both features won an Emmy award for their special visual effects. The movies were released on DVD in 2005.

THE TOWANI FAMILY

Prequels to *Return of the Jedi*, the *Ewok* movies follow young Cyndel Towani (Aubree Miller), her brother Mace (Eric Walker), and her parents, Catherine and Jeremitt (Fionnula Flanagan and Guy Boyd—Paul Gleason played Jeremitt in *Battle for Endor*) after they are marooned on Endor. Cyndel teaches Wicket how to speak English, an ability he doesn't show when he meets Princess Leia.

The *Battle for Endor* features the incredibly swift being known as Teek, played by Niki Botelho.

MORE EWOKS

Nelvana Studios, the same animation company that produced *The Story of the Faithful Wookiee* for "The *Star Wars* Holiday Special," launched *The Ewoks & Droids Adventure Hour* in 1985. *Ewoks* was picked up for a second season the following year, and presented the ongoing exploits of the ever-resourceful Ewok Wicket (top right) and his companion (bottom right) Princess Kneesaa.

ANIMATED DROIDS

Anthony Daniels provided C-3PO's voice for Nelvana Studios' *Droids*, which consisted of 13 episodes and a prime-time special, *The Great Heep*. The droids (left) are shown here on the run from the wisecracking Vlix and Boba Fett in the episode "A Race to the Finish," which also introduced the Boonta Speeder Races, albeit without Podracers. To maintain continuity with the *Star Wars* films, *Droids* is set 15 years before *A New Hope*.

CLONE WARS

Premiering on the Cartoon Network in 2003, *Star Wars: Clone Wars* was produced and directed by Genndy Tartakovsky with art direction by Paul Rudish. It won an Emmy for Outstanding Animated Program and introduced Grievous before the release of Episode III.

STAR WARS PUBLISHING

ALTHOUGH NO ONE imagined how audiences would embrace the first *Star Wars* film, there was at least one indication that plenty of people were interested in the movie. In November, 1976, Ballantine Books published *Star Wars*—*From the Adventures of Luke Skywalker*, a novelization of George Lucas's screenplay that was credited to the director but ghostwritten by Alan Dean Foster. By February, 1977, the first printing of a half-million copies of the novel had sold out. Another advance promotional boost for *Star Wars* came from the first three issues of a six-issue Marvel Comics adaptation, which came out before the film's theatrical release and sold extremely well. In 1978, Foster's *Splinter of the Mind's Eye* became the first official *Star Wars* "expanded universe" novel, with an adventure set shortly after *A New Hope*. Today, *Star Wars* books and comics continue to enthrall readers, and regularly appear on bestseller lists.

FAVORITE VADER

Ralph McQuarrie modified Vader's helmet throughout the production of *Star Wars*. His favorite version is on the cover of the original novelization (left): "George looked at the helmet and said it never looked better!"

MARVEL COMICS

George Lucas was a fan of Marvel editor-writer Roy Thomas's work on *Conan* and *Tarzan*, and sought him out to develop a *Star Wars* tie-in for *A New Hope*. Thomas hired artists Howard Chaykin and Steve Leialoha for the series, and the layout for Chaykin's promotional poster was utilized for the first issue's cover (right). Provided with little art reference, the artists were encouraged to take creative liberty with Jabba because they had been told he had been cut from the film. Of the thin, bipedal Jabba who appeared in issue

#2, Leialoha later said, "Who knew there would be sequels or *Special Editions*?"

THE SAGA CONTINUES

After a long absence from publishing, *Star Wars* returned in the 1990s with the best-selling *Heir to the Empire* by Timothy Zahn (Bantam, 1991). The story introduced Mara Jade and Grand Admiral Thrawn, and was followed by *Dark Force Rising* and *The Last Command*. The three books collectively form the "Thrawn Trilogy."

EARLY SPIN-OFF NOVELS

Prior to the 1990s' *Star Wars* publishing explosion, the most popular spin-off novels were Del Rey's Han Solo series, written by author Brian Daley—*Han Solo at Star's End*, *Han Solo's Revenge* (right), and *Han Solo and the Lost Legacy*.

BEHIND THE SCENES

Star Wars films have always been recognized for their visual and technical achievements, and many books have showcased work by the artists and designers involved in the productions. While there is no question that *Star Wars* is the creation of George Lucas, the writer-director has always acknowledged those who helped bring his visions to the screen. In his foreword to *The Art of Star Wars: Episode III Revenge of the Sith* by J.W. Rinzler, Lucas sums up his appreciation of these artists: "This book is a tribute to their amazing work—often taken for granted once the film is complete—but without which there would be no film at all."

FAN CLUB PERIODICALS

For committed *Star Wars* fans, dedicated publications are available that include exclusive interviews, fact-filled articles, fan art, merchandise offers, and advice for collectors. *Star Wars Insider* (left) meets the needs of US fans, and there are also similar periodicals produced for the UK, France, Germany, Spain, and Mexico. All of these magazines are affiliated with the Official *Star Wars* Fan Club.

The novelization of *Revenge* (above) by Matthew Stover features new sequences that expand Anakin's fall to the dark side, inspired by a meeting with Lucas to discuss the movie's story.

DARK HORSE COMICS

Founded by Mike Richardson in 1986, Dark Horse Comics began publishing *Star Wars* comics in 1991. As a long-time fan, Richardson relished the opportunity. "To do *Star Wars* comics with respect, and a real interest in adding to the *Star Wars* legend—stories that built on what was already there—was an exciting prospect." Dark Horse has produced over 100 collected editions of *Star Wars* titles; the art of a battle-worn Anakin (left) by Brian Ching is from Republic #67 (2004).

VIDEO GAMES

In 1982, Parker Bros. released the first Star Wars computer game for the Atari 2600 VCS.

FOR THOSE WHO are impatient for starfighters and blasters to become commercially available, or just want to put some Pit Droids through their paces in the run up to an adrenalin-pumping Podrace, there are many *Star Wars* video games to transport you to that far-away, long-ago galaxy. But can they actually make dreams come true? For *Star Wars* actor Hayden Christensen, the fantasy of being a lightsaber-wielding Jedi fighting against the forces of evil became a reality. After he signed on to play Anakin Skywalker in Episode II, Christensen admitted he had spent a lot of time in his younger days playing *Star Wars* video games: "[my brother and I] used to lock ourselves in my bedroom and relay the controller back and forth until we became Jedi Knights. If I played it too much... it used to visit me in my dreams. I used to have dreams that I was in the *Star Wars* game. It just had such an impact."

THE EMPIRE STRIKES BACK (PARKER BROS., 1982)

Set on Hoth, this side-scrolling shoot-'em-up cartridge game (left) for Atari and Intellivision home consoles enables players to take the role of a lone Rebel pilot, and fly a snowspeeder to attack an advancing squadron of Imperial AT-ATs. To stop the walkers from reaching the shield generator (and in order to win the game), the player has to dodge incoming homing missiles and hit each walker 48 times.

X-WING (LUCASARTS, 1993-94)

As PCs became affordable gaming platforms, video game developers switched from cartridges to CD-ROMs. LucasArts' first *Star Wars* CD-ROM games, such as *X-Wing* (right), were space combat simulators that put players into the cockpits of several different starfighters, including X-wings, B-wings, TIE fighters, Interceptors, bombers, and experimental craft.

KNIGHTS OF THE OLD REPUBLIC (LUCASARTS/BIOWARE, 2003)

This "golden-age saga" game is set four millennia before Episode IV, and incorporates the Sith planet Korriban from the *Tales of the Jedi* comics, as well as the familiar setting of Tatooine (below). *KNIGHTS OF THE OLD REPUBLIC* not only enables players to wield lightsabers, but also to face the challenge of whether they will be seduced by the dark side. It received Game of the Year awards from dozens of major gaming publications and websites.

THE SITH LORDS (LUCASARTS/OBSIDIAN ENTERTAINMENT, 2004)

The sequel to *KNIGHTS OF THE OLD REPUBLIC* picks up five years into the civil war that has devastated the Jedi. It also introduces yet another nightmare-inducing Sith Lord, Darth Nihilus (right).

BATTLEFRONT (LUCASARTS/PANDEMIC STUDIOS, 2004)

If you ever wanted the Rebels to win the Battle of Hoth or lose the Battle of Endor (right), you can make it happen with *STAR WARS: BATTLEFRONT*. Specifically geared for team-based gameplay over the Internet, this game enables players to engage in campaigns from both film trilogies. For battles set during Episodes I-III, players choose whether to fight alongside the Republic or the Separatists; for missions during Episodes IV-VI, the choice is between the Empire and the Alliance.

REPUBLIC COMMANDO

A first-person shooter, *REPUBLIC COMMANDO* (left and above) offers the ability to play a tough-as-nails clone trooper in charge of a four-man squad during the Clone Wars. Thanks to an innovative "One Touch Squad Control" system, you can engage your squad with a single button. The game—made for the Xbox or PlayStation 2—can accommodate up to 16 players online.

Space combat is what it is all about in *JUMP TO LIGHTSPEED* (above), in an expansion to the online game *STAR WARS GALAXIES*. Players can customize their own ships, fly into space, and engage "enemy" players in dogfights.

REVENGE OF THE SITH

Released in advance of the movie, this third-person actioner lets you play as Anakin Skywalker or Obi-Wan Kenobi. It parallels the movie's story, but also presents new characters and locations—and an amazing alternate ending if you defeat Obi-Wan on Mustafar.

STAR WARS TIMELINE

WHEN THE FIRST STAR WARS movie premiered in 1977, George Lucas had little idea he was about to make motion-picture history. "I was in Los Angeles," he says, "overseeing the sound mix on one of the foreign versions of the film. I went to a restaurant on Hollywood Boulevard across from Grauman's Chinese Theater. It was like a mob scene. One lane of traffic was blocked off. There were police there. There were limousines in front of the theater. There were lines, eight or nine people wide, going both ways and around the block. I said, 'My God, what's going on here? It must be a premiere or something.' I looked at the marquee, and it was *Star Wars*."

merchandising, and publishing rights, Lucas signs a contract with Twentieth Century Fox.

ACKNOWLEDGMENTS

AUTHOR ACKNOWLEDGMENTS

Many *Star Wars* publications were used as reference for this book, and I am especially indebted to Dan Madsen and Jon Bradley Snyder for their contributions to *Star Wars Insider*, Dan Wallace for his *Essential Guide* books, Lisa Findlay at Random House for providing various *Star Wars* books, and Brian J. Robb at Titan Magazines for providing copies of *Star Wars: The Official Magazine*. Thanks to Neil Kelly, Dan Bunyan, Jill Bunyan, and Laura Gilbert at DK for making our *Ultimate Visual Guide* the ultimate read, to Simon Beecroft for hiring me to write the book, and to Jonathan Rinzler, Iain Morris, and Leland Chee at Lucas Licensing for keeping us all on course. Special thanks also go to Mike Richardson and Randy Stradley at Dark Horse Comics, who allowed me to edit *Droids* way back when, and to Allan Kausch for ever encouraging me to write.

DORLING KINDERSLEY would like to thank Ian McDiarmid for his excellent foreword; Jonathan Rinzler, Iain Morris, Leland Chee, Tina Mills, Stacey Cheregotis, Amy Gary, and all at Lucas Licensing; Justin Lambros at LucasArts; all at *Star Wars Insider*;

Julia March for the index; Alexander Ivanov for his photography; Keith Clayton at Del Rey Books; Lance Kreiter and Dan Jackson from Dark Horse Comics Inc. for their assistance and for the usage of artwork; Derryl Depriest at Hasbro Inc.; Jay Bruns and Linda Hegarty at LEGO; Barry Jones at Master Replicas; Marvel Comics; Buena Vista; California Originals (Mind Circus); Giant Merchandising; Nelvana Studios; Cartoon Network; Bantam Books; Ballantine Books; Pandemic Studios; Obsidian Entertainment; Bioware.
